SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

Following more than two years of pandemic, spillovers from the Russian Federation’s invasion of Ukraine are set to sharply hasten the deceleration of global economic activity, which is now expected to slow to 2.9 percent in 2022. The war in Ukraine is leading to high commodity prices, adding to supply disruptions, increasing food insecurity and poverty, exacerbating inflation, contributing to tighter financial conditions, magnifying financial vulnerability, and heightening policy uncertainty. Growth in emerging market and developing economies (EMDEs) this year has been downgraded to 3.4 percent, as negative spillovers from the invasion of Ukraine more than offset any near-term boost to some commodity exporters from higher energy prices. Despite the negative shock to global activity in 2022, there is essentially no rebound projected next year: global growth is forecast to edge up only slightly to a still-subdued 3 percent in 2023, as many headwinds—in particular, high commodity prices and continued monetary tightening—are expected to persist. Moreover, the outlook is subject to various downside risks, including intensifying geopolitical tensions, growing stagflationary headwinds, rising financial instability, continuing supply strains, and worsening food insecurity.

These risks underscore the importance of a forceful policy response. The global community needs to ramp up efforts to mitigate human-itarian crises caused by the war in Ukraine and conflict elsewhere and alleviate food insecurity, as well as expand vaccine access to ensure a durable end of the pandemic. Meanwhile, EMDE policy makers need to refrain from implementing export restrictions or price controls, which could end up magnifying the increase in commodity prices. With rising inflation, tightening financial conditions, and elevated debt levels sharply limiting policy space, spending can be reprioritized toward targeted relief for vulnerable households. Over the long run, policies will be required to reverse the damage inflicted by the dual shocks of the pandemic and the war on growth prospects, including preventing fragmentation in trade networks, improving education, and raising labor force participation.

Russia’s invasion of Ukraine is affecting EMDE regions to different degrees via impacts on global trade and output, commodity prices, inflation, and interest rates. The adverse spillovers from the war will be most severe for Europe and Central Asia, where output is forecast to sharply contract this year. Output growth is projected to slow this year in all other regions except the Middle East and North Africa, where the benefits of higher energy prices for energy exporters are expected to outweigh those prices’ negative impacts for other economies in the region. Risks for all EMDE regions are tilted to the downside and include intensifying geo-political tensions, rising inflation and food shortages, financial stress and rising borrowing costs, renewed outbreaks of COVID-19, and disruptions from disasters.

INDIAN ECONOMY

INTRODUCTION

Two years into the COVID-19 pandemic, the global economy continues to be plagued by uncertainty, with resurgent waves of mutant variants, supply-chain disruptions, and a return of inflation in both advanced and emerging economies. Moreover, the likely withdrawal of liquidity by major central banks over the next year may also make global capital flows more volatile. In this context, it is important to evaluate both the pace of growth revival in India as well as the strength of macro-economic stability indicators. It is also essential to look at progress in vaccination as this is not just a health response but also a buffer against economic disruptions caused by repeated waves of the pandemic.

Since January 2021, the widely used Purchasing Managers' Index-Manufacturing has remained in the expansionary zone (i.e. over 50) except for one month when the second wave had slowed down economic activity. The Index of Industrial Production (IIP) and Core Industry indices have both followed a similar pattern and, in November 2021, went past their pre-pandemic level for the corresponding month in 2019

Economy recovers past Pre-Pandemic levels

The Indian economy, as seen in quarterly estimates of GDP, has been staging a sustained recovery since the second half of 2020-21. Although the second wave of the pandemic in April- June 2021 was more severe from a health perspective, the economic impact was muted compared to the national lockdown of the previous year. Advance estimates suggest that GDP will record an expansion of 9.2 per cent in 2021-22. This implies that the level of real economic output will surpass the pre-COVID level of 2019-20.

In contrast to the steady performance of the primary sector, the industrial sector went through a big swing by first contracting by 7 per cent in 2020-21 and then expanding by 11.8 per cent in this financial year. The manufacturing, construction and mining sub-sectors went through the same swing although the utilities segment experienced a more muted cycle as basic services such as electricity and water supply were maintained even at the height of the national lockdown. The share of industry in GVA is now estimated at 28.2 per cent

CHEMICAL SECTOR IN INDIA

INTRODUCTION

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers and fertilisers.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for ~16% of the world production of dyestuffs and dye intermediates. Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals.

India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

MARKETS SIZE

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 300 billion to India's GDP by 2025.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. Chemical production reached 903,002 MT in December 2021, while petrochemical production reached 1,877,907 MT. In December 2021, production levels of various chemicals were as follows: Soda Ash: 257,199 MT, Caustic Soda: 277,638 MT, Liquid Chlorine: 190,492 MT, Formaldehyde: 22,794 MT and Pesticides and Insecticides: 22,110 MT.

The specialty chemicals constitute 22% of the total chemicals and petrochemicals market in India. The demand for specialty chemicals is expected to rise at a 12% CAGR in 2019-22. Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India's share in the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the capex of specialty chemicals manufacturers in FY22 to Rs. 6,000-6,200 crore (US\$ 815-842 million). From April 2021 to February 2022, exports of organic & inorganic chemicals increased 33.75% YoY to reach US\$ 26.48 billion. Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some risks may not be material individually but may be material when considered collectively.*
- 2. Some risks may have material impact qualitatively instead of quantitatively.*
- 3. Some risks may not be material at present but may have a material impact in the future.*

NOTE:

The risk factors are disclosed as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” and elsewhere in this Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in our Restated Financial Information prepared in accordance with Indian GAAP.

Unless otherwise specifically provided in the respective Risk factors given below, the amounts of impact of risks specified hereunder, on our financial conditions, are not quantifiable.

INTERNAL RISK FACTORS:

- 1. We do not own the premises in which our registered office is located and the same is on lease arrangement. Any termination of such lease/license and/or non-renewal thereof and attachment by lender could adversely affect our operations.*

Our Registered Office is not owned by our company and are taken on rent from our Promoters Mr. Vipul Jatashanker Bhatt and Mrs. Sangeeta Vipul Bhatt for a period of 11 Months & 29 Days from June 01, 2022. Our Manufacturing facility located at Dahej, Gujarat is not owned by our company and is taken on lease basis from Gujarat Industrial Development Corporation for a period of 99 years from February 19, 2014.

We cannot assure you that we will be able to renew our leases on commercially acceptable terms, or at all. In the event that we are required to vacate our current premises, we would be required to make alternative arrangements and we

cannot assure that the new arrangements will be on commercially acceptable terms. If we are required to relocate our business operations or shut down our manufacturing facilities, we may suffer a disruption in our operations or have to pay increased charges, which could have an adverse effect on our business, prospects, results of operations, cash flows and financial condition.

For more information on the various statutes applicable to our company, please refer section titled “*Details of Immovable Property*” under Chapter titled “*Our Business*” starting from Page no 98 of this Red Herring Prospectus.

2. ***Some of the raw materials that we use as well as our finished products are hazardous, corrosive and flammable and require expert handling and storage, as applicable. Any accidents may result in loss of life or property and disrupt our operations which may have an adverse effect on our results of operation, cash flows and financial condition.***

We manufacture products which are used in various industries such as Lifesciences, Crop Care, Specialty Chemicals, Textile Auxillaries, Dyes, Pigments and Plastic Additives. These products have various attendant requirements in relation to storage such as storage in sealed containers in liquid conditions, maintaining distance from direct heat, sunlight, dust and moisture, depending on the nature of the product. Certain of the raw materials that we use are hazardous, corrosive and flammable and require expert handling and storage, as applicable. Any failure of our control systems, mishandling of hazardous chemicals, leakages, explosion or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process, transportation, handling or storage of products and certain raw materials, may cause industrial accidents, fire, loss of human life and property, damage to our and third-party property and / or environmental damage, require shutdown of one or more of our manufacturing facilities and expose us to civil or criminal liability. The occurrence of any such event in the future may adversely affect our reputation and may also result in a loss of life or property which in turn could lead to disruption of our operations, resulting in an adverse effect on our results of operations, cash flows and financial condition. The improper storage or mishandling of our products during transit may compromise the quality of the products being delivered to our customers and can potentially expose us to liabilities and claims which could adversely affect our brand image and reputation and have a material and adverse effect on our business prospects, results of operations and financial condition.

3. ***Our Company, Promoters, Directors and group Companies are involved in certain litigations including tax related litigations, which if determined against them/us, can affect financial conditions of our company.***

We cannot assure you that these legal proceedings will be decided in favour of our Company, our Promoters, and our Directors, Group Company as the case may be, or that no further liability will arise out of these proceedings. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed

jointly and severally. If any new developments arise, such as change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our Restated Summary Statements that could increase our expenses and current liabilities. Further, such legal proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may have an adverse effect on our results of operations and financial condition. For further details, see 'Outstanding Litigation and Material Developments' on page 175.

4. Our business and the demand for our products is reliant on the success of our customers' products with end consumers and any decline in the demand for the end products could have an adverse impact on our business, results of operations, cash flows and financial condition.

Our revenue is attributable to Lifesciences, Crop Care, Specialty Chemicals, Textile Auxillaries, Dyestuff, Pigments and Plastic Additives.

The demand for our products and margin of our products is dependent on and directly affected by factors affecting these industries. Consequently, any reduction in demand or a temporary or permanent discontinuation of manufacturing of products on account of breakthrough in the development or invention of alternate formulations, may expose us to the risk of our products becoming obsolete or being substituted by such alternatives. Any failure on our part to effectively address such situations or to successfully introduce alternate products or the shifting of the practice in these industries towards developing substitutes of our products could adversely affect our business, results of operations, financial condition and cash flows. Before we can introduce a new product, we must successfully execute a number of steps that involve a significant lead time, obtaining the requisite regulatory approvals and registrations, customizing our production capacities, scaling our vendor, production and infrastructure networks, getting relevant customer approval post undertaking their audit processes and effective marketing strategies. Our failure to effectively adapt to the situations or to successfully introduce new products or new applications, under unpredicted circumstances could adversely affect our business, results of operations and financial condition as we have in the past experienced a slowdown in the demand for our products and delays in new product development.

Further, we cannot assure you that we will be able to successfully make timely and cost-effective enhancements and additions to our technological infrastructure, keep up with technological improvements in order to meet our customers' needs or that the technology developed by others will not render our products less competitive or attractive. Our failure to successfully adopt such technologies in a cost effective and a timely manner could increase our costs and lead to us being less competitive in terms of our prices or quality of products. The development and commercialization process of a new product would require us to spend considerable time and money. Delays in any part of the process, our inability to obtain necessary regulatory approvals for our products or failure of a product to be successful at any stage could adversely affect our business.

5. Our business is dependent on our manufacturing facilities and we are subject to certain related risks. Unplanned slowdowns, unscheduled shutdowns or prolonged disruptions in our manufacturing operations or under – utilization of our manufacturing capacities could have an adverse effect on our business, results of operations, cash flows and financial condition.

Our business is dependent on our ability to manage our manufacturing facility situated at Dahej, Gujarat, including productivity of our workforce, compliance with regulatory requirements or changes in the policies of the state or local governments of this region or the Government of India and those instances which are beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural calamities or civil disasters and pandemics, including the COVID-19 pandemic which caused certain disruptions in our operations last year and may cause disruptions in the future, which may result in us incurring significant capital expenditure and changing our business strategy.

Our manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, efficiency, labour disputes, strikes, environmental issues, lock-outs, non-availability of services of our external contractors etc. Further, any significant malfunction or breakdown of our machinery or equipment at our manufacturing facilities may entail significant repair and maintenance costs and cause delays in our operations. If we are forced to shut down our manufacturing facility for a significant period of time, it would have a material adverse effect on our earnings, our results of operations and our financial condition as a whole. As such we have not faced any such instances till date.

We may also experience loss of, or a decrease in, revenue due to lower manufacturing levels. Our installed capacity at our manufacturing facility in Dahej, Gujarat for Financial Year 2022, 2021 and 2020, was 28800 MT, 13200 MT and 12000 MT, respectively, of the installed capacity at Dahej Facility in Gujarat, 39.90%, 56.97% and 63.45% capacity was utilised for Financial Year 2022, 2021 and 2020, respectively. For details, see heading "Capacity and Capacity Utilization" under chapter titled as "Business Overview" starting from on page 98. In addition, we may be required to shut down our manufacturing facilities for various reasons such as maintenance, inspection, testing and capacity

expansion. Further, the capacity utilization at our manufacturing facilities is subject to various factors such as availability of raw materials, power, water, efficient working of machinery and equipment and optimal manufacturing planning.

Both our Manufacturing Facility and Registered Office Facility are located in the State of Gujarat. In the event there are any disruptions at our manufacturing facilities, due to natural or man-made disasters, workforce disruptions, regulatory approval delays, fire, failure of machinery, lack of access to assured supply of electrical power and water at reasonable costs or any significant social, political or economic disturbances, could reduce our ability to meet the conditions of our contracts, manufacture our products and adversely affect sales and revenues from operations in such period. Although we have not faced any such instances till the date of this Red Herring Prospectus.

In addition, any loss due to fire or industrial accident, any shutdown of our manufacturing facility could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. An inability to utilize our manufacturing facility to its full or optimal capacity, non-utilization of such capacities could have an adverse effect on our results of operations, cash flows and financial condition.

6. *We are subject to the restrictive covenants of banks in respect of the Loan/Credit Limit and other banking facilities availed from them.*

We have entered into agreements for availing debt facilities from lenders. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. In the event we breach any financial or other covenants contained in certain of our financing arrangements, we may be required under the terms of such financing arrangements to immediately repay our borrowings either in whole or in part, together with any related costs. This may adversely impact our results of operations and cash flows.

7. *We are subject to strict quality requirements, regular inspections and audits, and the success and wide acceptability of our products is largely dependent upon our quality controls and standards.*

Our products have end uses in mainly Pharma, Agro Speciality chemical, dyestuff, textile auxiliaries, Plastic Additives, pigment. Given the nature of our products, adherence to quality standards is a critical factor in our manufacturing process. Our customers maintain strict quality standards that includes strict qualification and certification procedures. Our products go through various quality checks at various stages at our manufacturing facilities. While we have quality control systems in place, there can be no assurance that such quality controls may not be subject to failure. Failure of our products to meet the quality standards expected by our customers may result in rejection and reworking of our products. Any manufacturing or quality control problems may subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations, financial condition and cash flows. The Company operates in an industry which is heavily regulated. Since we supply our products to customers having global markets, our manufacturing facilities and products may be subjected to audit and inspection by Indian and overseas regulatory agencies. While historically, we have not received any notices pursuant to any inspection or audit undertaken by the Indian or the overseas regulatory agencies, going forward if we are not in compliance with any of their requirements, our facilities and products may be the subject of a warning letter or sanctions or any other action from regulatory authorities, which could result in the withholding of product approval and the shut-down of our facilities.

Further, any failure to make timely deliveries of products in the desired quantity as per our customers' requirements could also result in the cancellation of orders placed by our customers and may adversely affect our reputation and goodwill. Our manufacturing facility is also subject to periodic audits by our customers. This may involve inspection of the manufacturing facility, review of the manufacturing processes, review of the raw materials, review of our financial capabilities, technical review of the specification of the proposed product, review of our logistical capabilities, and reviews of our product. The product delivered by us is further subject to laboratory validation by certain customers. In the event our products do not comply with the specifications provided by the customer or in the event of a product recall, our supplies may be rejected, which may in turn result in a materially adverse impact on our business, financial conditions and results of operations.

8. *Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.*

The success of our operations depends on a variety of factors, including our ability to source raw materials at competitive prices. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including demand and supply, general economic and political conditions, transportation and labour costs, natural disasters, pandemic, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use. We seek to source our raw materials from reputed suppliers and

typically seek quotations from multiple suppliers. We typically do not enter into long-term agreements with our suppliers. We may be required to track the supply demand dynamics and regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices or foreign currency fluctuations.

Further, any increase in raw material prices may result in corresponding increases in our product costs. Our ability to pass on any increases in the costs of raw materials and other inputs to our customers may be limited. There may be a significant difference in the price of raw materials when raw materials are ordered and paid for and the prevailing price when the raw materials are received and we may not be able to pass on the difference in the prices to our customers. A failure to maintain our required supply of raw materials, and any inability on our part to find alternate sources for the procurement of such raw materials, on acceptable terms, could adversely affect our ability to deliver our products to our customers in an efficient, reliable and timely manner, and consequently adversely affect our business, results of operations and financial conditions.

- 9. *We do not have long-term agreements with our suppliers or customers and the loss of one or more of them or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows. Further, our inability to accurately forecast demand for our products or manage our inventory or working capital requirements may have an adverse effect on our business, results of operations and financial condition.***

At present, the primary raw materials used for our manufacturing process are yellow phosphorous, Chlorine, Oxygen and Molten Sulphur. We typically do not enter into long-term supply contracts with any of our suppliers with respect to our raw material requirements and typically place orders with them in advance of our anticipated requirements. We believe that efficient inventory management is a key component of the success of our business, results of operations and profitability and to that end we maintain a reasonable level of inventory of raw materials, work in progress and finished goods at our manufacturing facility. While we forecast the demand and price for our products and accordingly, plan our production volumes, any error in our forecast due to inter alia the international scale of our operations and demand for our products, could result in a reduction in our profit margins and surplus stock, which may result in additional storage cost and such surplus stock may not be sold in a timely manner, or at all.

We typically do not enter into long-term agreements with customers, our relationship with our customers is generally on a non-exclusive basis and accordingly, our customers may choose to cease sourcing our products and choose to source alternative options. Therefore, we cannot assure that we will receive repeat orders from our customers in the future. Additionally, our customers have high and stringent standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers' expectations and specifications could result in the cancellation or non-renewal of contracts.

There are also a number of factors, other than our performance, that could cause the loss of a customer such as, (a) increase in prices of raw materials and other input costs; (b) changes in consumer preferences; (c) changes in governmental or regulatory policy, etc. Any of these factors may have an adverse effect on our business, results of operations and financial condition. Further, absence of any contractual exclusivity with respect to our business arrangements with such customers poses a threat on our ability to be able to continue to supply our products to such customers in the future. If we overestimate demand, we may incur costs to purchase more raw materials and manufacture more products than required. Accordingly, we face the risk that our customers might not place any order or might place orders of lesser than expected size or may even cancel existing orders or make change in their policies which may result in reduced quantities being manufactured by us. Cancellations, reductions or instructions to delay production (thereby delaying delivery of products manufactured by us) by a significant customer could adversely affect our results of operations by reducing our sales volume, as well as by possibly causing delay in our customers' paying us for the order placed for purchasing the inventory with us which we would have manufactured for them. We may not find any customers or purchasers for the surplus or excess capacity in which case we would be forced to incur a loss.

In addition, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. If we underestimate demand, we may manufacture fewer quantities of products than required, which could result in the loss of business. We may fail to maintain the requisite inventory, which may adversely impact our ability to deliver products to customers in a timely manner which may lead to loss of revenues or customers. Our inability to accurately forecast demand for our products and manage our inventory may have an adverse effect on our business, results of operations and financial condition.

- 10. *Our operations depend on the availability of timely and cost-efficient transportation and other logistic facilities and any prolonged disruption may adversely affect our business, results of operations, cash flows and financial conditions.***

Our operations are dependent on the timely transport of raw materials to our manufacturing facilities and of our products to our customers. Although we have two road tankers for supply our finished goods, we use a combination of land and water transport and typically rely on third party transportation providers for such purposes, which are subject to various bottlenecks and other hazards beyond our control, including customs, weather, strikes or civil disruptions. We may experience disruption in the transportation of raw materials by ship and delivery of the products to our customers due to bad weather conditions. Further, unexpected delays due to delays in obtaining customs clearance for raw materials imported by us or products exported by us, or increases in transportation costs, could significantly decrease our ability to make sales and earn profits. Any failure to deliver our products to our customers in an efficient, reliable and timely manner could have an adverse effect on our business, results of operations, cash flows and financial conditions.

- 11. *Our profitability largely depends upon the global prices of our products and on the pricing pressure resulting from competition with other players in the market. There is no assurance that the prices may sustain or further increase in the future. Any significant fall in global prices of our products may have a material adverse effect on our business, results of operations and financial condition.***

Our ability to maintain as well as expand our international operations is dependent on us providing our products at prices competitive with international as well as local manufacturers. Since we currently manufacture all our products at our manufacturing facility at Dahej Gujarat, we may be unable to provide the products at competitive prices as against suppliers which are able to implement more cost – effective distribution models and other local suppliers in such foreign markets. Accordingly, we may be more exposed to the volatility to the global prices of our products as against competitors whose manufacturing operations are less centralised. There is no assurance that the prices of our products may sustain or further increase in the future. Any significant fall in prices of our products may have a material adverse effect on our business, results of operations and financial condition.

- 12. *Non-compliance with increasingly stringent safety, health, environmental and labour laws and other applicable regulations, may adversely affect our business, results of operations, cash flows and financial condition. Further, we may not be able to renew or maintain our statutory and regulatory permits and approvals required to operate our business.***

Our production process is hazardous therefore, we are subject to various laws and government regulations, including in relation to safety, health, environmental protection and labour. These laws and regulations impose controls on air and water discharge, storage, transport, handling, disposal, employee exposure to hazardous substances and other aspects of our manufacturing operations. Improper handling or storage of these materials could result in accidents, injure our personnel, property and damage the environment. We obtain the requisite registrations and approvals from time to time and aim to prevent such hazards by training our personnel and employing other prescribed safety measures. The occurrence of any such event in the future could have an adverse effect on our business, results of operations, cash flows and financial condition.

In addition, environmental laws and regulations in India have increasingly become more stringent. The increased concerns regarding the safe use of chemicals in commerce and their potential impact on the environment has resulted in more restrictive and stringent regulations. The scope and extent of the new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations, cash flows and prospects.

We are also subject to the laws and regulations governing employees, including in relation to minimum wage and maximum working hours, overtime, working conditions, maternity leave, hiring and termination of employees, contract labour and work permits. Additionally, the government or the relevant regulatory bodies may require us to shut down our manufacturing facility which in turn could lead to product shortages that delay or prevent us from fulfilling our obligations to customers. If we fail to maintain safe work sites or violate applicable laws, it could expose us to civil and criminal liabilities and harm our reputation, any of which could have a material adverse effect on our business, financial condition and results of operations. We have incurred and expect to continue incurring costs for compliance with such laws and regulations. We have also made and expect to continue making capital expenditures on an on-going basis to comply with all applicable environmental, health and safety and labour laws and regulations. These laws and regulations have, however, become increasingly stringent and it is possible that they will become significantly more stringent in the future. If we are unable to remain in compliance with all applicable environmental, health and safety and labour laws, our business, results of operations, cash flows and financial condition may be adversely affected.

- 13. *Our business is working capital intensive. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business and results of operations.***

Our business requires significant amount of working capital primarily as a considerable amount of time passes between purchase raw materials and sale of our finished products and the subsequent collection process from our customers. As a result, we are required to maintain sufficient stock at all times in order to meet manufacturing requirements, thus increasing our storage and working capital requirements. Consequently, there could be situations where the total funds available may not be sufficient to fulfil our commitments, and hence we may need to incur additional indebtedness in the future or utilize internal accruals to satisfy our working capital needs. Our future success depends on our ability to continue to secure and successfully manage sufficient amounts of working capital. Further, our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner.

Our working capital requirement for Previous three Financial Years on restated basis was as follows;

As we pursue our growth plan, we may be required to raise additional funds by incurring further indebtedness or issuing additional equity to meet our capital expenditures in the future. If we experience insufficient cash flows or are unable to borrow funds on a timely basis or raise additional equity in a timely manner, or, at all, to meet our working capital and other requirements, or to pay our debts, it could materially and adversely affect our business and results of operations. Management of our working capital requirements involves the timely payment of, or rolling over of, our short-term indebtedness and securing new and additional loans on acceptable terms, or re-negotiation of our payment terms for, our trade payables, collection of trade receivables and preparing and following accurate and feasible budgets for our business operations. If we are unable to manage our working capital requirements, our business, results of operations, financial condition, and cash flows could be materially and adversely affected. There can be no assurance that we will be able to effectively manage our working capital. Should we fail to effectively implement sufficient internal control procedures and management systems to manage our working capital and other sources of financing, we may have insufficient capital to maintain and grow our business, and we may breach the terms of our financing agreements with banks, face claims under cross-default provisions and be unable to obtain new financing, any of which would have a material adverse effect on our business, results of operations, financial condition, and cash flows.

14. Our inability to manage the expansion of our products range and manufacturing capacities and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition.

Our inability to manage the expansion of our products range and manufacturing capacities and execute our growth strategy in a timely manner or within budget estimates, or our inability to meet the expectations to track the changing

preferences of our customers or other stakeholders could have an adverse effect on our business, results of operations and financial condition. We intend to continue expansion of our product range and manufacturing capacities to pursue existing and potential market opportunities. For details, see “*Business Overview*” on page 98. Our future prospects will depend on our ability to grow our business and operations, which could be affected by many factors, including our ability to introduce and innovate new products and maintain the quality of our products, general political and economic conditions in the geographies in which we operate, government policies or strategies in respect of specific industries, prevailing interest rates, price of equipment and raw materials, energy supply and currency exchange rates.

15. There may be potential conflicts of interest if our Promoters, Promoters’ Group or Directors are involved in same business activities that compete with or are in the same line of activity as our business operations.

Our Group Company/entity and our subsidiary company are involved in similar line of Business that is being carried out by our Company. Also our Company has entered into various transactions with our Group Companies, companies and will continue to do in future. For detailed information for our transaction with group Companies, companies please refer to Annexure - J of Restated financial Statement beginning on page no. 164 respectively of this Red Herring Prospectus. Further, we have not entered into any non-compete agreement with our said entity. We cannot assure you that our Promoters, Promoter’s Group or Directors who have common interest in said entities may not favor the interest of the said entity. Any such present and future conflicts could have a material effect on our reputation, business, results of operations and financial condition which may affect our profitability and results of operations.

16. Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations.

Our business operations require us to obtain and renew, from time to time, certain approvals, licenses, registrations and permits under central, state and local government rules in India, generally for carrying out our business and for our manufacturing facilities. A majority of these approvals are granted for a limited duration. While we are required to obtain a number of approvals for legally conducting our business operations and we shall submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry on certain operations of our business, which may have an adverse effect on our business, financial condition and results of operations. For details, see “*Government and Other Approvals*” on page 179 of this Red Herring Prospectus.

Our company has applied for few government approvals which are yet to be approved and few approvals are in the name of erstwhile LLP viz. Vital Chemtech Limited Liability Partnership. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry operations of our business, which may have an adverse effect on our business, financial condition and results of operations. For details, see “*Government and Other Approvals*” on page 179 of this Red Herring Prospectus.

The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged noncompliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure by us to comply with the applicable regulations in the future, or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. In case we fail to comply with these requirements, or a regulator alleges non-compliance with these requirements, we may be subject to penalties and proceedings may be initiated against us.

The introduction of additional government control or newly implemented laws and regulations, depending on the nature and extent thereof and our ability to make corresponding adjustments, may adversely affect our business, results of operations and financial conditions. These laws and regulations and the way in which they are implemented and enforced may change from time to time and there can be no assurance that future legislative or regulatory changes will not have an adverse effect on our business, financial condition, cash flows and results of operations.

17. Our insurance coverage may not be sufficient or adequate to protect us against all material hazards or business losses, which may adversely affect our business, results of operations and financial condition.

Our operations are subject to hazards including inherent in chemical manufacturing facilities. Our principal types of coverage include property fire policy, stock fire policy, Public Liability Insurance, anti-burglary policy, accident policy. We could be held liable for accidents that occur at our manufacturing facilities or otherwise arising out of our operations. In the event of personal injuries, fires or other accidents suffered by our employees or other people, we could face claims alleging that we were negligent, provided inadequate supervision or be otherwise liable for the injuries.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, to the extent that we suffer loss or damage, for which we have not obtained or maintained insurance, or which is not covered by insurance, which exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations and financial condition could be adversely affected. In addition, our insurance policies expire from time to time and we may not be able to renew our policies in a timely manner, or at acceptable cost.

We cannot assure you that, in the future, any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Further, an insurance claim once made could lead to an increase in our insurance premium, result in higher deductibles and also require us to spend towards addressing certain covenants specified by the insurance companies.

18. Any defaults or delay in payment by a significant portion of our customers, may have an adverse effect on our cash flows, results of operations and financial condition.

Credit risk is the risk of financial loss to our Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. In the ordinary course of business, we provide our customers with certain credit periods as part of our payment terms. Our results of operations and profitability depends on the credit worthiness of our customers. We cannot assure that these customers will always be able to pay us in a timely manner, or at all. Further, any increase in our receivable turnover days or write-offs will negatively affect our business. Any default or delays in payment of receivables by our customers may have adverse effect on cash flows, results of operations and financial condition.

19. We face foreign exchange risks that could adversely affect our results of operations and cash flows.

We are exposed to foreign currency fluctuation risk. We may from time to time be required to make provisions for foreign exchange differences in accordance with accounting standards. we from time to time avail forward cover to minimise the foreign exchange related risks, we may experience foreign exchange losses and gains in respect of transactions denominated in foreign currencies. While we selectively enter into hedging transactions to minimize our foreign currency exchange risks, there can be no assurance that such measures will enable us to manage our foreign currency risks. For further details please refer to chapter titled as “Restated Financial Statement” on page 164 of this Red Herring Prospectus.

In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows. Any such losses on account of foreign exchange fluctuations may adversely affect our results of operations and cash flows. Certain markets in which we sell our products may be subject to foreign exchange repatriation and exchange control risks, which may result in either delayed recovery or even non-realization of revenue.

Such disruptions may adversely affect our business and results of operations and may also divert the management’s attention and result in increased costs. The size and complexity of our computer systems make them potentially vulnerable to breakdown, malicious intrusion and computer viruses. Any such disruption may result in the loss of key information and disrupt our operations. In addition, our systems are potentially vulnerable to data security breaches, whether by employees or others that may expose sensitive data to unauthorized persons. Such data security breaches could lead to the loss of trade secrets or other intellectual property, or could lead to the public exposure of personal information (including sensitive personal information) of our employees, customers and others. 27. *Changes in technology may affect our business by making our equipment or products less competitive or obsolete.*

Our future success will depend in part on our ability to respond to technological advances and emerging chemical Industry standards and practices on a cost-effective and timely basis. Changes in technology and product preferences may make newer chemical units or equipment more competitive than ours or may require us to make additional capital expenditures to upgrade our facilities. If we are unable to adapt in a timely manner to changing market conditions, customer requirements or technological changes, our business, financial performance and the trading price of our Equity Shares could be adversely affected.

28. *Our Object has not been appraised by any Bank or Financial Institution. Any significant deviation in the Object could adversely impact our operations and sustainability in absence of any independent monitoring agency.*

In the event that we are unable to successfully defend such challenges or objections, we may be unsuccessful in obtaining the registration of our trademarks. Additionally, the use of trade names or trademarks by third parties which are similar to our trade names or trademarks may result in confusion among customers and loss of business and loss of business to our company and ultimately effecting financial conditions of our company.

Our ability to market and sell our services depends upon the recognition of our brand names and associated consumer Goodwill. Consequently, we do not enjoy the statutory protections accorded to registered trademarks in India for the corporate name and logo of our company, which are currently pending. We may be susceptible to claims from third parties asserting infringement and other related claims relating to trademarks. Any such claim could adversely affect our relationship with existing or potential customers, result in costly litigation and divert management’s attention and resources. Our Promoters have provided their personal guaranties in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked by Promoters, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities.

We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

As of April 30, 2022, we have ₹ 3559.52 Lakhs of outstanding debt as per restated financials of the Company.

Our level of indebtedness has important consequences to us, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

As a result, our Promoters and Promoters group will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Our Promoters and Promoters group will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters and Promoters group could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoters group, or the perception that such sales may occur may significantly affect the trading price

of the Equity Shares. Except as disclosed in “*Capital Structure*” on page no. 60 of this Red Herring Prospectus, we cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

36. *Our Company has a negative cash flow in its operating activities in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business*

Our Company has incurred negative cash flows from our operating activities as well as investing activities during our operating history as per the Restated Financial Information and the same are summarized as under:

(₹ In Lakhs)

Particulars	For period ended April 30, 2022	For period ended on March 31, 2022	For Period ended November 24, 2021	For year ended on March 31, 2021	For year ended on March 31, 2020
Net Cash Generated from Operating Activities	911.42	(1,341.45)	1,061.91	609.73	365.07

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

37. *We may require additional financing for our business operations and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow and our future profitability. Further, fluctuations in interest rates could adversely affect our results of operations.*

We may require additional capital for our business operations. Our ability to obtain additional financing on favourable terms, if at all, will depend on a number of factors including our financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, security, our track record of compliance of the covenants contained in our financial agreements, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate. We cannot assure that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or obtain additional financing on acceptable terms and in a timely manner could adversely impact our ability to incur capital expenditure, our business, results of operations and financial condition.

Further, an increase in the interest rates on our existing or future debt will increase the cost of servicing such debt. An increase in interest expense may have an adverse effect on our business prospects, financial condition and results of operations.

For further details regarding our business refer chapter titled “*Business Overview*” on page 98 of this Red Herring Prospectus.

38. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof.

Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

39. *In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoters and Directors; they are interested to the extent of their shareholding and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities.*

reimbursement of expenses. Our Promoters and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If the transactions are executed not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years, please refer to the Chapter titled "Restated Financial Information" beginning on page 164 of the Red Herring Prospectus.

40. *Our success largely depends on our Board and Key Managerial Personnel and our ability to attract and retain them. Any loss of our director and key managerial personnel could adversely affect our business, operations and financial condition*

We depend significantly on the expertise, experience and continued efforts of our Directors Mr. Vipul Jatashanker Bhatt, Mrs. Sangeeta Vipul Bhatt and Mr. Jay Vipul Bhatt and our other key managerial personnel. If one or more members of our Board or key managerial personnel are unable or unwilling to continue in his / her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract / retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition. For further details on the Management of our Company please refer to the chapter titled "Our Management" beginning on page 137 of this Red Herring Prospectus.

41. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the issue. Further we have not identified any alternate source of financing the "Objects of the Issue". Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the issue. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details please refer to the chapter titled "Objects of the Issue" beginning on page no 77 of this Red Herring Prospectus.

42. *Certain information contained in this Red Herring Prospectus is based on management estimates and we cannot assure you of the completeness or accuracy of the data.*

Certain information contained in this Red Herring Prospectus like our funding requirements including proposed working capital requirement assessment and our proposed use of issue proceeds is based solely on management estimates. The estimated project dates as well as costs may change depending on the circumstances like changes in laws and regulations, competition, irregularities or claims with respect to title of land, the ability of third parties to complete their services, delays, cost overruns or modifications to our ongoing and planned projects. Such circumstances can have an impact on our financial condition and results of operation.

43. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section "Objects of the Issue" on page no. 77 of the Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue this may affect our revenues and results of operations.

44. *Any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards working capital requirement of our Company and general corporate purposes. For further details of the proposed objects of the Issue, see "Objects of the Issue" on page 77. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Red Herring Prospectus without

obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Company, if applicable, would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the issue, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters, if applicable, to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company.

Further, we cannot assure you that the Company, will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the issue to use any unutilized proceeds of the Fresh Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of the issue Proceeds, if any, which may adversely affect our business and results of operations.

EXTERNAL RISK FACTORS

1. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

2. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page no. 137 of this Red Herring Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

3. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. Almost 100% of our Revenue is derived from business in India and a decrease in economic growth in India could cause our business to suffer.

At present, we derive almost 100% of our revenue from operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the Steel industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

6. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. Our Company has appointed Beeline Capital Advisors Private Limited as BRLM and also appointed Sunflower Broking Private Limited as Designated Market

Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

7. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

8. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares is ₹ [●]/- This price is based on numerous factors (For further information, please refer chapter titled "Basis for Issue Price" beginning on page no. 84 of this Red Herring Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation the following;

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

9. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include various taxes introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

10. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Our borrowing costs and our access to the debt capital markets depend significantly on the credit ratings of India. Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. Such events may adversely affect our business and results of operations as well as the trading price of the Equity Shares.

11. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including with regard to labour, foreign investment, stamp duty, customs duty and anti-dumping duty governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the application, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our businesses in the future.

12. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportional rate in order to pass costs on to our clients thereby reducing our margins.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our clients, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase the price of our products to pass the increase in costs on to our clients. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

13. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Foreign ownership of Indian securities is subject to Government regulation. Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions), if they comply with the pricing and reporting requirements specified by the RBI. If a transfer of shares is not in compliance with such requirements and does not fall under any of the exceptions specified by the RBI, then the RBI's prior approval is required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. As provided in the foreign exchange controls currently in effect in India, the RBI has provided that the price at which the Equity Shares are transferred be calculated in accordance with internationally accepted pricing methodology for the valuation of shares at an arm's length basis, and a higher (or lower, as applicable) price per share may not be permitted. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the Consolidated FDI Policy and the FEMA Rules. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular term or at all. For further details, see "Restrictions on Foreign Ownership of Indian Securities" on page 237.

Additionally, the Indian government may impose foreign exchange restrictions in certain emergency situations, including situations where there are sudden fluctuations in interest rates or exchange rates, where the Indian government experiences extreme difficulty in stabilizing the balance of payments or where there are substantial disturbances in the financial and capital markets in India. These restrictions may require foreign investors to obtain the Indian government's approval before acquiring Indian securities or repatriating the interest or dividends from those securities or the proceeds from the sale of those securities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

14. *After the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.*

An active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares shall be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares

or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

15. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax (“STT”) is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of equity shares held for more than 12 months, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020 has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend.

Further, the Finance Act, 2022, which received the assent of the President of India on March 30, 2022, has, among others things, provided a number of amendments to the direct and indirect tax regime. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. There is no certainty on the impact that the Finance Act, 2022 may have on our business and operations or in the industry we operate in.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. In cases where the seller is a non-resident, capital gains arising from the sale of the equity shares will be partially or wholly exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Historically, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the equity shares.

Further, we cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, financial condition, results of operations and cash flows.

16. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the compliance requirement or the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management’s attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

17. *Any future issuance of Equity Shares, or stock options, or convertible securities or other equity-linked securities by us may dilute your shareholding and adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, or stock options, or convertible securities or securities linked to the Equity Shares by us, including through exercise of employee stock options may dilute your shareholding in our Company, and adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters or Promoters Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares.

18. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise or withdraw their Bids during the Bid/Offer Period. While our Company is required to complete Allotment pursuant to the Issue within such period as may be prescribed under applicable law, events affecting the Bidders' decision to invest in the Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Issue or cause the trading price of the Equity Shares to decline on listing.

19. *Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

The Equity Shares will be listed on the Stock Exchanges. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. After the Basis of Allotment is approved by the Designated Stock Exchange, the Company undertakes the Allotment and the demat account of the Allottees with depository participants in India are credited with the Equity Shares. The Allotment of Equity Shares in this Issue, the credit of such Equity Shares to the applicant's demat account with depository participant and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchanges is expected to complete within six working days of the Bid Closing Date (or such other period as prescribed under applicable laws). There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods as specified herein. We could also be required to pay interest at the applicable rates if allotment is not made, unblocking intimation/ refund intimation, as applicable are not dispatched or demat credits are not made to investors within the prescribed time periods.

20. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India and other countries where our suppliers and customers are located. There have been multiple waves of infections that have impacted certain countries, with India most recently experienced a third wave of infections that significantly increased the number of persons impacted by COVID-19. Since March 2021, there was a significant resurgence in the daily number of new COVID-19 cases and resulting deaths and the GoI and State governments in India re-imposed lockdowns and other more restrictive measures in an effort to stop the resurgence of new infections. These have all contributed to negative economic impact on the Indian economy and consequently our business and operations. It is possible that the COVID-19 pandemic will continue to cause a prolonged global economic crisis or recession.

The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities had reacted by taking measures, including in the regions in which we operate, such as prohibiting people from assembling in heavily populated areas, instituting quarantines, restricting travel, issuing lockdown orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a "notified disaster" for the purposes of the Disaster Management Act, 2005 and imposed a nationwide lockdown from March 25, 2020. The nationwide lockdown lasted until May 31, 2020, and has since been extended periodically in varying degrees by state governments and local administrations. The lifting of the lockdowns across various regions had been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Similarly, we resumed our business activities on a gradual basis in line with the prevailing guidelines issued by the governmental authorities at that time.

From March 2021 onwards, due to a “second wave” of increases in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. We have monitored and are monitoring the situation closely and are operating our activities with the required workforce as permitted by governmental authorities. Additionally, towards the end of calendar year 2021, World Health Organisation designated Omicron, a variant that causes COVID – 19, of a great concern. As a result of the detection of new mutated strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, it is anticipated that we may be subject to further reinstatements of lockdown protocols or other restrictions, and the COVID-19 pandemic may continue to affect our business, results of operations and financial condition, in the future, in a number of ways such as:

- complete or partial closure of, or disruptions or restrictions on our ability to conduct, our manufacturing operations.
- our ability to travel, interact with potential customers, pursue partnerships and other business transactions.
- our inability to source key raw materials as a result of the temporary or permanent closure of the facilities of suppliers of our key raw materials;
- a portion of our workforce being unable to work, including because of travel or government restrictions in connection with COVID-19, including stay at home order, which could result in a slowdown in our operations.
- Our proposed products becoming delayed;
- Our inability to access debt and equity capital on acceptable terms, or at all;
- delays in orders or delivery of orders, which may negatively impact our cash conversion cycle and ability to convert our backlog into cash;
- inability to collect full or partial payments from customers due to deterioration in customer liquidity;
- uncertainty as to what conditions must be satisfied before government authorities completely lift lockdown orders;
- the potential negative impact on the health of our employees, particularly if a significant number of them are afflicted by
- COVID-19, could result in a deterioration in our ability to ensure business continuity during this disruption; and disruptions in supply chain leading to higher prices in raw material, impacting our profitability.

Further, our insurance policies may not provide adequate coverage in circumstances, such as the COVID-19 pandemic. For further details, please see “*Business Overview*” on page 98. For further details, please see “*Restated Financial Information*” on page 164. Any intensification or escalation of the COVID-19 pandemic of the Omicron variant or any future outbreak of another highly infectious or contagious disease may adversely affect our business, financial condition and results of operations. In addition, we generate a major part of our revenue through our operations in India. The effects of COVID-19 in India may be of a greater magnitude, scope and duration than those experienced to date in other countries. Further, as COVID-19 adversely affects our business and results of operations, it may also have the effect of exacerbating many of the other risks described in this “Risk Factors” section.

For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

GLOBAL OUTLOOK

Following more than two years of pandemic, spillovers from the Russian Federation’s invasion of Ukraine are set to sharply hasten the deceleration of global economic activity, which is now expected to slow to 2.9 percent in 2022. The war in Ukraine is leading to high commodity prices, adding to supply disruptions, increasing food insecurity and poverty, exacerbating inflation, contributing to tighter financial conditions, magnifying financial vulnerability, and heightening policy uncertainty. Growth in emerging market and developing economies (EMDEs) this year has been downgraded to 3.4 percent, as negative spillovers from the invasion of Ukraine more than offset any near-term boost to some commodity exporters from higher energy prices. Despite the negative shock to global activity in 2022, there is essentially no rebound projected next year: global growth is forecast to edge up only slightly to a still-subdued 3 percent in 2023, as many headwinds—in particular, high commodity prices and continued monetary tightening—are expected to persist. Moreover, the outlook is subject to various downside risks, including intensifying geopolitical tensions, growing stagflationary headwinds, rising financial instability, continuing supply strains, and worsening food insecurity.

These risks underscore the importance of a forceful policy response. The global community needs to ramp up efforts to mitigate humanitarian crises caused by the war in Ukraine and conflict elsewhere and alleviate food insecurity, as well as expand vaccine access to ensure a durable end of the pandemic. Meanwhile, EMDE policy makers need to refrain from implementing export restrictions or price controls, which could end up magnifying the increase in commodity prices. With rising inflation, tightening financial conditions, and elevated debt levels sharply limiting policy space, spending can be reprioritized toward targeted relief for vulnerable households. Over the long run, policies will be required to reverse the damage inflicted by the dual shocks of the pandemic and the war on growth prospects, including preventing fragmentation in trade networks, improving education, and raising labor force participation.

Russia’s invasion of Ukraine is affecting EMDE regions to different degrees via impacts on global trade and output, commodity prices, inflation, and interest rates. The adverse spillovers from the war will be most severe for Europe and Central Asia, where output is forecast to sharply contract this year. Output growth is projected to slow this year in all other regions except the Middle East and North Africa, where the benefits of higher energy prices for energy exporters are expected to outweigh those prices’ negative impacts for other economies in the region. Risks for all EMDE regions are tilted to the downside and include intensifying geopolitical tensions, rising inflation and food shortages, financial stress and rising borrowing costs, renewed outbreaks of COVID-19, and disruptions from disasters.

Global inflation has risen sharply from its lows in mid-2020, on rebounding global demand, supply bottlenecks, and soaring food and energy prices, especially since Russia’s invasion of Ukraine. Markets expect inflation to peak in mid-2022 and then decline, but to remain elevated even after these shocks subside and monetary policies are

tightened further. Global growth has been moving in the opposite direction: it has declined sharply since the beginning of the year and, for the remainder of this decade, is expected to remain below the average of the 2010s. In light of

these developments, the risk of stagflation—a combination of high inflation and sluggish growth—has risen. The recovery from the stagflation of the 1970s required steep increases in interest rates by major advanced-economy central banks to quell inflation, which triggered a global recession and a string of financial crises in EMDEs. If current stagflationary pressures intensify, EMDEs would likely face severe challenges again because of their less well-anchored inflation expectations, elevated financial vulnerabilities, and weakening growth fundamentals. This makes it urgent for EMDEs to shore up their fiscal and external buffers, strengthen their monetary policy frameworks, and implement reforms to reinvigorate growth.

Russia’s invasion of Ukraine: Implications for energy markets and activity. Russia’s invasion of Ukraine has disrupted global energy markets and damaged the global economy. Compared with what took place in the 1970s, the shock has led to a surge in prices across a broader set of energy-related commodities. In energy-importing economies, higher prices will reduce real disposable incomes, raise production costs, tighten financial conditions, and constrain policy space. Some energy exporters may benefit from improved terms of trade and higher commodities production. However, on net, model-based estimates suggest that the war-driven surge in energy prices could reduce global output by 0.8 percent after two

years. The experience of previous oil price shocks has shown that these shocks can provide an important catalyst for policies to encourage demand reduction, substitution to other fuels, and development of new sources of energy supply.

GLOBAL TRADE

Goods trade slowed in the first half of 2022 as supply chains continued to be affected by the lingering effects of the pandemic, including disruptions in major Asian ports and lockdowns in key cities in China. In addition, Russia's invasion of Ukraine and its repercussions have led to severe physical and logistical dislocations that have magnified pre-existing bottlenecks.

Russia and Ukraine account for a small share—under 3 percent—of global exports. However, many global industries rely on supplies of key commodities produced in the two countries, especially in Russia. Shortages and unprecedented increases in the prices of these inputs have rippled through global value chains (GVCs), leading to production standstills and elevated producer prices. At the same time, transport costs have increased, including in the wake of the war in

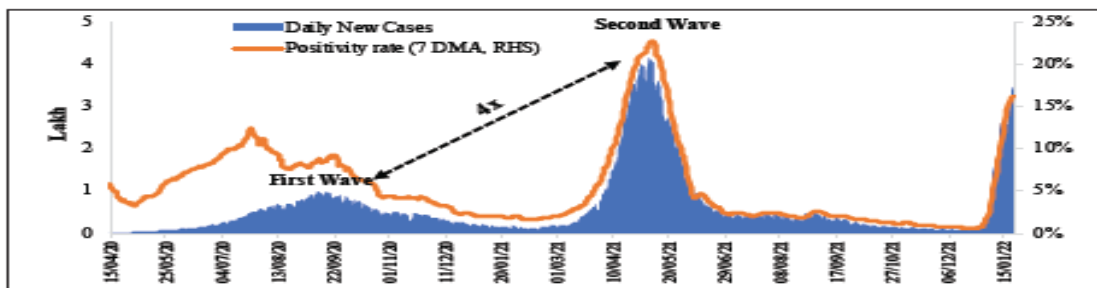

Ukraine. Navigation and trade in the Black Sea have been materially disrupted, negatively affecting the transport of food and crude oil. Cargos and shipments held at Russian and Ukrainian ports have been rerouted through longer and more expensive routes.

Services trade has regained its pre-pandemic level, driven by a rebound in non-tourism services. While tourism activity has started to recover in advanced economies with high vaccination levels, it remains generally subdued in EMDEs, especially in tourism-reliant countries and in small states. The invasion is also weighing on tourism activity in countries that rely on tourists from Russia and Ukraine.

Global trade growth is anticipated to slow to 4 percent in 2022 as the war in Ukraine further disrupts global value chains, global activity gradually shifts back toward the less tradeintensive services sector, and international mobility moves toward pre-pandemic levels only gradually. This is a substantial downward revision relative to previous forecasts, largely because of higher transport costs and significant global value chain disruptions associated with the war. Global trade growth is expected to moderate to an average of 4.1 percent in 2023-24 as global demand for tradable goods continues to decelerate.

INDIAN ECONOMY

Introduction

Two years into the COVID-19 pandemic, the global economy continues to be plagued by uncertainty, with resurgent waves of mutant variants, supply-chain disruptions, and a return of inflation in both advanced and emerging economies. Moreover, the likely withdrawal of liquidity by major central banks over the next year may also make global capital flows more volatile. In this context, it is important to evaluate both the pace of growth revival in India as well as the strength of macro-economic stability indicators. It is also essential to look at progress in vaccination as this is not just a health response but also a buffer against economic disruptions caused by repeated waves of the pandemic.

Economy recovers past Pre-Pandemic levels

The Indian economy, as seen in quarterly estimates of GDP, has been staging a sustained recovery since the second half of 2020-21. Although the second wave of the pandemic in April- June 2021 was more severe from a health perspective, the economic impact was muted compared to the national lockdown of the previous year. Advance estimates suggest that GDP will record an expansion of 9.2 per cent in 2021-22. This implies that the level of real economic output will surpass the pre-COVID level of 2019-20.

In contrast to the steady performance of the primary sector, the industrial sector went through a big swing by first contracting by 7 per cent in 2020-21 and then expanding by 11.8per cent in this financial year. The manufacturing, construction and mining sub-sectors went through the same swing although the utilities segment experienced a more muted

cycle as basic services such as electricity and water supply were maintained even at the height of the national lockdown. The share of industry in GVA is now estimated at 28.2 per cent (Table 2).

Table 2: Share of Sectors in Nominal GVA (per cent)

Sectors	2019-20 (1st RE)	2020-21 (PE)	2021-22 (1st AE)

Industry	26.7	25.9	28.2

Since January 2021, the widely used Purchasing Managers' Index-Manufacturing has remained in the expansionary zone (i.e. over 50) except for one month when the second wave had slowed down economic activity (Figure 8). The Index of Industrial Production (IIP) and Core Industry indices have both followed a similar pattern and, in November 2021, went past their pre-pandemic level for the corresponding month in 2019 (Figure 7).

Figure 7: Industrial Output

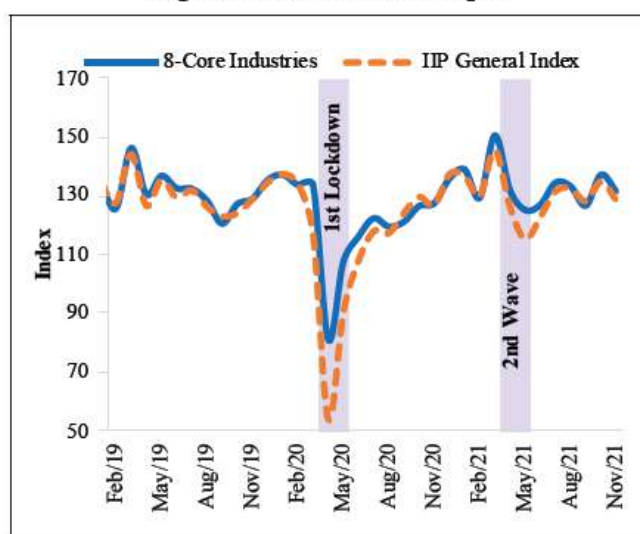

Figure 8: PMI Manufacturing

Services account for more than half of the Indian economy and was the most impacted by the COVID-19 related restrictions, especially for activities that need human contact. Although the overall sector first contracted by 8.4 per cent in 2020-21 and then is estimated to grow by 8.2 per cent in 2021-22, it should be noted that there is a wide dispersion of performance by different sub-sectors. Both the Finance/Real Estate and the Public Administration segments are now well above pre-COVID levels. However, segments like Travel, Trade and Hotels are yet to fully recover. It should be added that the stop-start nature of repeated pandemic waves makes it especially difficult for these sub-sectors to gather momentum.

Despite contact-sensitive services still being impacted by COVID, there has been a strong recovery of the Purchasing Managers' Index-Services since August 2021 (Figure 13). In this context, it is important to note the role of new forms of High Frequency Indicators to gauge real-time trends. For example, the Google mobility indicators for retail and recreation (i.e., restaurants, cafes, shopping centres, etc.) and transit stations (public transport hubs such as subway, bus, and train stations), measuring percentage deviation from pre-pandemic levels of mobility, has exceeded pre-pandemic levels in December 2021 before the Omicron wave again led to restrictions (Figure 12). Similarly, the hotel occupancy rate has recovered substantially, reaching 56-58 per cent in October 2021, from 30-32 per cent in April 2021 (Figure 14).

Figure 12: Trends in Mobility

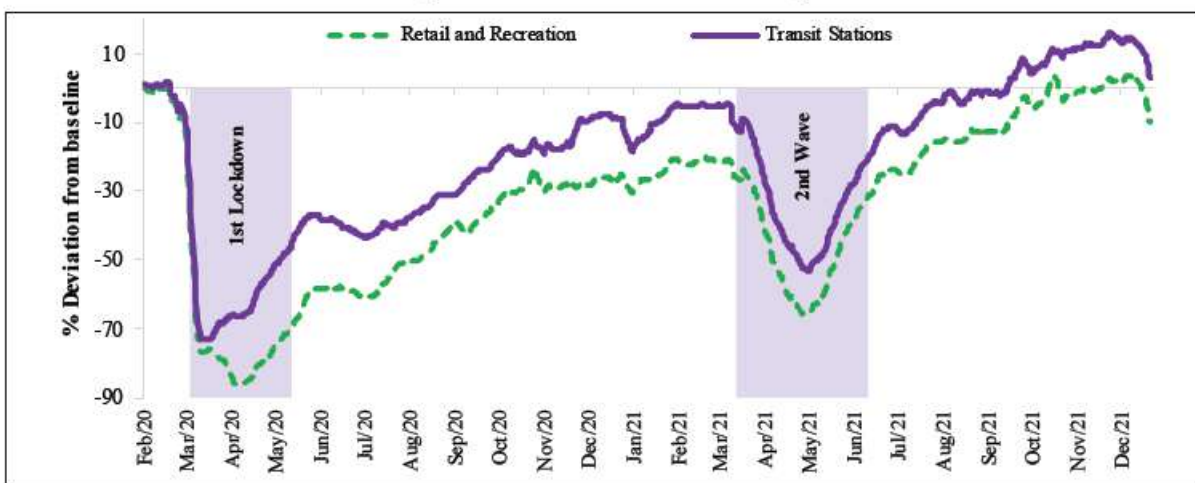

Figure 13: PMI Services

Figure 14: Hotel Occupancy Rate

Consumption

Total consumption is estimated to have grown by 7.0 per cent in 2021-22 with government consumption remaining the biggest contributor as in the previous year. Government consumption is estimated to grow by a strong 7.6 per cent surpassing pre-pandemic levels. Private consumption is also estimated to have improved significantly to recover 97 per cent of corresponding pre-pandemic output level. This is supported by a sharp rebound in HFIs like IIP Consumer Durables. However, the recent dip in vehicle registrations reflects persistent supply-side constraints owing to the shortage of semi-

conductor chips rather than lack of consumption demand. Further, RBI's consumer confidence survey results on both the present situation and future expectations suggest sustained uptick in consumer sentiments. Also indicative of uptick in consumer sentiments is the steep rise in digital transactions, notably in UPI payments owing to the pandemic induced shift to contactless payments. Private consumption is poised to see stronger recovery with rapid coverage in vaccination and faster normalisation of economic activity.

Investment

Investment, as measured by Gross Fixed Capital Formation (GFCF) is expected to see strong growth of 15 per cent in 2021-22 and achieve full recovery of pre-pandemic level. Government's policy thrust on quickening virtuous cycle of growth via capex and infrastructure spending has increased capital formation in the economy lifting the investment to GDP ratio to about 29.6 per cent in 2021-22, the highest in seven years.

While private investment recovery is still at a nascent stage, there are many signals which indicate that India is poised for stronger investment. The number of private investment projects under implementation in manufacturing sector has been rising over the years. Companies hitting record profits in recent quarters and mobilization of risk capital bode well for acceleration in private investment. A sturdy and cleaned-up banking sector stands ready to support private investment adequately. Expected increase in private consumption levels will propel capacity utilisation, thereby fuelling private investment activity. RBI's latest Industrial Outlook Survey results indicate rising optimism of investors and expansion in production in the upcoming quarters.

Exports and Imports

India's exports of both goods and services have been exceptionally strong so far in 2021-22. Merchandise exports have been above US\$ 30 billion for eight consecutive months in 2021-22, despite a rise in trade costs arising from global supply constraints such as fewer operational shipping vessels, exogenous events such as blockage of Suez Canal and COVID-19 outbreak in port city of China etc.. Concurrently, net services exports have also risen sharply, driven by professional and management consulting services, audio visual and related services, freight transport services, telecommunications, computer and information services. From a demand perspective, India's total exports are expected to grow by 16.5 per cent in 2021-22 surpassing pre-pandemic levels. Imports also recovered strongly with revival of domestic demand and continuous rise in price of imported crude and metals. Imports are expected to grow by 29.4 per cent in 2021-22 surpassing corresponding pre-pandemic levels.

Resultantly, India's net exports have turned negative in the first half of 2021-22, compared to a surplus in the corresponding period of 2020-21 with current account recording a modest deficit of 0.2 per cent of GDP in the first half (Figure 24). However, robust capital flows in the form of continued inflow of foreign investment were sufficient to finance the modest current account deficit. Elevated global commodity prices, revival in real economic activity driving higher domestic demand and growing uncertainty surrounding capital inflows may widen current account deficit further during the second half of the year. However, it is expected to be within manageable limits.

CHEMICAL SECTOR IN INDIA

INTRODUCTION

Covering more than 80,000 commercial products, India's chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers and fertilisers.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for ~16% of the world production of dyestuffs and dye intermediates. Indian colorants industry has emerged as a key player with a global market share of ~15%. The country's chemicals industry is de-licensed, except for few hazardous chemicals. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals.

India's proximity to the Middle East, the world's source of petrochemicals feedstock, enables it to benefit on economies of scale.

MARKETS SIZE

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 300 billion to India's GDP by 2025.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. Chemical production reached 903,002 MT in December 2021, while petrochemical production reached 1,877,907 MT. In December 2021, production levels of various chemicals were as follows: Soda Ash: 257,199 MT, Caustic Soda: 277,638 MT, Liquid Chlorine: 190,492 MT, Formaldehyde: 22,794 MT and Pesticides and Insecticides: 22,110 MT.

The specialty chemicals constitute 22% of the total chemicals and petrochemicals market in India. The demand for specialty chemicals is expected to rise at a 12% CAGR in 2019-22. Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India's share in the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the capex of specialty chemicals manufacturers in FY22 to Rs. 6,000-6,200 crore (US\$ 815-842 million). From April 2021 to February 2022, exports of organic & inorganic chemicals increased 33.75% YoY to reach US\$ 26.48 billion. Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

GOVERNMENT INITIATIVES

The government has started various initiatives such as mandating BIS-like certification for imported chemicals to prevent dumping of cheap and substandard chemicals into the country.

- A 2034 vision for the chemicals and petrochemicals sector has been set up by the government to explore opportunities to improve domestic production, reduce imports and attract investments in the sector. The

government plans to implement production-link incentive system with 10-20% output incentives for the agrochemical sector; to create an end-to-end manufacturing ecosystem through the growth of clusters.

- In October 2020, the government urged players in the agrochemicals industry to come out with new molecules of global standards for the farmers' benefit, while CropLife India, the industry body, pitched for stable policies and regulatory regimes to boost growth in the sector.
- 100% FDI is allowed under the automatic route in the chemicals sector with few exceptions that include hazardous chemicals. FDI inflows in the chemicals sector (other than fertilisers) reached US\$ 19.09 billion between April 2000 to December 2021.
- The government has proposed several incentives for setting up a sourcing or manufacturing platform within an Indian SEZ:
 - Effective April 1, 2020, 100% Income Tax exemption on export income for SEZ units for the first five years, 50% for the next five years thereafter and 50% of the ploughed back export profit for next five years.

The four PCPIRs are expected to generate employment for ~33.83 lakh people. ~3.50 lakh persons have been employed in direct and indirect activities related to PCPIRs by the end of 2020.

ROAD AHEAD

Despite the current pandemic situation, the Indian chemical industry has numerous opportunities considering the supply chain disruption in China and trade conflict among the US, Europe and China. Anti-pollution measures in China will also create opportunities for the Indian chemical industry in specific segments.

Additional support, in terms of fiscal incentives, such as tax breaks and special incentives through PCPIRs or SEZs to encourage downstream units will enhance production and development of the industry. The dedicated integrated manufacturing hubs under Petroleum, Chemicals and Petrochemicals Investment Regions (PCPIR) policy to attract an investment of Rs. 20 lakh crore (US\$ 276.46 billion) by 2035.

To bring about structural changes in the working of domestic chemical industry, future investments should not only focus on transportation of fuels such as petrol and diesel, but also on crude-to-chemicals complexes or refineries set up to cater to the production of chemicals.

Note: Conversion rate used for November 2021 is Rs. 1 = US\$ 0.01336

RECENT AND CONTINUING DEVELOPMENTS – COVID 19 PANDEMIC

In the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India and other countries where our suppliers and customers are located. There have been multiple waves of infections that have impacted certain countries, with India most recently experiencing a second wave of infections that significantly increased the number of persons impacted by COVID-19. Since March 2021, there was a significant resurgence in the daily number of new COVID-19 cases and resulting deaths and the GoI and State Governments in India re-imposed lockdowns and other more restrictive measures in an effort to stop the resurgence of new infections. From March 2021 onwards, due to a “second wave” of increases in the number of daily COVID-19 cases, several state governments in India re-imposed lockdowns, curfews and other restrictions to curb the spread of the virus. We have monitored and are monitoring the situation closely and is operating its activities with the required workforce as permitted by governmental authorities. Additionally, towards the end of calendar year 2021, World Health Organization designated Omicron, a variant that causes COVID – 19, of a great concern. As a result of the detection of new mutated strains and subsequent waves of COVID-19 infections in several states in India as well as throughout various parts of the world, it is anticipated that we may be subject to further reinstatements of lockdown protocols or other restrictions, and the COVID-19 pandemic may continue to affect our business, results of operations and financial condition. For example, our operations were temporarily shut down at our Manufacturing Facility from March 23, 2020 to March 26, 2022, our ability to travel, interact with potential customers, pursue partnerships and other business transactions was affected, our inability to source key raw materials as a result of the temporary or permanent closure of the facilities of suppliers of our key raw materials affected our business. Further, a portion of our workforce being unable to work, including because of travel or government restrictions in connection with COVID-19, including stay at home order. For further information on the impact of COVID-19 on our business and the risks associated with COVID-19 to our business, see “Risk Factors” beginning from on page 26.

The duty drawback scheme is an option available to exporters. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (the “Drawback Rules”) have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme.

The all industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all industry rate or duty drawback rate, or where the all industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. For goods having an all industry rate, the brand rate facility to particular exporters is available only if it is established that the compensation by all industry rate is less than 80% of the actual duties suffered in the manufacture of the export goods.

The Code of Criminal Procedure Code, 1973

It is the main legislation on procedure for administration of substantive criminal law in India. It was enacted in 1973 and came into force on 1st April, 1974. It provides the machinery for the investigation of crime, apprehension of suspected criminals, collection of evidence, determination of guilt or innocence of the accused person and the determination of punishment of the guilty.

Criminal law occupies a pre-dominant place among the agencies of social control and is regarded as a formidable weapon that society has forged to protect itself against anti-social behavior. The law of criminal procedure is meant to be complimentary to criminal law. It is intended to provide a mechanism for the enforcement of criminal law. The Code of Criminal Procedure creates the necessary machinery for apprehending the criminals, investigating the criminal cases, their trials before the criminal courts and imposition of proper punishment on the guilty person. The Code enumerates the hierarchy of criminal courts in which different offences can be tried and then it spells out the limits of sentences which such Courts are authorized to pass.

The law of criminal procedure is intended to provide a mechanism for the enforcement of criminal law. Without the proper procedural law the substantive criminal law which defines offences and provides punishment for them would be almost worthless.

The Code does not affect any special or local laws nor does it supersede any special jurisdiction or power conferred or any special form of procedure prescribed by or under any other law for the time being in force. The Code is the general law so that in case of conflict between the Code and the special law the latter prevails over the former. Where the special law is silent on a particular matter the Code applies, but consistent with the special enactment.

Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimize the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Most fundamentally, money laundering is inextricably linked to the underlying criminal activity that generates it. In essence, the laundering enables criminal activity to continue.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 210.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
