If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our cash flows, business, financial condition and results of operations could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risks where the impact is not quantifiable and hence the same has not been disclosed in such risk factors. Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

- 1. Our Company has recently started manufacturing of lab grown diamonds and thus we have limited operating history in manufacturing which may make it difficult for investors to evaluate our historical performance or future prospects.***

Our Company was in business of processing of Natural Diamonds such as polishing and cutting. In the year 2022, we have started the manufacturing of lab grown diamonds. We have very limited operating history in manufacturing of lab grown diamonds from which one can evaluate our business, future prospects and viability. Our future revenues and profitability are difficult to estimate and could fluctuate significantly.

Further our business prospects must be considered in light of the risks and uncertainties in respect of manufacturing of Lab grown diamonds. We may not be able to increase revenue or maintain profitability on a quarterly or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls.

There can be no assurance that we will be able to successfully pursue our growth strategies, or that pursuing these strategies will provide us the anticipated benefits in terms of growth and profitability. Further, we may be unable to develop adequate systems, infrastructure and technologies, devote sufficient financial resources or develop and attract talent to manage our growth. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects.

For details regarding of our Business please refer chapter titled “Business Overview” beginning on page no. 96 of this Draft Prospectus.

- 2. We generally do business with our customers on purchase order basis & retail basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.***

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Any change in the buying pattern of our customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to provide products on a timely basis that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

For details regarding of our Business please refer chapter titled “Business Overview” beginning on page no. 96 of this Draft Prospectus.

- 3. Our Diamonds are used for Jewellery and often perceived as luxury purchases. Any factor negatively impacting discretionary spending by consumers may adversely affect our business, results of operations, financial condition and prospects.***

Diamonds Jewellery purchases are typically high-value, luxury purchases and depend on consumers' discretionary spending power. Various factors affect discretionary consumer spending, including economic conditions, perceptions of such conditions by consumers, economic outlook, employment, the level of consumers' disposable income, the savings ratio, business conditions, inflation levels, interest rates, consumer debt and asset values, availability of credit and levels of taxation, among others. Additionally, diamond Jewellery is not perceived to be a necessity which may result in a significant fall in demand in the case of adverse economic conditions as opposed to demand for those goods that are perceived as a necessity. Any such fall in demand or a decline in the general economic conditions in India or our international markets or conditions which may bring discretionary spending by consumers under pressure could adversely affect our business, financial condition and results of operations.

- 4. We require certain approvals and licenses in the ordinary course of business and the failure to successfully obtain such registrations would adversely affect our operations, results of operations and financial condition.***

We are governed by various laws and regulations for our business and operations. The lab grown diamond business are the new emerging business in India and the applicable regulations & guidelines of the Gems & Jewellery Council are not clear as on date. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company from private to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. Further our company has applied for Shop & Establishment Registration and yet to apply for ESI, PF, Professional Tax for our Company and Shop & Establishment for one of branch. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see “Government and Other Approvals” on page 152 of this Draft Prospectus.

5. *The property used by the Company for the purpose of its operations is not owned by us. Any termination of the relevant lease agreement or rent agreement in connection with such property or our failure to renew the same could adversely affect our operations.*

Our marketing office located at Flat No. D/403, 4th floor, Green wood, Andheri Kurla Road, Chakala, Andheri (East), Zone 3, Mumbai – 400059, Maharashtra, India, our branch and manufacturing unit situated at Plot No 53-54, 1st Floor, Thakordwar Society, Mini Bazaar, Varachha, Surat – 395006, Gujarat, India and Ground Floor, Bunglow No. 21, Ambika Society, R. S. no. 136, 193, Part of village Kulpada, Surat City, Katargam -395006, Gujarat, India is not owned by us. Any termination of the lease in connection with this property or our failure to renew the same, in a timely manner or at all could adversely affect our operations. If we are required to vacate the current premises, we would be required to make alternative arrangements for our business activities and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

For details regarding properties taken on lease refer the chapter titled —Properties – “Business Overview” beginning on page no. 96 of this Draft Prospectus.

6. *We may be unable to respond to changes in consumer demands and market trends in a timely manner.*

Our success depends on our ability to identify, originate and define product and market trends, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. Our products must also appeal to a broad range of customers whose preferences may vary significantly across regions and cannot be predicted with certainty. We cannot assure you that the demand for our products with end-consumers will continue to grow or that we will be able to continue to develop appealing product or meet rapidly changing consumer demands in the future. If we misjudge the market for our products or fail to anticipate a shift in consumer preferences, we may be faced with a reduction in revenues. If we are unable to attract sufficient demand for our diamonds, our business may suffer.

For details regarding of our Business please refer chapter titled “Business Overview” beginning on page no. 96 of this Draft Prospectus.

7. *We are using unregistered Logo of our Company and we have not yet applied for the same. Such failure to protect our intellectual property rights could adversely affect our competitive position, business, financial condition and profitability.*

We are yet to file application for registration of our trademark. The registration of any intellectual property right is a time-consuming process, and there can be no assurance that any such registration will be granted. For details, please refer to the chapter “Government and other Approvals” on page 152 of this Draft Prospectus.

In the absence of such registration, competitors or other companies may challenge the validity or scope of our intellectual property. Unless our trademarks are registered, we may only get passing off relief for our Trademarks, if used by others, which could materially and adversely affect our business. Similarly, in case our trademark is rejected or objected, this could adversely affect our competitive position, business, financial condition and profitability.

- 8. *The Company is yet to place orders for 100% of the plant & machineries for our proposed object, as specified in the Objects of the Issue. Any delay in placing orders, procurement of plant & machineries may delay our implementation schedule and may also lead to increase in price of these plant & machineries, further affecting our revenue and profitability.***

Although we have identified the type of plant and machineries required to be bought however, we are yet to place orders for 100% of the plant & machinery worth Rs 154.00 lakhs as detailed in the “Objects of the Issue” beginning on page 75 of this Draft Prospectus. These are based on our estimates and on third-party quotations, which are subject to a number of variables, including possible cost overruns, changes in management’s views of the desirability of current plans, change in supplier of plant & machineries, Equipments among others, which may have an adverse effect on our business and results of operations.

Further, we cannot assure that we would be able to procure these plant and machineries, or procure the same within budgeted costs and timelines. Delays in acquisition of the same could result in the cost and time overrun, which would have a material adverse effect on our business, results of operations and financial condition. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 75 of this Draft Prospectus.

- 9. *Our Promoter Group Entities operate in the similar line of business as us, which may lead to competition with such Entities.***

Our Promoter Group Entities i.e., Jay Gems, Eco Grown Diam / Suchi Powers and Eco Friendly Diam / Shri Man Powers are involved in line of business that may potentially compete with our Company or are authorized to carry out business, similar to that of our Company. We may hence have to compete with our Promoter Group Entities for business, which may impact our business, financial condition and results of operations. The interests of our Promoters or Promoter Groups may also conflict in material aspects with our interests or the interests of our shareholders. For further details, please refer “Our Promoter and Promoter Group” beginning on page no. 130 of this Draft Prospectus. Further, our Promoters may become involved in ventures that may potentially compete with our Company. The interests of our Promoters or Promoter Groups may conflict with the interests of our other Shareholders and our Promoters may, for business considerations or otherwise, cause our Company to take actions, or refrain from taking actions, in order to benefit themselves instead of our Company's interests or the interests of its other Shareholders and which may be harmful to our Company's interests or the interests of our other Shareholders, which may impact our business, financial condition and results of operations.

We have not entered into any non-compete agreement with our Promoters and/or Promoter Groups and/or our Promoter Group Entities. We cannot assure you that our Promoters and/or our Promoter Group Entities and/or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

- 10. *Any change in our consumer’s likes, preferences or a change in their perception regarding the quality of our products may negatively affect the image and our reputation and in turn affect our revenues and profitability.***

The industry in which we operate is highly competitive and where goodwill and reputation are of huge significance. Although we have been in the business of trading rough and polished diamonds, any change in consumer’s likes, preferences or a change in their demands regarding the quality and authenticity of our products, may negatively affect the image and reputation of our products and consequently that our Company. Further, such incidences may expose our Company to liabilities and claims, adversely affect our reputation, growth and profitability.

- 11. *The price, at which we are able to obtain the Raw Material for manufacture of our finished products depend largely on prevailing market prices. Increase in costs of our raw materials could have a material adverse effect on our Company’s sales, profitability and results of operations.***

Our Company is dependent on third party suppliers for procuring raw materials. We are exposed to fluctuations in the prices of these raw materials as well as its unavailability, particularly as we typically do not enter into any longterm supply agreements with our suppliers and our major requirement is met in the spot market. We may be unable to control the factors affecting the price at which we procure the materials. We also face the risks associated with compensating for or passing on such increase in our cost of production on account of such fluctuations in prices to our customers. Upward fluctuations in the prices of raw material may thereby affect our margins and profitability, resulting in a material adverse effect on our business, financial condition and results of operations. Though we enjoy favourable terms from the suppliers both in prices as well as in supplies, our inability to obtain high quality materials in a timely and cost-effective manner would cause delays in our production and delivery schedules, which may result in the loss of our customers and revenues.

12. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Modernization and technology upgradation is essential to reduce costs and increase the output specifically in our Lab grown diamond manufacturing industry. Our technology and machineries may become obsolete or may not be upgraded timely, hampering our operations and financial conditions. In case of a new-found technology in the manufacturing facilities, we may be required to implement new technology or upgrade the machineries and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the plant and machineries are significant which could substantially affect our finances and operations.

13. We have a substantial amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.

As of September 30, 2022, our long-term borrowings were ₹ 110.39 Lakhs & short-term borrowings were 4.13 Lakhs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. Also, our company has not yet received NOC from its lender bank i.e. Axis Bank Limited for Initial Public offer. For further details of our Company's borrowings, see "Financial Information of our Company" on page 136 of this Draft Prospectus.

14. Our inability to effectively manage our growth or to successfully implement our business plan and growth strategy could have an effect on our business, results of operations and financial condition.

The success of our business will depend greatly on our ability to effectively implement our business and growth strategy. Our growth strategy involves focusing on Optimal Utilization of Resources and to developed relationships with customer. For further details, see the section titled "Business Overview" on page 96 of this Draft Prospectus. Our success in implementing our growth strategies may be affected by:

- Our ability to identify new markets to expand;
- Our ability to maintain the quality of our product;
- Changes in the Indian regulatory environment in field of our industry

There can be no assurance that we will be able to execute our strategy on time and within our estimated budget, or that our expansion and development plans will increase our profitability. Any of these factors could impact our results of operations. We cannot assure you that we will not face any time or cost overruns in respect of implementation of our strategies in the future. Further, we expect our growth strategy to place significant demands on our management, financial and other resources and require us to continue developing and improving our operational, financial and other internal controls. Our inability to manage our business and implement our growth strategy could have effect on our business, financial condition and profitability.

15. Continued operations of our manufacturing facilities are critical to our business and any disruption in the operation of our manufacturing facilities may have a material adverse effect on our business, results of operations and financial condition.

Our manufacturing facilities are subject to operating risks, such as break- down, obsolescence or failure of machinery, disruption in power supply or processes, performance below expected levels of efficiency, labour disputes, natural disasters, industrial accidents and statutory and regulatory restrictions. In the event of a breakdown or failure of such machinery and such machinery may have to be sent for repairs or servicing. This may lead to delay and disruption in our production process that could have an adverse impact on our sales, results of operations, business growth and prospects.

16. Our success is dependent on our Promoter, management team and skilled manpower. Our inability to attract and retain key personnel or the loss of services of our Promoter or Managing Director and Whole Time Director may have an adverse effect on our business prospects.

Our Promoter, Managing Director, Whole Time Director and management team have significantly contributed to the growth of our business, and our future success is dependent on the continued services of our management team. Our Managing Director Mr. Jerambhai Lavjibhai Donda and whole-time Director Mr. Jay Jerambhai Donda are having experience of 41 years and 9 years respectively in Diamond Industry which turn out beneficial for the Company. An inability to retain any key managerial personnel may have an adverse effect on our operations. We might face challenges in recruiting suitably personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be unable to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects.

For further details of our Promoters and Management, please refer chapter titled “Our Promoters and Promoter Group” and “Our Management” beginning on Page 130 & 118 of this Draft Prospectus.

17. Some of our corporate records and forms filed with the Registrar of Companies are not traceable.

Our Company is unable to trace certain corporate and other documents in relation to our company including forms filed with Registrar of Companies prior to the year 2006. Due to Change in methods of records keeping on account of technological advancement and computerization, over the years, certain forms file with ROC prior to the year 2006 like Return of Allotment pertaining to year 1994, Registration of charges and modification of charges, annual return etc. could not be traced by our company. Further online filing of Roc Documents was initiated in the year 2006 and all forms prior to the said year were physically filed, hence certain of these forms could not be retrieved from Ministry of Corporate Affairs (MCA) portal. Our Company had carried limited purpose search for the physical copies of the untraceable forms at the RoC Ahmedabad but the forms are not available at the office of Registrar of Companies as well. As such under the circumstances elaborated above, Our Company cannot assure you that the filings were made in a timely manner or the information gathered through other available documents of the company are correct. Also our Company may not in position to attend to and / or respond appropriately to any legal matter due to lack of lost/ destroyed records and to that extend the same could adversely affect our business operation.

18. Our top ten customers contribute majority of our revenues from operations of natural diamond business. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top ten customers have contributed 72.64%, 50.70%, 58.19% and 54.63% of our revenues for the period ended September 30, 2022, March 31, 2022, March 31, 2021 and March 31, 2020 based on Restated Financial Statements in respect of the natural diamond business. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long term relationships with our customers, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

19. Our top ten suppliers contribute majority of our purchases for natural diamond business. Any loss of business with one or more of them may adversely affect our business operations and profitability.

Our top ten suppliers contributed in respect of the natural diamond business approximately 97.88%, 47.54%, 82.11% and 100.00% of our total purchases for the period ended September 30, 2022, March 31, 2022, March 31, 2021 and March 31, 2020 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost effective suppliers in normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

While we believe we have maintained good and long term relationships with our other suppliers too, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

20. *The success of our Company mainly depends upon the quality of diamonds sell to our customer and our ability to retain the present number of customers and attract newer customers. Any failure in retaining or attracting customers on year on year basis and any decline in quality of our diamonds will impact the business and the revenues earned by the Company.*

Since, Natural and Lab grown diamonds are the products we sell to our customers, the quality and authenticity of rough and polished diamonds delivered, the ability to timely procure them at the competitive price, would assist the company in earning trust, goodwill, popularity and visibility amongst its customers. In case the Company fails to maintain and enhance its current market position, the quality and authenticity of Natural and Lab grown diamonds sold and the failure to attract current and newer customers; the revenues earned by the company may be affected.

For details regarding of our Business please refer chapter titled “Business Overview” beginning on page no. 96 of this Draft Prospectus.

21. *There are certain discrepancies and non-compliances noticed in some of our corporate records relating to forms filed with the Registrar of Companies.*

In the past, our company has filed forms in RoC with some clerical mistakes. Further we have at several instances, delayed in filing our GST returns mainly due to timely non-available of populated data in the portal as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes. Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Also our Company has not complied for AS-15 in Audited Financial Statements with regard to gratuity provision but the same is complied in Restated Financial Statement of the Company.

Further no-show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure that we may not do delay filings in future and not be subjected to penalty or interest.

Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

22. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory of diamonds, to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

23. *Orders placed by customers may be delayed, modified, cancelled or not fully paid for, which may have an adverse effect on our business, financial condition and thereby on our results of operations.*

We may encounter predicaments in executing the orders placed by our customer or executing it on a timely basis. Moreover, there are factors which may be beyond our control or in the control of our customers, including delays or due to difficulties or obstructions, which may result in the postponement of executing or delivering of the necessary product(s) or cause its cancellation. Further, even though we execute orders as placed by our customers, the order could be cancelled or there could be any changes in delivery of the products. Accordingly, it is difficult to predict with certainty if, when and to what extent the delivery of the orders placed will be made. Failure to deliver our orders on time could lead to customers delaying or refusing to pay the amount, in part or full, which may adversely affect our revenue, cost of operation and thereby our business functioning.

24. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market in which our Company is doing business is highly competitive on account of both the organized and unorganized players. Players in this industry generally compete with each other on key attributes. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

25. *Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.*

As on September 30, 2022, our total secured borrowings amounted to Rs. 114.52 Lakhs from Banks. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest;

The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, please refer chapter titled “Financial Information of our Company” beginning on Page 136 of this Draft Prospectus.

26. *The outbreak of COVID-19, or outbreak of any other similar severe communicable disease could have a potential impact on our business, financial condition and results of operations.*

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could adversely affect the overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our customers and suppliers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines and lockdowns. These measures have impacted and may further impact our workforce and operations, the operations of our customers, and those of our respective vendors and suppliers. There is currently substantial medical uncertainty regarding COVID-19. In case there is a rapid increase in severe cases of infections leading to deaths, where the measures taken by governments are not successful or are any bans imposed by the government in this regard are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. Our ability to meet our ongoing disclosure obligations might be adversely affected, despite our best efforts.

27. *We have entered into and may enter into related party transactions in the future also.*

Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge. Our Company had entered into various transactions with our Promoter, Promoter Group, Directors and their Relatives and Group Entities. These transactions, inter-alia includes salary, remuneration, loans and advances, interest and purchase and sales etc. Our Company entered into such transactions at arm’s length price and due to easy proximity & quick execution.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects,

results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

28. We have significant ongoing funding requirements and may not be able to raise additional capital in the future. As a result, we may not be able to respond to business opportunities, challenges or unforeseen circumstances.

Our major fund based financial assistance has been sanctioned by the bank, i.e., the Axis bank Limited on the security of assets of our Promoters. Any default under such arrangement with such lender may create problem for operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If we are unable in the future to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition.

For further details of our loans, please refer chapter titled “Financial Information of our Company” beginning on Page 136 of this Draft Prospectus.

29. If there is a change in policies related to tax, duties or other such levies applicable to us, it may affect our results of operations.

We benefit from certain general tax regulations and incentives that accord favorable treatment to certain of our operations as well as for our activities. These tax benefits include income tax deductions and other taxes. For details regarding income tax deductions, please refer to the chapter “Statement of Possible Tax Benefits” on page 82 of this Draft Prospectus.

New or revised accounting policies or policies related to tax, duties or other such levies promulgated from time to time by the relevant authorities may significantly affect our results of operations. We cannot assure you that we would continue to be eligible for such lower tax rates or any other benefits. The reduction or termination of our tax incentives, or non-compliance with the conditions under which such tax incentives are made available, will increase our tax liability and affect our business, prospects, results of operations and financial condition.

30. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “Dividend Policy” on page 135 of this Draft Prospectus.

31. We have experienced negative cash flows in the past. Any such negative cash flows in the future could affect our business, results of operations and prospects.

Our Company had reported certain negative cash flows from Operating, investing activities and financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under:

(Rs. in Lakhs)

Particulars	For the period ended	For the year ended March 31,		
	30.09.2022	31.03.2022	31.03.2021	31.03.2020
Cash flow from Operating Activities	(69.31)	35.64	(7.87)	29.61
Cash flow from Investing Activities	(384.18)	36.32	(0.91)	(1.81)
Cash flow from Financing Activities	448.63	(68.14)	7.81	(26.00)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may affect our business and financial operations. For further please refer chapter titled “Financial Information of our company” beginning on Page 136 of this Draft Prospectus.

32. Any customer dispute regarding our performance or workmanship may amount in delay or withholding of payment to us.

Our Company believes to provide the product to our customer according to their requirement. In case our products do not fulfill the requirements of our customer which may leads to dissatisfaction and further consequence including customer dispute regarding our performance or workmanship and the customer may delay or withhold payment to us, which may result in affecting our business.

33. Our Promoter and Executive Directors hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.

Our Promoter and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see "Our Management" and "Our Promoters and Promoter Group" on pages 118 and 130 respectively of this Draft Prospectus.

34. We are subject to the risk of failure of, or a material weakness in, our internal control systems.

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

35. Major fraud, lapses of internal control or system failures could adversely impact the company's business.

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties as our product is very expensive.

36. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject and this may have a material effect on our business and financial condition.

While we maintain insurance coverage, in amounts which we believe are commercially appropriate, including related to our movable assets provide appropriate coverage in relation to theft, fire, explosions, floods, inundations, earthquakes, landslides. we may not have sufficient insurance coverage to cover all possible economic losses, including when the loss suffered is not easily quantifiable and in the event of severe damage to our business. Even if we have made a claim under an existing insurance policy, we may not be able to successfully assert our claim for any liability or loss under such insurance policy. Additionally, there may be various other risks and losses for which we are not insured either because such risks are uninsurable or not insurable on commercially acceptable terms. The occurrence of an event for which we are not adequately or sufficiently insured could have an effect on our business, results of operations, financial condition and cash flows.

In addition, in the future, we may not be able to maintain insurance of the types or at levels which we deem necessary or adequate or at rates which we consider reasonable. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have an effect on our business, results of operations, financial condition and cash flows.

37. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India's principal export markets; and
- Other significant regulatory or economic developments in or affecting India or our industry.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

38. Our Promoters have provided personal properties for loans availed by our Company. Our business, financial condition, results of operations, cash flows and prospects may be adversely affected by the invocation of all or any personal properties provided by our Promoters.

Our Promoters have provided personal properties to secure a significant portion of our existing borrowings, and may post listing continue to provide such guarantees and other security. In case of a default under our loan agreements, any of the personal properties provided by our Promoters may be invoked, which could negatively impact the reputation of our Company. Also, we may face certain impediments in taking decisions in relation to our Company, which in turn would result in a material adverse effect on our financial condition, business, results of operations and prospects and would negatively impact our reputation.

For further details regarding loans availed by our Company, please refer "Financial Information of our Company" on page 136 of this Prospectus.

39. The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.

None of our workers are currently represented by a recognized collective bargaining agreement. We cannot assure you that our workers will not unionize, or attempt to unionize in the future, that they will not otherwise seek higher wages and enhanced employee benefits. We also cannot assure you that we will not experience disruptions in our work due to disputes or other problems with our workforce. If not resolved in a timely manner, these risks could limit our ability to provide our products to our clients, cause clients to limit their use of our products or result in an increase in our cost of employee benefits and other expenses. If any of these risks materialize, our business, results of operations and financial condition could be affected.

Any such penalty arising in future may lead to financial loss to our Company.

43. We have not identified any alternate source of raising the capital expenditure and working capital mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.

Our Company has not identified any alternate source of funding for our capital expenditure, working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object for the Issue, please refer chapter titled “Object for the Issue” beginning on Page 75 of this Draft Prospectus.

44. Our funds requirements are based on internal management estimates, wherever possible, and have not been appraised by any bank or financial institution. Any increase in the actual deployment of funds may cause an additional burden on our finance plans. We have not entered into definitive agreements to utilize our Issue proceeds.

The fund requirement mentioned as a part of the Objects of the Issue is based on internal management estimates, wherever possible, and has not been appraised by any bank or financial institution or any external agency. These are based on current conditions and are subject to change in light of changes in external circumstances or costs or in other financial conditions, business strategy, etc. With increase in costs, our actual deployment of funds may exceed our estimates and may cause us an additional burden on our finance plans. As on the date of the Draft Prospectus, we have not entered into any definitive agreements for implementing the Objects of the Issue.

For more information, please refer to “Objects of the Issue” on page 75. of the Draft Prospectus.

Our Company intends to primarily use the Net Proceeds towards capital expenditure, working capital requirement and for general corporate purposes as described in “Objects of the Issue” on page 75 of this Draft Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company’s management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

46. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoter or controlling shareholders to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

47. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute 15.86% of the Issue Proceed. As on date we have not identified the use of such funds.

For details please refer the chapter titled “Objects of the Issue” beginning on Page No. 75 of this Draft Prospectus.

48. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.

For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoter in our Company, please refer to the chapters “Capital Structure” beginning on pages 50 of this Draft Prospectus.

49. We will continue to be controlled by our Promoter and Promoter Group after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Draft Prospectus, our Promoter and Promoter Group hold 92.66% of the issued and outstanding paid-up share capital of our Company. Following the completion of the Issue, our Promoter and Promoter Group will continue to hold together 68.01% of our post-Issue Equity Share capital. The Issue Price of the Equity Shares is determined considering various financial factors of the Company and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment

51. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

52. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see "Basis for Issue Price" beginning on page 80 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

53. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

54. *The requirements of being a listed company may strain our resources and distract management.*

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

55. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.*

Our growth is dependent on having a balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

EXTERNAL RISK FACTORS

56. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

57. Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the “CCI”). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void.

Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

58. The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

59. You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal.

However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

60. Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.

The Ministry of Corporate Affairs (“MCA”), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 (“Ind AS”) which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“ICDS”), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

61. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India’s principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

62. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations’ debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

63. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavorable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and e-commerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well.

Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

GLOBAL OUTLOOK

The Forces Shaping the Outlook

Global slowdown intensifies as downside risks materialize. A tentative recovery in 2021 has been followed by increasingly gloomy developments in 2022. Performance was slightly better than expected in the first quarter, but world real GDP is estimated to have shrunk in the second quarter—the first contraction since 2020—owing to economic downturns in China and Russia. Downside risks discussed in the April 2022 World Economic Outlook are materializing, with higher inflation worldwide, especially in the United States and major European economies, triggering a sharp tightening in global financial conditions; a sharper-than-anticipated slowdown in China, reflecting COVID-19 outbreaks and lockdowns; and further negative cross-border effects from the war in Ukraine.

Global inflation again surprises on the upside, prompting more central bank tightening. Since 2021, consumer prices have consistently risen faster than widely expected, including in the World Economic Outlook (Figure 1). In the United States, the consumer price index rose by 9.1 percent in June, compared with a year earlier, and it also rose by 9.1 percent in the United Kingdom in May—the highest inflation rates in these two countries in 40 years. In the euro area, inflation in June reached 8.6 percent, its highest level since the inception of the monetary union. Equally concerning, in emerging market and developing economies, second-quarter inflation is estimated to have been 9.8 percent. Higher food and energy prices, supply constraints in many sectors, and a rebalancing of demand back toward services have in most economies driven up headline inflation. But underlying inflation has also increased, as reflected in different gauges of core inflation, reflecting the pass-through of cost pressures by way of supply chains and tight labor markets, especially in advanced economies.¹ Wage growth has on average not kept up with inflation across both advanced and emerging market and developing economies, eroding household purchasing power. Although long-term inflation expectations have been stable in most major economies, they have started to rise according to some measures, including in the United States (Figure 2). In response to incoming data, central banks of major advanced economies are withdrawing monetary support more assertively and raising policy interest rates faster than expected in the April 2022 World Economic Outlook. Central banks in several emerging market and developing economies have raised interest rates more aggressively than during past advanced economy tightening cycles. The associated rise in longer-term borrowing costs, including mortgage rates, and tighter global financial conditions (see box) have led to precipitous declines in equity prices, weighing on growth. At the same time, public COVID-19 support packages have been wound down.

Note: Panel 1 shows median consensus forecasts for respective groups of economies. Consensus Economics forecasts are current year consumer price index inflation forecasts and 2-year-ahead inflation forecasts; for 10-year expectations, they are averages over the 6- to 10-year-ahead horizon. The SCE 5-year-ahead expectations are the average inflation expectations over the following 5 to 10 years. The SPF longer-term forecasts are for the annual averages of inflation over the following 5 and 10 years, respectively. AEs = advanced economies; EMDEs = emerging market and developing economies; SCE = surveys of consumers; SPF = survey of professional forecasters.

China's economic slowdown has added to global supply chain disruptions. COVID-19 outbreaks and mobility restrictions as part of the authorities' zero-COVID strategy have disrupted economic activity widely and severely (Figure 3). Shanghai, a major global supply chain hub, entered a strict lockdown in April 2022, forcing citywide economic activity to halt for about eight weeks. In the second quarter, real GDP contracted significantly by 2.6 percent on a sequential basis, driven by lower consumption—the sharpest decline since the first quarter of 2020, at the onset of the pandemic, when it declined by 10.3 percent. Since then, more contagious variants have driven a worrisome surge in COVID-19 cases. The worsening crisis in China's property sector is also dragging down sales and real estate investment. The slowdown in China has global consequences: lockdowns added to global supply chain disruptions and the decline in domestic spending are reducing demand for goods and services from China's trade partners.

The war in Ukraine continues, causing widespread hardship. The war's humanitarian cost is rising, with 9 million people having fled Ukraine since the Russian invasion started and continuing loss of life and destruction of physical capital. Since April 2022, major advanced economies have placed additional financial sanctions on Russia, and the European Union agreed on embargoes on imports of coal starting in August 2022 and on Russian seaborne oil starting in 2023. The European Union announced that it will block insuring and financing maritime transport of Russian oil to third countries by the end of 2022. At the same time, the Organization of the Petroleum Exporting Countries has agreed to bring forward increases in oil supply that were planned for September, and the Group of Seven plans to study the possibility of introducing a price ceiling on Russian exports of crude oil. These offsetting developments mean that the increase in international crude oil prices compared with last year is overall only slightly lower than predicted in the April 2022 World Economic Outlook. More recently, the flow of Russian pipeline gas to Europe has declined sharply to about 40 percent of the level a year ago, contributing to a steep increase in natural gas prices in June. Russia's economy is estimated to have contracted during the second quarter by less than previously projected, with crude oil and nonenergy exports holding up better than expected. In addition, domestic demand is also showing some resilience thanks to containment of the effect of the sanctions on the domestic financial sector and a lower-than-anticipated weakening of the labor market. Relatedly, the war's effects on major European economies have been more negative than expected, owing to higher energy prices as well as weaker consumer confidence and slower momentum in manufacturing resulting from persistent supply chain disruptions and rising input costs.

The food crisis worsens. Global food prices have stabilized in recent months but remain much higher than in 2021 (see Figure 4). The principal driver of global food price inflation—particularly prices of cereal, such as wheat—has been the war in Ukraine; export restrictions in several countries have compounded global food price increases, although a few of these restrictions have recently lapsed. Low-income countries, where food represents a larger share of consumption, are feeling the impact of this inflation most keenly. Countries with diets tilted toward commodities with the largest price gains (especially wheat and corn), those more dependent on food imports, and those with a large pass-through from global to local staple food prices are most distressed. Low-income countries whose people were already experiencing acute malnutrition and excess mortality before the war, especially in sub-Saharan Africa, have suffered a particularly severe impact.

(Index, January 2019 = 100)

Global growth: In the baseline scenario, global growth is 3.2 percent in 2022 and moderates to 2.9 percent in 2023, lower than projected in the April 2022 World Economic Outlook by 0.4 and 0.7 percentage point, respectively (Table 1). In a number of cases, a better-than-expected growth outcome in the first quarter of 2022 offsets the subsequent slowdown, resulting in a relatively modest net negative revision for average annual growth in 2022. Downgrades for China and the United States, as well as for India, are driving the downward revisions to global growth during 2022–23, which reflect the materialization of downside risks highlighted in the April 2022 World Economic Outlook: a sharper slowdown in China due to extended lockdowns, tightening global financial conditions associated with expectations of steeper interest rate hikes by major central banks to ease inflation pressure, and spillovers from the war in Ukraine. With growth near 3 percent in 2022–23, a decline in global GDP or in global GDP per capita—sometimes associated with global recession—is not currently part of the baseline scenario. However, projections for growth on a fourth-quarter-over-fourth-quarter basis point to a significant weakening of activity in the second half of 2022 (Table 1). While the revisions are mostly negative for advanced economies, differing exposures to the underlying developments mean that those for emerging market and developing economies are more mixed:

4. As noted, growth revisions for major advanced economies in 2022–23 are generally negative. Baseline growth in the United States is revised down by 1.4 percentage points and 1.3 percentage points in 2022 and 2023, respectively, reflecting weaker-than-expected growth in the first two quarters of 2022, with significantly less momentum in private consumption, in part reflecting the erosion of household purchasing power and the expected impact of a steeper tightening in monetary policy. Growth in the euro area is also revised down: by 0.2 percentage point in 2022, when improved prospects for tourism and industrial activity in Italy are more than offset by significant downgrades in France, Germany, and Spain; and by 1.1 percentage point in 2023. This reflects spillovers from the war in Ukraine as well as the assumption of tighter financial conditions, with the European Central Bank ending net asset purchases and raising rates in July 2022 for the first time since 2011. In a number of European economies, Next Generation EU funds are supporting economic activity.
5. For emerging market and developing economies, the negative revisions to growth in 2022–23 reflect mainly the sharp slowdown of China’s economy and the moderation in India’s economic growth. The revision in emerging and developing Asia is correspondingly large, at 0.8 percentage point in the baseline for 2022. This revision includes a 1.1 percentage point downgrade to growth in China, to 3.3 percent (the lowest growth in more than four decades, excluding the initial COVID-19 crisis in 2020), owing primarily to the aforementioned COVID-19 outbreaks and lockdowns. Likewise, the outlook for India has been revised down by 0.8 percentage point, to 7.4 percent. For India, the revision reflects mainly

less favorable external conditions and more rapid policy tightening. Elsewhere, growth revisions in the baseline have been mostly on the upside. Real GDP for emerging and developing Europe is expected to shrink by 1.5 percentage points less in 2022 than predicted in the April 2022 World Economic Outlook but grow by 0.4 percentage point less in 2023, on the back of stronger-than-expected Russian export growth in 2022 and the recently announced additional sanctions on Russia in 2023. Latin America and the Caribbean has also seen an upward revision of 0.5 percentage point in 2022 as a result of a more robust recovery in the large economies (Brazil, Mexico, Colombia, Chile). The outlooks for countries in the Middle East and Central Asia and sub-Saharan Africa remain on average unchanged or positive, reflecting the effects of elevated fossil fuel and metal prices for some commodity-exporting countries.

Inflation: The baseline projection for global inflation is also more pessimistic, having been revised up to 8.3 percent in 2022 on a fourth-quarter-over-fourth-quarter basis, from 6.9 percent in the April 2022 World Economic Outlook. The upside inflation revision in 2022 is larger for advanced economies, where it is expected to reach 6.3 percent from 4.8 percent projected in the April 2022 World Economic Outlook on a fourth-quarter-over-fourth-quarter basis, driven by significant increases in headline inflation among such major economies as the United Kingdom (a 2.7 percentage point upward revision to 10.5 percent) and the euro area (a 2.9 percentage point upward revision to 7.3 percent). Forecasts for 2023 are relatively unchanged—up by only 0.2 percentage point on a fourth-quarter-over-fourth-quarter basis—reflecting confidence that inflation will decline as central banks tighten policies and energy price base effects turn negative. For emerging market and developing economies, inflation in 2022 is expected to reach 10.0 percent on a fourth-quarter-over-fourth-quarter basis. Revisions for those economies display greater variation across countries, with relatively modest increases in emerging and developing Asia (partly because of a slowdown of activity in China and limited increases in prices of staple foods) but larger revisions for Latin America and the Caribbean (up by 3.0 percentage points) and for emerging and developing Europe (up by 2.9 percentage points).

Global trade: Global trade growth in 2022 and 2023 will likely slow by more than previously expected, reflecting the decline in global demand and supply chain problems. The dollar's appreciation in 2022—by about 5 percent in nominal effective terms as of June compared with December 2021—is also likely to have slowed world trade growth, considering the dollar's dominant role in trade invoicing as well as negative financial balance sheet effects on demand and imports in countries with dollar-denominated liabilities.

Gems and Jewellery Industry in India

Introduction

As of February 2021, India's gold and diamond trade contributed ~7.5% to India's Gross Domestic Product (GDP) and 14% to India's total merchandise exports. The gems and jewellery sector is likely to employ ~8.23 million persons by 2022, from ~5 million in 2020.

Based on its potential for growth and value addition, the Government declared gems and jewellery sector as a focus area for export promotion. The Government has undertaken various measures recently to promote investment and upgrade technology and skills to promote 'Brand India' in the international market. Market Size

India's gems and jewellery market size was at US\$ 78.50 billion in FY21. Growth in exports is mainly due to revived import demand in the export market of the US and fulfilment of orders received by numerous Indian exhibitors during the Virtual Buyer-Seller Meets (VBSMs) conducted by GJEPC.

India's gems and jewellery exports reached US\$ 39.14 billion in 2021-22, a 54.13% rise from the previous year. In April 2022, India's overall gems and jewellery exports were at US\$ 3.23 billion. Currently, the range is available in stores across Chennai and Lucknow, with further launches planned in Kolkata and Hyderabad followed by other key markets. - In June 2021, the World Gold Council and Gem and Jewellery Export Promotion Council signed an agreement to promote gold jewellery in India. Under the agreement terms, both partners will jointly fund a multi-media marketing campaign that would aim to increase awareness, relevance and adoption of gold jewellery amongst Indian consumers, especially in millennials and Gen Z.

 - Hallmarking of gold jewellery is set to begin from June 15, 2021. In view of the COVID-19 pandemic, the government accepted request of stakeholders to provide jewellers some more time to prepare for implementation and resolve issues. Earlier, the date of implementation was June 01, 2021.

- In December 2020, the Finance Ministry notified that the amendment under Prevention of Money Laundering Act (PMLA), notifying dealers in precious metals and stones, will maintain records of cash transactions worth Rs. 10 lakh (US\$ 13.61 thousand) or more cumulatively with a single customer.

Road Ahead

In the coming years, growth in gems and jewellery sector would largely be contributed by the development of large retailers/brands. Established brands are guiding the organised market and are opening opportunities to grow. Increasing penetration of organised players provides variety in terms of products and designs. Online sales are expected to account for 1–2% of the fine jewellery segment by 2021–22. Also, the relaxation of restrictions of gold import is likely to provide a fillip to the industry. The improvement in availability along with the reintroduction of low-cost gold metal loans and likely stabilisation of gold prices at lower levels is expected to drive volume growth for jewellers over short to medium term. The demand for jewellery is expected to be significantly supported by the recent positive developments in the industry.

OUR PRODUCT RANGE

A. Lab Grown Diamonds:

Lab grown diamond (It is also called CVD, laboratory-grown, laboratory-created, man-made, artisan created, or cultured diamond) is diamond that is produced in a controlled technological process (in contrast to naturally formed diamond, which is created through geological processes and obtained by mining). Unlike diamond simulants (imitations of diamond made of superficially-similar non-diamond materials), synthetic diamonds are composed of the same material as naturally formed diamonds – pure carbon crystallized in an isotropic 3D form – and share identical chemical and physical properties.

Lab grown diamonds are as real as diamonds mined from the earth. Lab grown diamonds are identical to earth mined diamonds in every way, except that they are grown in a lab. They have the same chemical, physical, and optical properties as mined diamonds and exhibit the same fire, scintillation, and sparkle. Lab grown diamonds offer an exceptional value when compared with the same quality rare, earth mined diamonds.

We sell diamonds of multiple shape, cut, size, color and clarity.

Properties of Lab grown diamonds:

- **Crystallinity**

Diamond can be one single, continuous crystal or it can be made up of many smaller crystals (polycrystalline). Large, clear and transparent single-crystal diamonds are typically used as gemstones. Polycrystalline diamond (PCD) consists of numerous small grains, which are easily seen by the naked eye through strong light absorption and scattering; it is unsuitable for gems and is used for industrial applications such as mining and cutting tools. Polycrystalline diamond is often described by the average size (or grain size) of the crystals that make it up. Grain sizes range from nanometres to hundreds of micrometres, usually referred to as "monocrystalline" and "microcrystalline" diamond, respectively.

- **Hardness**

Diamond is also the hardest known material for its resistance to indentation. The hardness of synthetic diamond depends on its purity, crystalline perfection and orientation: hardness is higher for flawless, pure crystals oriented to the direction (along the longest diagonal of the cubic diamond lattice). Nano crystalline diamond produced through CVD diamond growth can have a hardness ranging from 30% to 75% of that of single crystal diamond, and the hardness can be controlled for specific applications. Some synthetic single-crystal diamonds and HPHT nanocrystalline diamonds are harder than any known natural diamond.

- **Impurities and inclusions**

Every diamond contains atoms other than carbon in concentrations detectable by analytical techniques. Those atoms can aggregate into macroscopic phases called inclusions. Impurities are generally avoided, but can be introduced intentionally as a way to control certain properties of the diamond. Growth processes of synthetic diamond, using solvent-catalysts, generally lead to formation of a number of impurity-related complex centers, involving transition metal atoms (such as nickel, cobalt or iron), which affect the electronic properties of the material.

- **Thermal conductivity**

The thermal conductivity of CVD diamond ranges from tens of W/m-K to more than 2000 W/m-K, depending on the defects, grain boundary structures. As the growth of diamond in CVD, the grains grow with the film thickness, leading to a gradient thermal conductivity along the film thickness direction.

Unlike most electrical insulators, pure diamond is an excellent conductor of heat because of the strong covalent bonding within the crystal. The thermal conductivity of pure diamond is the highest of any known solid. Single crystals of synthetic diamond enriched in ^{12}C (99.9%), isotopically pure diamond, have the highest thermal conductivity of any material, 30 W/cm at room temperature, 7.5 times higher than that of copper. Natural diamond's conductivity is reduced by 1.1% by the ^{13}C naturally present, which acts as an inhomogeneity in the lattice.

Application and Use of Lab grown diamonds

Lab grown diamonds are not only used for jewellery but there are many uses of it such as Machining and cutting tools, Thermal conductor, Optical material, Electronics, Semi-Conductors and Electronic Industries etc. Within a few decades, lab-grown diamonds were being made pure enough and large enough that they could be used in a variety of high-tech applications. Lab-grown diamonds were being used as heat sinks in advanced computers; wear-resistant coatings on tools and bearings; high-durability windows; tiny anvils for high pressure experiments; specialized lenses; speaker domes; and much more. Our Company has recently started manufacturing of Lab grown diamonds and selling for jewellery only but in future our company will manufacture lab grown diamonds for industrial use also.

Manufacturing Process for lab grown diamonds

Our company uses the Chemical vapor deposition (CVD) process considering the availability of raw materials, technology development in India and overall cost involved for Infra facility.

CVD process is used by our company considering following several reasons:

- CVD can yield high grade diamonds
- Most CVD processes operate at lower temperatures and pressures, simplifying the manufacturing process.
- CVD can be used for diamond deposition on substrates other than diamond.
- Raw material and Equipments are easily available in India
- Overall infra cost is affordable and cost effective to make optimum profit.

This has resulted in technological advancements for many industries including optics, computer sciences, and tool production. The biggest challenge thus far to manufacturing diamonds via CVD is the inability to yield diamonds over 3.2 carats. This is mostly relevant in the jewellery industry.

Process

CVD stands for chemical vapor deposition and is another method used for making diamonds in a lab. Diamonds grow from a hydrocarbon gas mixture subjected to moderate pressures and temperatures in a vacuum chamber.

The CVD Diamond Growth Process

- 1) Diamond seed crystals are placed in a diamond growth chamber.
- 2) The chamber is filled with carbon-containing gas.
- 3) The chamber is heated to about 900-1200°C.
- 4) A microwave beam causes carbon to precipitate out of a plasma cloud and deposit onto a seed crystal.

Diamonds are removed every few days to have the top surface polished to remove any non-diamond carbon before being put back in to grow. Each batch of diamonds may require several stop/start cycles, and the entire growth process can take three or four weeks.

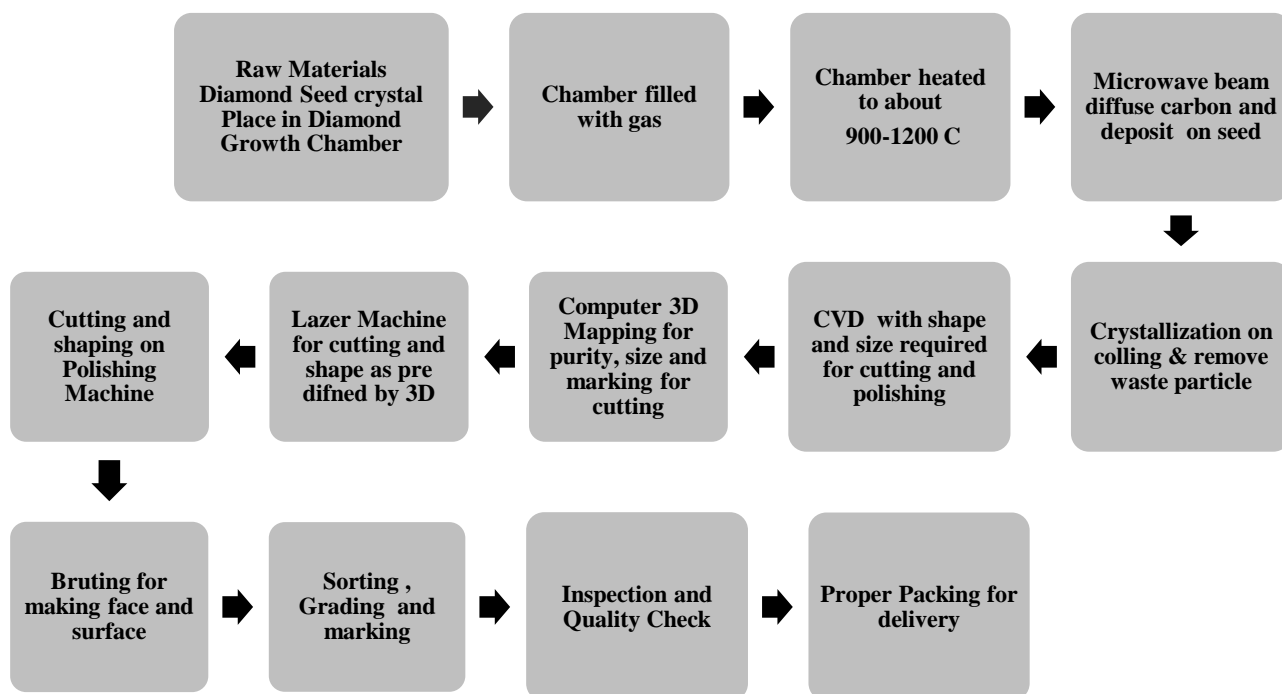

After the synthetic diamond crystals are removed, they are ready to be cut and polished into the final product.

In greater detail, CVD diamond growth takes place inside a vacuum chamber filled with a hydrogen and carbon-containing gas, such as methane. A source of energy — such as a microwave beam — breaks down the gas molecules, and the carbon atoms diffuse towards the colder, flat diamond seed plates. Crystallization occurs over a period of weeks, and several crystals grow at

the same time. The exact number depends on the size of the chamber and the number of seed plates. The tabular crystals often develop a rough edge of black graphite that needs to be cut away. They also display a brown colour that can be removed by heat treatment prior to faceting. Most CVD-grown colourless material on the market were probably once brown crystals that have been decolorized by HPHT annealing.

Manufacturing Process for natural diamonds

Process Flow Chart

- Procurement of Rough natural Diamonds: The basis raw material procured by us is rough diamonds. The purchase of rough diamonds is based on the latest market trends and demand analyzed by our team. After carefully examining them in terms of cut, colour, clarity and carats, we execute the purchase orders.
- Analysis and Assortment: This is the initial stage of diamond manufacturing process. In this process expert checkers analyses the rough diamond and its characteristics are determined. These characteristics are based on Colour, Clarity, Carat, Cut (the 4 C's). After deciding 4 C's, it is given a grade, which represents overall quality of the rough diamond.
- Planning and Marking: Planning is a crucial step in diamond manufacturing. During this stage, the size and relative value of the cut stones that the rough diamonds will produce is determined. Rough diamonds need to be sorted on the basis of whether they are makeable or not, on the basis of colour, size etc. Non-make-able diamonds then need to be planned so as to reduce wastage and maximize yield.
- Cleaving or Sawing: Cleaving and sawing are the two different processes that come after the rough diamond is planned and marked. The rough diamond is analysed and sent to either cleaving or sawing department. A rough diamond needs to be broken into parts. This is done through either of the method, i.e. either through Cleaving or Sawing. Cleaving is done manually with blade & hammer, which split rough diamond into two or more parts. If the diamond needs sawing, then it is sent to sawing department. Laser technology is the latest and most advanced technology for sawing. Laser technology gives very accurate result. Planner rechecks the diamond after this process is complete. Once the planner decides where the diamond should be cut, the diamond is either manually cleaved or sawed. Sawing can be done with a diamond-coated rotary saw or a laser. Generally, small sized diamonds are signed manually. The rough diamonds which cannot be cleaved are sawed.
- Bruting: Bruting forms the basic face-up outline of a round diamond to prepare it for faceting. During the bruting phase, the diamond being bruted is spun on a rotating lathe while another diamond is forced against it, gradually forming the rounded outline. Essentially, this gives shape to diamond in a way so that maximum yield can be taken.
- Polishing and Grading: Polishing is the final step in the diamond manufacturing process. This step gives the diamond its brilliant sparkle that is the final look. The polisher is very careful at this process because a small mistake can result into quality loss of the diamond. In this process, the cut and polished diamond is boiled in a solution of hydrochloride and sulphuric acid to remove oil, diamond powder and dirt. After completion of polishing, the smaller packets are put together in the original packet and sent for final inspection. During the entire process, strict quality control measures are taken and the diamond passes through a computerized network which keeps track of every single diamond. After completing the polishing,

polish checker has to check every facets of the stone to finalise the excellent cut grade. From here, the polished diamonds go to the grading department. Here the 4 C's of diamonds are decided and the appropriate grading is given to the diamonds. The graded parameters are noted down for each diamond.

Further, we require several approvals from local authorities such as municipal bodies. The approvals required may vary depending on the state and the local area.

Municipality Laws

Pursuant to the Constitution (Seventy-Fourth Amendment) Act, 1992, the respective state legislatures in India have power to endow the municipalities with power to implement schemes and perform functions in relation to matters listed in the Twelfth Schedule to the Constitution of India. The respective states of India have enacted laws empowering the municipalities to issue trade license for operating eating outlets and implementation of regulations relating to such license along with prescribing penalties for non-compliance.

Intellectual Property Laws

The Trade Marks Act, 1999 (“Trade Marks Act”) provides for application and registration of trademarks in India. It also provides for exclusive rights to marks such as brand, label, and heading and to obtain relief in case of infringement for commercial purposes as a trade description. The Trade Marks Act prohibits registration of deceptively similar trademarks and provides penalties for infringement, falsifying or falsely applying trademarks.

Prevention of Money Laundering Act, 2002

Money laundering is the processing of criminal proceeds to disguise its illegal origin. Terrorism, illegal arms sales, financial crimes, smuggling, and the activities of organized crime, including drug trafficking and prostitution rings, generate huge sums. Embezzlement, insider trading, bribery and computer fraud also produce large profits and create an incentive to legitimize the ill-gotten gains through money laundering. When a criminal activity generates substantial profits, the individual or group involved in such activities route the funds to safe heavens by disguising the sources, changing the form, or moving the funds to a place where they are less likely to attract attention.

Most fundamentally, money laundering is inextricably linked to the underlying criminal activity that generates it. In essence, the laundering enables criminal activity to continue.

(B) Basis of Preparation of Financial Statement

The Restated Statement of Assets and Liabilities of the Company as on September 30, 2022, March 31, 2022, March 31, 2021 and March 31, 2020, and the Restated Statement of Profit and Loss and Restated Statements of Cash Flows for the financial year / period ended on September 30, 2022, March 31, 2022, March 31, 2021 and March 31, 2020 and the annexure thereto (collectively, the "Restated Financial Statements") have been compiled by the management from the Financial Statements of the Company for the financial year / period ended on September 30, 2022, March 31, 2022, March 31, 2021 and March 31, 2020.

These financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed under Section 133 of the Companies Act, 2013 ('Act') read with Rule 7 of the Companies (Accounts) Rules, 2014. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

(C) Significant Accounting Policies

1) Use of Estimates:

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported balances of assets and

liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and reported amounts of income and expenses during the period. Examples of such estimates include computation of percentage of completion which requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended, provisions for doubtful debts, future obligations under employee retirement benefit plans, income taxes, post-sales customer support and the use-full lives of fixed tangible assets and intangible assets. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

2) Fixed Assets & Depreciation:

Tangible Assets:

All items of fixed assets are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance expenses are charged to profit or loss during the reporting period in which they are incurred

Depreciation on fixed assets is provided on pro rata basis as per WDV method based on the estimated useful life of various assets, as specified in Schedule II of the Companies Act, 2013.

Intangible Assets:

An intangible asset is recognized when it is probable that the future economic benefits attributable to the asset will flow to the enterprise and where its cost can be reliably measured. Intangible assets are stated at cost of acquisition less accumulated amortization and impairment losses, if any. Cost comprises the purchase price and any cost attributable to bringing the assets to its working condition for its intended use which includes taxes and allocated incidental expenditure during development / acquisition and exclusive of Input tax credit (IGST/CGST and SGST) or other tax credit available to the Company.

Subsequent expenditure relating to intangible assets is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Assets Acquired as Lease:

Leases under which the Entity assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

The cost of leasehold land is amortized over the period of the lease. Leasehold improvements and assets acquired on finance lease are amortized over the lease term or useful life, whichever is lower.

Advances paid towards the acquisition of Property, Plant and Equipment

Advances paid towards the acquisition of Property, Plant and Equipment, outstanding at each balance sheet date are shown under capital advances. The cost of the Property, Plant and Equipment not ready for its intended use on such date, is disclosed under capital work-in-progress.

3) Impairment of Assets:

An asset is treated as impaired when the carrying cost of assets exceeds its recoverable value. Impairment loss is charged to the Statement of Profit and Loss in the year / period in which an asset is identified as impaired. The impairment loss recognized in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

MULTIPLE APPLICATIONS

An Applicant should submit only one Application (and not more than one). Two or more Applications will be deemed to be multiple Applications if the sole or First Applicant is one and the same.

- I. All applications are electronically strung on first name, address (1st line) and applicant's status. Further, these applications are electronically matched for common first name and address and if matched, these are checked manually for age, signature and father/ husband's name to determine if they are multiple applications

- III. Applications which do not qualify as multiple applications as per above procedure are further checked for common PAN. All such matched applications with common PAN are manually checked to eliminate possibility of data capture error to determine if they are multiple applications.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

In cases where there are more than 20 (Twenty) valid applications having a common address, such shares will be kept in abeyance, post allotment and released on confirmation of “know your client” norms by the depositories. The Company reserves the right to reject, in its absolute discretion, all or any multiple Applications in any or all categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction –Foreign Investment In India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Chapter 4 of the FDI Policy 2020 has to be obtained.

The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.
