SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia’s invasion of Ukraine—manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks' generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure. Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist.

INDIAN ECONOMY

Introduction

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localized lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimizing the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

2. *Some risks may have material impact qualitatively instead of quantitatively.*
3. *Some risks may not be material at present but may have a material impact in the future.*

INTERNAL RISK FACTORS:

1. ***100% of our revenues are generated from state of Gujarat. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.***

We derive 100% of our revenue from State of Gujarat. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India.

The concentration of our business in Gujarat subjects us to various risks, including but not limited to:

- Regional slowdown in construction activities in Gujarat;
- vulnerability to change of policies, laws and regulations or the political and economic environment of Gujarat;
- constraint on our ability to diversify across states; and
- perception by our potential clients that we are a regional construction company, which may hamper us from competing or securing orders for large and complex projects at the national level.

Further, factors such as competition, culture, regulatory regimes, business practices and customs, behaviour and preferences in the cities where we may plan to expand our operations may differ from Gujarat, and our experience in the Gujarat may not be applicable to these states. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national player, but also local players who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors,

suppliers, relevant government authorities, and who have access to existing market presence or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside Gujarat market may adversely affect our business prospects, financial conditions and results of operations.

If the economic conditions of State of Gujarat become volatile or uncertain or the conditions in the financial market were to deteriorate, especially in recent times due to the COVID-19 pandemic, or if there are any changes in laws applicable to our industry or if any restrictive conditions are imposed on us or our business, there will be a severe impact on the financial condition of our business. Further, the ultimate customers located in this geography may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions.

2. *The Company is dependent on few numbers of customers for sales. Loss of any of this large customer may affect our revenues and profitability.*

Our top ten customers contribute 73.96%, 81.03% and 81.28 % of our total sales for the financial year ended on March 31, 2023, 2022 and 2021, respectively. Our Company is engaged in the business of civil construction of residential and commercial projects. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

3. *The Company is dependent on few suppliers for purchase of product. Loss of any of these large suppliers may affect our business operations.*

Our top ten suppliers contribute 48.44%, 42.75%, and 53.09% of our total purchase for the financial year ended on March 31, 2023, 2022 and 2021, respectively. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seek new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

4. *We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.*

Other Litigation	--	--

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoter, our directors, see “*Outstanding Litigations and Material Developments*” beginning on page 185 of this Draft Red Herring Prospectus.

5. Our revenues from our projects are difficult to predict and are subject to seasonal variations.

Our business operations may be adversely affected by severe weather, which may require us to evacuate personnel or curtail services, may result in damage to a portion of our fleet of equipment or facilities resulting in the suspension of operations, and may prevent us from delivering materials to our project sites in accordance with contract schedules or generally reduce our productivity. Our operations may also be adversely affected by difficult working conditions and extremely high temperatures during summer months and during the monsoon season, each of which may restrict our ability to carry on construction activities and fully utilize our resources. These factors may make it difficult for us to prepare accurate internal financial forecasts. In addition, Business of our company is seasonal in monsoon and summer season, efficiency of construction work reduces during monsoon and summer season. As a result, our revenues and profits may vary significantly during different financial periods, and certain periods are not indicative of our financial position for the year.

6. We may be unable to identify or acquire new projects and our bids for new projects may not always be successful, which may stunt our business growth. Further, any delay in the commencement or cancellation of the projects awarded to us may adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.

Our revenues are derived primarily from contracts awarded to us on a project-by-project basis, and a significant number of projects in the construction industry are undertaken on a non-recurring basis.

In the event that we are not able to continually and consistently secure new projects of similar or higher value as the ones that we have executed in the past or are currently executing, and on terms and conditions that are favourable to us, our financial performance, our results of operations and cash flows may be adversely affected or fluctuate materially from time to time depending on the timing and nature of such contracts. Accordingly, it is difficult to predict whether and when we will be awarded a new project. If we are unable to identify or acquire new projects matching our expertise

or profit expectations or obtain the requisite consents from regulatory authorities or other relevant parties when required or at all, we may be subject to uncertainties in our business.

7. ***Any failure to accurately estimate the overall risks, revenues or costs in respect of a project, may adversely affect our profitability and results of operations. Our actual cost in executing a contract or in constructing a project may vary substantially from the assumptions underlying our bid. We may be unable to recover all or some of the additional expenses, which may have a material adverse effect on our results of operations, cash flows and financial condition.***

Under the terms and conditions of agreements for our projects, we generally agree to receive from the customers an agreed sum of money, subject to contract variations covering changes in the client's project requirements. We may enter into agreements for the construction of projects in the future which may not contain price escalation clauses covering increase in the cost of construction materials, fuel, labour and other inputs. Accordingly, our actual expense in constructing our construction projects may vary substantially from the assumptions underlying our bid for several reasons, including, but not limited to unanticipated increases in the cost of construction materials, fuel, labour or other inputs, unforeseen construction conditions, including the inability to obtain requisite approvals and licenses resulting in delays and increased costs, delays caused by local weather conditions and suppliers' failures to perform. Our ability to pass-on increases in the purchase price or the cost of raw materials and other inputs may be limited in the case of contracts with limited or no price escalation provisions and there can be no assurance that these variations in cost will not lead to financial losses to our Company. Further, other risks generally inherent to the construction industry may result in our profits from a project being less than as originally estimated or may result in us experiencing losses due to cost and time overruns, which could have a material adverse effect on our cash flows, business, financial condition and results of operations.

8. ***Failure to successfully implement our business strategies may materially and adversely affect our business, prospects, financial condition and results of operations.***

We aim to implement our business strategies to ensure future business growth, which may be subject to various risks and uncertainties, including but not limited to the following:

- Failure to maintain our competitive edge due to cost overruns or failure to execute our construction projects in a timely manner or according to quality specifications.
- intensified competition, delayed payments or non-payments by our clients and associated litigation or arbitration proceedings and inability to enforce escalation clauses in our construction contracts.
- failure to implement our bidding strategy.
- inability to make an efficient use of or improve our execution system or fail to maintain or operate our equipment bank, IT/ERP systems and centralized procurement system in an effective and efficient manner.
- lack of ability to properly manage financing resources and unavailability of funds at affordable costs or maintain financial discipline.
- adverse changes in applicable laws, regulations or policies or political or business environments.
- inability to diversify across states or into different business segments.
- lack of ability to recruit or retain skilled employees.
- failure to correctly identify market trends relating to the demand for our services, inability to carry out our strategy of acquiring new construction projects or optimize our existing project portfolio; and
- increases in costs of raw materials, fuel, labour and equipment and adverse movements in interest rates and foreign exchange rates.
- Corrupt Practices of Fraud or improper conduct

Implementation of our strategies may be subject to a number of risks and uncertainties including the ones mentioned above, some of which are beyond our control. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our

results of operations and our reputation. Any failure or delay in the implementation of any of our strategies may have a material adverse effect on our business, prospects, financial condition and results of operations.

9. *Obsolescence, destruction, theft, breakdowns of our major plants or equipment or failures to repair or maintain the same may adversely affect our business, cash flows, financial condition and results of operations.*

We own the equipment used in our operations also take on rental basis as per the requirement of business operations. As of March 31, 2023, our fleet of equipment comprised 332 machinery/equipment. To maintain our capability to undertake larger and more complex projects, we seek to purchase plants and equipment built with the latest technologies and knowhow and keep them readily available for our construction activities through careful and comprehensive repairs and maintenance.

However, we cannot assure you that we will be immune from the associated operational risks such as the obsolescence of our plants or equipment, destruction, theft or major equipment breakdowns or failures to repair our major plants or equipment, which may result in their unavailability, project delays, cost overruns and even defaults under our construction contracts. The latest technologies used in newer models of construction equipment may improve productivity significantly and render our older equipment obsolete.

Obsolescence, destruction, theft or breakdowns of our major plants or equipment may significantly increase our equipment purchase cost and the depreciation of our plants and equipment, as well as change the way our management estimates the useful life of our plants and equipment. In such cases, we may not be able to acquire new plants or equipment or repair the damaged plants or equipment in time or at all, particularly where our plants or equipment are not readily available from the market or requires services from original equipment manufacturers. Some of our major equipment or parts may be costly to replace or repair. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability of discounts. Although we believe that the amount of insurance currently maintained by us represents an appropriate level of coverage required to insure our plant and machinery, and is in accordance with current industry standards in India, there can no assurance that such obsolescence, destruction, theft, breakdowns, repair or maintenance failures or price increases may be adequately covered by such insurance policies availed by our Company and may have an adverse effect our business, cash flows, financial condition and results of operations.

10. *We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and the results of operations.*

As of March 31, 2023, we have ₹ 5,328.95 Lakhs of outstanding debt as per restated financials of the Company.

Our level of indebtedness has important consequences to us, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

11. *Our Company has availed unsecured loans which are repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows.*

As on March 31, 2023, our Company has unsecured loans amounting to ₹ 534.98 lakhs from directors of the company that are repayable on demand to them. Such loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lenders at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition. For further details of unsecured loans of our Company, please refer “Annexure 7 & 7.1” respectively under chapter titled “Restated Financial Information” beginning on page 174 of this Draft Red Herring Prospectus.

12. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured outstanding debt of ₹ 4,793.97 Lakhs as on March 31, 2023 and we have secured our lenders by creating charge over our movable and immovable properties. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders. It may have a material adverse effect on the business, cash flows and financial condition of our company. For further information on the financing and loan

agreements along with the total amounts outstanding, please refer to section titled “Restated Financial Information” on page 174 of this Draft Red Herring Prospectus.

13. *There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing or returns and deposit of statutory dues with the taxation and other statutory authorities.*

In the past, our company has at several instances, delayed in filing our GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees levied are small, if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

Further we have not complied with the reporting and provisioning requirements of AS-15 and our statutory auditor have accordingly qualified our audit report for the period of financials included in this draft prospectus. For further details of certain material legal proceedings involving our Company, our Promoter, our directors, see “*Financial Information*” beginning on page 174 of this Draft Red Herring Prospectus.

14. *There are certain discrepancies and non-compliances noticed in our statutory records and/or records relating to filing of returns and statutory expenses with the concerned Registrar of Companies.*

During the F.Y. 2021-20 and 2020-21 our company was required to make expenses towards Corporate Social Responsibility (CSR) to the eligible donee. However, Our Company has failed to make any such expenses during the relevant period. Moreover, the Company failed to transfer any of the relevant CSR amount to Investor Protection Fund / to the unspent CSR accounts opened in a scheduled bank. Further no reporting in respect of the unspent CSR amount has been made in the Annual report / the financial statements of the Company. Moreover, the Company has failed to file Form CSR-2 (return of CSR) in respect of CSR spent / unspent during the relevant years.

Although no show cause notice have been received in respect of non-compliance of Section 135 of the Companies Act, 2013 and rules made thereunder, in the event of any cognizance being taken, the Company may be subjected to a penalty of twice the amount required to be transferred by the company to the Fund specified in Schedule VII or the Unspent Corporate Social Responsibility Account, as the case may be, or one crore rupees, whichever is less, and every officer of the company who is in default shall be liable to a penalty of one-tenth of the amount required to be transferred by the company to such Fund specified in Schedule VII, or the Unspent Corporate Social Responsibility Account, as the case may be, or two lakh rupees, whichever is less.

The Company has, however, during F.Y. 2022-23 transferred the requisite CSR amount to eligible donees and due receipts in respect of same have been obtained. For further details with respect to financial implications and restatements made in respect applicable CSR, see “*Financial Information*” beginning on page 174 of this Draft Red Herring Prospectus.

15. *Our success depends largely on the skill, experience and continued efforts of our senior management, skilled professionals and unskilled workers and our ability to attract and retain skilled and unskilled personnel.*

We depend significantly on the expertise, experience and continued efforts of the members of our senior management team and other key employees. Our continued success also depends upon our ability to attract and retain a large group of skilled professionals and staff, particularly project managers, engineers, and skilled workers. For instance, we believe that our Chairman and Managing Director namely Mahesh Gunvantlal Chavda, who has over more than 30 years of experience in the business of construction, has played a significant role in the development of our business, and we benefit from his technical expertise, industry knowledge and customer relationships. Further, our management team also comprises of a number of qualified, experienced and skilled professionals who have several years of experience across various sectors. Our Company is heavily dependent on the members of our senior management for business development and acquiring new projects, and any inability of these members to execute their responsibilities could result in a loss of business.

The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. Competition for senior management in the industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future, particularly in Ahmedabad, Gujarat, where our registered office is located. We believe that as a result of the recent growth in the construction industry in India and the expected future growth, the demand for both skilled professionals and staff and unskilled workers has significantly increased in recent years. We may lose skilled workers to competing employers who pay higher wages or be forced to

increase the wages to be paid to our employees. If we cannot hire or retain enough skilled professionals or unskilled workers, our ability to bid for and execute new projects or to continue to expand our business will be impaired and consequently, our revenues could decline. Any such loss of the services of our senior management personnel or skilled professionals could adversely affect our business, prospects, financial condition and results of operation.

16. *We may be seriously affected by delays in the collection of receivables from our clients and may not be able to recover adequately on our claims.*

There may be delays in the collection of receivables from our customers or entities owned, controlled or funded by our customers or their related parties. Because of the nature of our contracts, we sometimes commit resources to projects prior to receiving adequate payments from clients in amounts sufficient to cover expenditures as they are incurred. From time to time, it may be difficult for us to collect payments owed to us by these clients. In addition, our clients may request extension of the payment terms otherwise agreed to under our contracts. As of March 31, 2023, out of total trade receivables ₹ 4,141.05 Lakhs, ₹ 2,354.96 Lakhs (constituting approximately 56.87% of our total trade receivables) had been outstanding for a period exceeding six months from their respective due dates. Additionally, we may claim for more payments from our clients for additional work and costs incurred in excess of the contract price or amounts not included in the contract price. These claims typically arise from changes in the initial scope of work or from delays caused by the clients. The costs associated with these changes or client caused delays include additional direct costs, such as labour and material costs associated with the performance of the additional work, as well as indirect costs that may arise due to delays in the completion of the project, such as increased labour costs resulting from changes in labour markets.

We may not always have the protection of escalation clauses in our construction contracts or supplemental agreement in respect of the additional work to support our claims. Where we have escalation clauses in our agreements, we may seek to enforce our contractual rights. However, our clients may interpret such clauses restrictively and dispute our claims. These claims are thus often subject to lengthy arbitration, litigation or other dispute resolution proceedings. We cannot assure you that we may be able to recover, in part or full, any such present or future claims. Further, our debtors may have insufficient assets to pay the amounts owed to us even if such proceedings are decided in our favour. In addition, we may incur substantial costs in collecting against our debtors and such costs may not be recovered in full or at all from the debtors. As we often need to fulfill significant working capital requirements in our operations, delayed collection of receivables or inadequate recovery on our claims could materially and adversely affect our business, cash flows, financial condition and results of operations.

Further, some of the projects that we are currently undertaking, and propose to undertake in the future, are projects with relatively longer gestation periods, which have inherent risks flowing from uncertainty in the business environment. Changes in the business environment and external economic factors can affect the creditworthiness of our clients. Unfavourable changes may lead to weakening of their creditworthiness which has a negative impact on their paying capacities. This can result in delayed payments made to us. Delays in our payments can adversely affect the cash flow position as well as the revenues or profits of our Company, consequently affecting its business and operations.

17. *A significant number of our project contracts prescribe a requirement for maintaining retention money during the defects liability period. Any dispute or failure to obtain a release of such retention monies in a timely manner or at all may have an adverse impact upon our profitability, results of operations and financial position.*

A significant number of the projects that we have undertaken, or currently undertake, prescribe a requirement for maintaining retention money during the defects liability period. The defects liability period typically commences upon the provision of the virtual or final completion certificate to us by our customers, and usually extends to a period of 12 months post the date of such certification. There can be no assurance that such retention money will be remitted by our clients to us on a timely basis or at all. We may make provisions for bad debts, which includes those arising from release of retention money. We may be unable to efficiently manage the level of bad debt arising from such payment practices. Any failure to obtain a release of such retention monies in a timely manner, or at all, may have an adverse impact upon our profitability, results of operations and financial position.

18. *We may need to raise additional capital in the future for working capital and we may not be able to do so on favorable terms or at all, which would impair our ability to operate our business or achieve our growth objectives, which may have an adverse effect on our results of operations and business.*

Our business requires us to raise funds from various sources and we have significant working capital requirements to undertake a variety of activities for the successful implementation of the projects, such as the purchase or manufacturing of raw materials and mobilization of resources, before the aggregate payment is received from clients. Further, delays in completion of our current projects can also raise our working capital requirements resulting from

increased financing costs including increased costs of raw materials causing us to exceed our budget. It is generally difficult to predict whether or when a particular contract we have bid for will be awarded to us and the time period within which we will be required to mobilize our resources for the execution of such contract. Any increase in the number and size of the projects awarded to us will result in a further increase in our working capital requirements. Additionally, our working capital requirements may increase if, in certain contracts, payment terms include reduced advance payments or payment schedules that specify payment towards the end of the project or are less favorable to us.

Our estimated requirements for working capital is based on certain assumptions, including the period of commencement and timeframe for execution of a project. Any change of such assumptions would result in changes to our working capital requirements. Additionally, our requirement for working capital may vary from that estimated in the section “Objects of the Issue” in this Draft Red Herring Prospectus, leading to a shortfall in the working capital requirement at our end. Accordingly, our working capital estimates may prove to be inaccurate and consequently, there may be insufficient arrangements with respect to the net proceeds from the issue, borrowings, bank finance or institutional finance. Thus, we may need to incur additional indebtedness in the future to satisfy our working capital requirements. Our working capital needs thus require continued access to significant amounts of capital on acceptable terms in the future as well. There can be no assurance that we will be successful in obtaining the adequate working capital which will adversely affect our cash flows, business, results of operation and financial condition.

19. *Our business is capital intensive and is significantly dependent on the availability of real estate financing in India. Difficult conditions in the global capital markets and the global economy generally may adversely affect our business and results of operations and may cause us to experience limited availability of funds. We cannot assure you that we will be able to raise sufficient financing on acceptable terms, or at all.*

Our business is capital intensive, requiring substantial capital to develop and market our projects. The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our projects, changes in business plans due to prevailing economic conditions, unanticipated expenses, regulatory changes, and engineering design changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing, if available, could increase our interest cost and require us to comply with additional restrictive covenants in our financing agreements. In addition, the Indian regulations on foreign investment in housing, built-up infrastructure and construction and development projects impose significant restrictions on us, including the types of financing activities we may engage in. Our ability to obtain additional financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- Our results of operations and cash flows;
- The amount and terms of our existing indebtedness;
- General market conditions in the markets where we operate; and
- General condition of the debt and equity markets.

In addition, changes in the global and Indian credit and financial markets may affect the availability of credit to our customers and decrease in demand for our development. Our inability to obtain funding on reasonable terms, or at all, would have an adverse effect on our business and results of operations.

20. *Our order book may not be representative of our future results and projects included therein and future projects may be delayed, modified or cancelled for reasons beyond our control, which may materially and adversely affect our business, prospects, reputation, profitability, financial condition and results of operations.*

We define order book as anticipated revenues from uncompleted portions of existing contracts as of a certain date. As of May 31, 2023, we have 26 on-going projects worth approximately ₹ 60,139 lakhs, suggesting our strong order book. Out of 26 on-going projects 4 are commercial Projects, 4 are institutional projects and 18 are residential projects.

However, project delays, modifications in the scope or cancellations may occur from time to time due to either a client’s or our fault, incidents of force majeure or legal impediments. We may incur significant additional costs due to project delays and our counterparties may seek liquidated damages due to our failure to complete the required milestones or even terminate the construction contract totally. The schedule of completion may need to be reset and we may not be able to recognize revenue if the required percentage of completion is not achieved in the specified timeframe. We may not have the full protection in our construction contracts or concession agreements against such delays or associated liabilities and/or additional costs. Further, we may have escalation clauses in some of our contracts, which, may be interpreted restrictively by our counterparties, who may dispute our claims for additional

costs. As a result, our future earnings may be different from the amount in the order book. Our contracts may be amended, delayed or cancelled before work commences or during the course of construction. Due to unexpected changes in a projects scope and schedule, we cannot predict with certainty when or if expected revenues as reflected in the order book will be achieved. If any or all of these risks materialize, our business, prospects, reputation, profitability, financial condition and results of operation may be materially and adversely affected.

- 21. *We source a large part of our new orders from our relationships with corporates and other customers, both present and past. Any failure to maintain our long-standing relationships with our existing customers or forge similar relationships with new ones would have a material adverse effect on our business operations and profitability.***

We believe that our focus on completing projects in a timely manner and on quality has helped us build strong relationships with our customers and bolster our reputation in the industry in which we operate. In fact, all of the projects that we execute for private sector clients are sourced through nomination i.e. where customers with whom we have an existing relationship or new customers approach us directly for their proposed projects. Further, we have received additional projects from several of our existing customers despite increased competition in the region within which we operate. If any of our relationships with our existing customers were to be altered or terminated and we are unable to forge similar relationships with new customers in the future, our business, financial condition, results of operations, cash flows and business prospects could be materially and adversely affected.

- 22. *If we are not successful in managing our growth, our business may be disrupted, and our profitability may be reduced.***

We have experienced high growth in recent years and expect our businesses to continue to grow significantly. As per the Restated Financial Statements, in FY 2020-21, FY 2021-22 and FY 2022-23 the Company's total revenue from operations was ₹ 9123.79 Lakhs, ₹ 10,982.44 and ₹ 16188.57 Lakhs respectively, and the Company's profit after tax, as restated, for the aforesaid periods was ₹ 443.84 Lakhs, ₹ 521.46 Lakhs and Lakhs 1,204.62 Lakhs respectively.

We expect this growth to place significant demands on us and require us to continuously evolve and improve our operational, financial and internal controls. Our future growth is subject to risks arising from an inability or inefficiencies in execution of projects in the event of a rapid increase in order volume, inadequacy or inability to obtain working capital in line with our business requirements, and the inability to retain and recruit skilled staff. Although we plan to continue to expand our scale of operations, we may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit.

- 23. *Our Promoter and members of Promoter Group have provided their personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.***

Our Promoter, members of promoter group have provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked by promoter, members of Promoter group or third party, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities.

We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

- 24. *We face significant competition and if we fail to compete effectively, our business, prospects, financial condition and results of operations will be adversely affected.***

We operate in a competitive environment and our industry has been frequently subject to intense price competition for the acquisition and bidding of projects. Our competition varies depending on the size, nature and complexity of the project and on the geographical region in which the project is to be executed. We compete against major construction companies at the national and local levels and in multiple segments of construction business. For further details, please see the section entitled "Business Overview- Competition" on page 112. While service quality, technological capacity and performance, health and safety records and personnel, as well as reputation and experience, are important considerations in clients' decisions, price is a major factor in most contract awards. We may thus be compelled to bid for new projects more aggressively than we expected and may accept terms and conditions that are not in our favour. If we fail to win new projects, we may not be able to increase, or maintain, our volume of business or revenues. Failure to compete effectively against our current or future competitors may have a material and adverse effect on our business, financial condition and results of operation.

Further, some of our competitors may be larger than us, have stronger financial resources or a more experienced management team, or have stronger engineering capabilities in executing technically complex projects. They may also benefit from greater economies of scale and operating efficiencies and may have greater experience in construction business. Further, the premium placed on having experience may cause some of the new entrants to accept lower margins in order to be awarded a contract. We may also decide not to participate in some projects as accepting lower margins may not be financially viable and this may adversely affect our competitiveness to bid for and win future contracts. We cannot assure you that we can continue to compete effectively with our competitors in the future, and failure to compete effectively against our current or future competitors may have an adverse effect on our business, results of operations and financial condition. Competition can place downward pressure on our contract prices and profit margins, and may force us to accept contractual terms and conditions that are not normal or customary for us, thereby increasing the risk that we may have losses on such contracts. Intense competition is expected to continue in these markets, presenting us with significant challenges in our ability to maintain strong growth rates and acceptable profit margins. If we are unable to meet these competitive challenges, we could lose market share to our competitors and experience an overall reduction in our profits.

- 25. *We engage sub-contractors and other agencies in our business. The timely and successful completion of our projects in certain cases depends upon the cooperation of our sub-contractors, and any failure or delay in successful completion could adversely affect the quality of our developments and adversely affect our profitability, business and reputation.***

We rely on third parties for the implementation of projects where we have entered into arrangements with them for the supply of labour, equipment and raw material. Accordingly, the timing and quality of construction of our projects also depends on the availability and the skill of such sub-contractors. Typically, construction contracts are subject to specific completion schedule requirements with liquidated damages chargeable in the event that a project falls behind schedule. Thus, where we sub-contract any part of a project, the completion of the project in a timely manner often depends, in part, upon the performance of our sub-contractors. Delay or failure on the part of sub-contractors to complete their work on time, for any reason, could result in additional costs to us and damage to our reputation.

Additionally, the amount of such additional costs could have an adverse effect on our profit margins on the project. While we may seek to recover these amounts as claims from the relevant supplier, vendor, sub-contractor or other third party responsible for the delay or for providing non-conforming products or services, we cannot assure you that we will recover all or any part of these costs in all circumstances. Performance problems for existing and future projects could cause our actual results of operations to differ materially from those anticipated by us and could damage our reputation within our industry and consequently, have a detrimental effect on our customer base.

- 26. *Our reliance on raw material suppliers for our business operations exposes us to a variety of risks which could materially disrupt our operations.***

Timely and cost effective execution of our projects is dependent on adequate and timely supply of raw materials, chief amongst them being steel, cement, Concrete, Brick etc... We have not entered into any long term contracts or supply arrangements with any of the Company's suppliers and if, for any reason, the Company's primary suppliers should curtail or discontinue their delivery of such materials in the quantities needed, the Company's ability to meet its material requirements for construction contracts could be impaired, its construction schedules could be disrupted, and the Company may not be able to complete construction contracts as per schedule or at such costs that were anticipated.

If the Company is unable to procure the requisite quantities of construction materials in time and at commercially acceptable prices, the performance of its financial results and business prospects could be adversely affected.

- 27. *While executing projects with relatively longer gestation periods, we face various kinds of implementation risks and our inability to successfully manage such risks may have an adverse impact on the functioning of our business.***

Over the years, the scale and complexity of our projects has gradually increased, and we seek to continue to focus on projects with higher contract value. Going forth, we intend to actively access available leverage opportunities to bid for larger and more prestigious projects, with opportunities for potentially higher margins. Because a significant portion of our revenue is generated from large projects, our results of operations can fluctuate quarterly and annually depending on whether and when large project awards occur and the commencement and progress of work under large contracts already awarded. However, typically such projects involve a longer construction period and thus, gestation period. Risks inherent in projects with relatively longer gestation periods can substantially restrict our Company's and the relevant project's operational and financial flexibility. Such risks may not necessarily be within our control and accordingly our exposure to a variety of implementation and other risks, including construction delays, material shortages, unanticipated cost increases, cost overruns, inability to negotiate satisfactory arrangements with joint venture partners, and disagreements with our joint venture partners is enhanced. For example, business circumstances

may materially change over the life of one or more of our agreements and we may not have the ability to modify our agreements to reflect these changes or negotiate satisfactory alternate arrangements. Further, being committed under these agreements may restrict our ability to implement changes to our business plan. This limits our business flexibility, exposes us to an increased risk of unforeseen business and industry changes and could have a material adverse effect on our business, financial condition and results of operations. There is no assurance that there will be effective and timely cost management and that such larger projects will be able to generate result in higher margins, in which case there will be an adverse impact on the functioning of our revenues, business and profitability.

28. *We could be adversely affected if we fail to keep pace with technical and technological developments in the construction industry.*

Our recent experience indicates that clients are increasingly developing larger, more technically complex projects using more advanced technologies. Our future success will depend, in part, on our ability to respond to technological advances and emerging technology standards and practices on a cost-effective and timely basis. To meet our clients' needs, we need to continuously update existing technology and equipment for our construction services. To meet our clients' needs, we must continuously update our existing systems and develop new technologies for our construction projects. In addition, rapid and frequent technological and market demand changes can often render existing technologies and equipment obsolete and result in requirements for additional and substantial capital expenditures and/or significant write downs of our assets. The cost of upgrading or implementing new technologies, upgrading our existing equipment or expanding capacity could be significant. If we fail to anticipate or respond adequately to our clients' changing requirements or keep pace with the latest technological developments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

29. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.*

As of May 31, 2023, the size of our workforce comprised more than 210 employees. Our operations depend upon the productivity of our workforce, which may be affected by labour disputes involving our sub-contractors or employees. We may experience business disruptions due to strikes, work stoppages or demands for wage increases. Labor unions may order their members to stop working at our construction sites or allege violations of employee rights, laws or agreements. Currently, we do not have any organized union activities. Construction activities at our worksites may be suspended and our projects may be significantly delayed if we fail to negotiate with the sub-contractors, employees or labour unions, or find acceptable solutions in a timely manner. Sometimes, we may engage independent contractors to assist us in undertaking our projects. It is possible that we may be held responsible for wage payments to the workers engaged by such independent contractors should they default on wage payments. Furthermore, under the Contract Labour (Regulation and Abolition) Act, 1970 ("CLRA"), we may be required to recruit some of these workers as permanent employees. Any such labour disputes, union activities or requirements to fund wage payments or recruit permanent employees could adversely affect the construction progress of our projects and have a material and adverse effect on our business, financial condition and results of operations.

30. *We require certain regulatory and statutory approvals and licenses required in the ordinary course of our business, and the failure to obtain, maintain and renew these approvals in a timely manner or at all, may adversely affect our business and operations.*

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and certain applications have been made at the appropriate stages to the relevant authorities for operating our business. If we fail to obtain, maintain and renew any of such approvals or licenses, in a timely manner or at all, the projects for which such licenses are required, and our business may be adversely affected. Furthermore, in our construction business, government delays in obtaining approvals may result in cost increases in the price of construction materials from original estimates which cannot generally be passed on to clients and may also adversely affect our ability to mobilize our equipment and manpower. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. Our government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and require substantial expenditure. If we fail to comply, or a regulator claims we have not complied, with these conditions, our business, financial conditions and results of operations would be materially adversely affected. For further information, please see the section titled "Government and Other Approvals" on page 192 of this Draft Red Herring Prospectus.

31. *We depend on our corporate name and logo that we may not be able to protect and/or maintain. We have not obtained the registration of the trademarks used in our business operations and our inability to obtain or maintain such registration may adversely affect our competitive business position. Our inability to protect or use our intellectual property rights may adversely affect our business.*

Our logo  is not registered in the name of our company. Our Company has filed applications for the registration of the trademarks it utilizes for its business operations with the Trademarks Registry at Ahmedabad, under class 19 & 37 of the Indian Trademarks Rules, 2002. There can be no assurance that we will be able to obtain the registration of our trademarks in a timely manner, or at all. If our unregistered trademarks are registered in favour of a third party, we may not be able to claim registered ownership of such trademarks and consequently, we may be unable to seek remedies for infringement of such trademarks by third parties other than relief against passing-off by other entities. Further, we understand that our applications for registration have been objected, and if such objection is upheld, we will not have the right to use such trademarks or prevent others from using such trademarks or its variations. We have submitted our response to such objections. There is no assurance that we will be able to obtain or maintain such trademarks in our business which may adversely affect our reputation, goodwill, business, prospectus and results of operations. For further information, see the section entitled “Government and Other Approvals” on page 192 of this Draft Red Herring Prospectus.

32. We may not maintain historical dividends in the future.

While we have paid dividends in the past, there can be no assurance as to whether we will pay dividends in the future and, if so, the level of such future dividends. Our declaration, payment and amount of any future dividends are subject to the discretion of the Board, and will depend upon, among other factors, our earnings, financial position, cash requirements and availability of profits, as well as the provisions of relevant laws in India from time to time. Additionally, our ability to pay dividends is and may be subject to restrictive covenants contained in the financing related agreements we have entered into and will enter into in the future. For further details, please see the section entitled “Dividend Policy” on page 173 of this Draft Red Herring Prospectus.

33. We may be subject to third-party indemnification, liability claims or invocation of guarantees, which may adversely affect our business, cash flows, results of operations and reputation.

In the event that such third parties successfully invoke these indemnity clauses under their respective agreements, we may be liable to compensate them for loss or damage suffered in respect of such agreements, which may adversely affect our financial condition. We may be subject to claims resulting from defects in our developments, including claims brought under the RERA. See “Key Industry Regulation” on page 149. For details concerning litigation involving claims from defaults of our developments, see “Outstanding Litigation and Material Development” on page 185. These liabilities and costs could have an adverse effect on our business, cash flows, results of operations and reputation.

As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and in circumstances where our respective interests diverge. Further, our Company has not entered into separate non-compete agreement in order to avoid the conflict of interest envisaged with our group company Chavda Developers Private Limited. In addition, some of our directors are also directors on the boards of some of our group companies. These overlapping directorships could create conflicts of interest between us and the Promoter.

We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations. For further details of conflict of interest please refer chapter titled “Information with respect to Group Companies/Entities” on page no 199 of this Draft Red Herring Prospectus.

39. *Our Promoter and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Issue, our Promoter and Promoter Group will collectively own 73.00% of our post issue equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

40. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

41. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” of this Draft Red Herring Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use substantial portion of the Net Issue Proceeds towards meeting the working capital requirement. We intend to deploy the Net Issue Proceeds in financial year 2023-24 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” on page 81 of this Draft Red Herring Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” on page 81 of this Draft Red Herring Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

42. *In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “Objects of The Issue” on Page no. 81 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

43. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and

financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled “*Object for the Issue*” beginning on page 81 of this Draft Red Herring Prospectus.

44. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

45. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

Additionally, we may not be permitted to declare any dividends under the loan financing arrangement that our Company may enter into future, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

46. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange could lead to imposition of huge penalties, if any including suspension of trading, imposed by Stock Exchange.

47. *Our insurance coverage may not adequately protect us against possible risk of loss.*

While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks and are subject to exclusions and deductibles. If any or all of our facilities or project sites are damaged, in whole or in part, and our operations are interrupted for a sustained period due to fire and similar perils, there can be no assurance that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption or the costs of repairing or replacing the facilities and project sites. If we suffer a large uninsured loss or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

48. *Third party statistical and financial data in this Prospectus may be incomplete or unreliable.*

EXTERNAL RISK FACTORS

1. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees or shut down our manufacturing facilities as a health measure, which could have an adverse effect on our business operations or result in a delay in the production and supply of products to our customers in a timely manner. If any of our suppliers are affected by COVID-19 to the extent our supply chain is disrupted, this may affect our ability to meet the demand of our customers.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the disruptions or restrictions on our employees’ and suppliers’ ability to work and travel; volatility in foreign exchange rates; any extended period of remote work arrangements; and strain on our or our customers’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

2. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed [●] as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

3. *Increase in competition in the Indian real estate market may adversely affect our profitability.*

Our business faces competition from both national and local property developers with respect to factors such as location, facilities and supporting infrastructure, services and pricing. Intensified competition between property developers may result in increased land prices, oversupply of properties, lower real estate prices, lower sales at our properties, all of which may adversely affect our business. Moreover, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that increased competition will not have an adverse effect on our profitability.

4. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Red Herring Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

5. *Our operations are subject to environmental, health and safety laws and regulations.*

Our operations are subject to various Central and State environmental laws and regulations relating to the control of pollution in the various locations in India where we operate. In particular, the discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liability to the Government and third parties, and may result in our incurring costs to remedy such discharge or emissions. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on us or result in the need for additional investment in pollution control equipment, either of which could adversely affect our business, financial condition or prospects. While as of the date of this Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. Such legal proceedings could divert management time and attention, and consume financial resources in Defense or prosecution of such legal proceedings or cause delays in the construction, development or commencement of operations of our projects. No assurance can be given that we will be successful in all, or any, of such proceedings.

6. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

7. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

8. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

9. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

10. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

11. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

12. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

GLOBAL OUTLOOK

The global economy is yet again at a highly uncertain moment, with the cumulative effects of the past three years of adverse shocks—most notably, the COVID-19 pandemic and Russia’s invasion of Ukraine—manifesting in unforeseen ways. Spurred by pent-up demand, lingering supply disruptions, and commodity price spikes, inflation reached multidecade highs last year in many economies, leading central banks to tighten aggressively to bring it back toward their targets and keep inflation expectations anchored.

Although telegraphed by central banks, the rapid rise in interest rates and anticipated slowing of economic activity to put inflation on a downward path have, together with supervisory and regulatory gaps and the materialization of bank-specific risks, contributed to stresses in parts of the financial system, raising financial stability concerns. Banks’ generally strong liquidity and capital positions suggested that they would be able to absorb the effects of monetary policy tightening and adapt smoothly. However, some financial institutions with business models that relied heavily on a continuation of the extremely low nominal interest rates of the past years have come under acute stress, as they have proved either unprepared or unable to adjust to the fast pace of rate rises.

The unexpected failures of two specialized regional banks in the United States in mid-March 2023 and the collapse of confidence in Credit Suisse—a globally significant bank—have roiled financial markets, with bank depositors and investors reevaluating the safety of their holdings and shifting away from institutions and investments perceived as vulnerable. The loss of confidence in Credit Suisse resulted in a brokered takeover. Broad equity indices across major markets have fallen below their levels prior to the turmoil, but bank equities have come under extreme pressure (Figure 1.1). Despite strong policy actions to support the banking sector and reassure markets, some depositors and investors have become highly sensitive to any news, as they struggle to discern the breadth of vulnerabilities across banks and nonbank financial institutions and their implications for the likely near-term path of the economy. Financial conditions have tightened, which is likely to entail lower lending and activity if they persist.

Prior to recent financial sector ructions, activity in the world economy had shown nascent signs of stabilizing in early 2023 after the adverse shocks of last year (Figure 1.2, panels 1 and 2). Russia’s invasion of Ukraine and the ongoing war caused severe commodity and energy price shocks and trade disruptions, provoking the beginning of a significant reorientation and adjustment across many economies. More contagious COVID-19 strains emerged and spread widely. Outbreaks particularly affected activity in economies in which populations had lower levels of immunity and in which strict lockdowns were implemented, such as in China. Although these developments imperiled the recovery, activity in many economies turned out better than expected in the second half of 2022, typically reflecting stronger-than-anticipated domestic conditions. Labor markets in advanced economies—most notably, the United States—have stayed very strong, with unemployment rates historically low. Even so, confidence remains depressed across all regions compared with where it was at the beginning of 2022, before Russia invaded Ukraine and the resurgence of COVID-19 in the second quarter.

With the recent increase in financial market volatility and multiple indicators pointing in different directions, the fog around the world economic outlook has thickened. Uncertainty is high, and the balance of risks has shifted firmly to the downside so long as the financial sector remains unsettled. The major forces that affected the world in 2022—central banks’ tight monetary stances to allay inflation, limited fiscal buffers to absorb shocks amid historically high debt levels, commodity price spikes and geo-economics fragmentation with Russia’s war in Ukraine, and China’s economic reopening—seem likely to continue into 2023. But these forces are now overlaid by and interacting with new financial stability concerns. A hard landing—particularly for advanced economies—has become a much larger risk. Policymakers may face difficult trade-offs to bring sticky inflation down and maintain growth while also preserving financial stability.

Inflation is declining with Rapid Rate Rises but Remains Elevated amid Financial Sector Stress

Global headline inflation has been declining since mid-2022 at a three-month seasonally adjusted annualized rate (Figure 1.3). A fall in fuel and energy commodity prices, particularly for the United States, euro area, and Latin America, has contributed to this decline (see Figure 1.SF.1). To dampen demand and reduce underlying (core) inflation, the lion’s share of central banks around the world have been raising interest rates since 2021, both at a faster pace and in a more synchronous manner than in the previous global monetary tightening episode just before the global financial crisis (Figure 1.4). This more restrictive monetary policy has started to show up in a slowdown in new home construction in many countries (see Box 1.1). Inflation excluding volatile food and energy prices has been declining at a three-month rate— although at a slower pace than headline inflation—in most (though not all) major economies since mid-2022.

Even so, both headline and core inflation rates remain at about double their pre-2021 levels on average and far above target among almost all inflation-targeting countries. Moreover, differences across economies reflect their varying exposure to underlying shocks. For example, headline inflation is running at nearly 7 percent (year over year) in the euro area—with some member states seeing rates near 15 percent—and above 10 percent in the United Kingdom, leaving household budgets stretched.

(Percent, three-month moving average; SAAR)

Note: The figure shows the distribution of headline and core CPI inflation developments across 18 advanced economies and 17 emerging market and developing economies. Core inflation is the percent change in the consumer price index for goods and services, but excluding food and energy (or the closest available measure). For the euro area (and other European economies for which data are available), energy, food, alcohol, and tobacco are excluded. The shaded band depicts the 25th to the 75th percentiles of the cross-economy distribution of the indicated inflation measure. The 35 economies in the sample for the figure account for about 81 percent of 2022 world output. CPI = consumer price index; SAAR = seasonally adjusted annualized rate.

AEs = advanced economies; EMDEs = emerging market and developing economies; GFC = global financial crisis; PPPGDP = nominal gross domestic product in purchasing-power-parity International dollars.

in Ukraine Persists

The shock of Russia’s invasion of Ukraine in February 2022 continues to reverberate around the world. Economic activity in Europe in 2022 was more resilient than expected given the large negative terms-of-trade fallout from the war and associated economic sanctions. Large budgetary support measures for households and firms—on the order of about 1.3 percent of GDP (net budgetary cost) in the case of the European Union—were deployed to help them weather the energy crisis. The stinging hike in prices galvanized a reorientation of gas flows, with marked increases in non-Russian pipeline and liquefied natural gas deliveries to Europe, alongside demand compression in the context of a mild winter and adjustments by industries to substitute for gas and to change production processes where feasible. Oil and gas prices also began trending downward from their peaks in mid-2022. Together, these actions and channels have dampened the negative effects of the energy crisis in Europe, with better-than-expected levels of consumption and investment in the third quarter of 2022.

Commodity Shocks Unwinding Even as Russia’s War

Beyond Europe, a broad decline in food and energy prices in the fourth quarter of 2022—although prices are still high—has brought some relief to consumers and commodity importers, contributing to the fall in headline inflation. Sustaining lower prices this year will depend on the absence of further negative supply shocks.

INDIAN ECONOMY

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the

Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world’s second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year’s capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalized public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower’s funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localized lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimizing the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

India’s Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite

the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India’s underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

Figure I.17: India growth projections by various agencies for FY23

Source: Various Agencies

Note: ADB stands for Asian Development Bank, IMF is International Monetary Fund

India’s economic resilience can be seen in the domestic stimulus to growth seamlessly replacing the external stimuli. The growth of exports may have moderated in the second half of FY23. However, their surge in FY22 and the first half of FY23 induced a shift in the gears of the production processes from mild acceleration to cruise mode. Manufacturing and investment activities consequently gained traction. By the time the growth of exports moderated, the rebound in domestic consumption had sufficiently matured to take forward the growth of India’s economy. Private Consumption as a percentage of GDP stood at 58.4 per cent in Q2 of FY23, the highest among the second quarters of all the years since 2013-14, supported by a rebound in contact-intensive services such as trade, hotel and transport, which registered sequential growth of 16 per cent in real terms in Q2 of FY23 compared to the previous quarter.

Although domestic consumption rebounded in many economies, the rebound in India was impressive for its scale. It contributed to a rise in domestic capacity utilisation. Domestic private consumption remains buoyant in November 2022, as indicated by Motilal Oswal’s Economic Activity Index. The index estimates that private consumption grew at a five-month high pace of 5.6 per cent YoY, driven by auto sales and broad-based expansion of services.

We believe that our execution capabilities comprising strong in-house operations consisting of design, engineering, procurement, construction and quality assurance teams, is a critical factor that has contributed to growth story of our company. Our track record in construction of projects has been instrumental in our consistent sales and performance. Our construction management team ensures efficient and rapid construction and completion of our projects, our quality assurance team ensures the quality construction of our projects, and our procurement team works with vendors who have the scale to deliver and meet our requirements to procure construction materials and equipment. We place significant emphasis on cost management and rigorously monitor our projects to ensure that they are completed within committed timelines and budgeted amounts. As a result of our end-to-end execution capabilities and in-house resources, we are able to complete our projects at competitive cost as well as create value for future projects through our efficient supply chain, which enables us to benefit from economies of scale.

3. Optimal Utilization of Resources

Our company constantly endeavours to improve our execution process, capabilities, skill up gradation of employees, modernization of plant and machineries to optimize the utilization of resources. We regularly analyse our material procurement policy and project execution process to de-bottle neck the grey areas and take corrective measures for smooth and efficient working thereby putting resources to optimal use.

4. Visible growth through a robust order book

In our industry, an order book is considered one of the key indicators of future performance as it represents a portion of anticipated future revenue. Our strategy is not focused solely on order book addition but, rather, on adding quality projects with potentially higher margins and/or prestigious projects that help enhance our growing reputation. By diversifying our skill set and order book across different sectors, we are able to pursue a broader range of project tenders and consequently, optimize our business volume and profit margins. The Company's total order book as of March 31, 2023, was ₹ 715.34 Crores.

5. Long-standing relationships with our customers

We believe that our reputation for completing projects in a timely manner and our focus on quality has helped us build strong relationships with our customers. We have completed or are currently undertaking projects for a number of reputed clients.

BUSINESS STRATEGY

1. Continue to enhance our project execution capabilities

We intend to continue our focus in enhancing project execution capabilities so as to derive twin benefits of client satisfaction and improvements in operating margins. We will constantly endeavour to leverage our operating skills through our equipment and project management tools to increase productivity and maximize asset utilization in our ongoing projects. We believe that we have developed a reputation for undertaking challenging projects and completing such projects in a timely manner. We intend to continue our focus on performance and project execution ability in order to maximize our operating margins. To facilitate efficient and cost-effective decision making, we intend to continue to strengthen our internal systems. Our ability to effectively manage projects will be crucial to our continued success.

2. Leveraging our market skills and relationship

The business of our Company is customer oriented and always strives to maintain good relationship with the marketers. Leveraging our market skills and relationships is a continuous process in our organization and the skills that we impart in our people give importance to customers. We aim to do this by leveraging our operations expertise as well as marketing skills and our industry relationships.

3. Maintaining edge over competitors

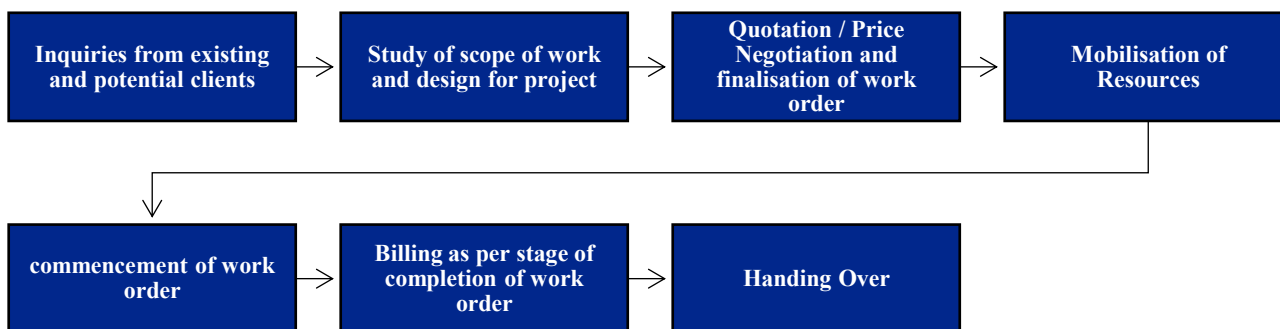

We intend to continue to enhance & scale in existing executional capabilities to provide best quality construction to our clients. By enhancing our executional capabilities, we intend to maintain edge over our competitors. In order to maintain our competitive edge, we will continue to add best construction equipment, skilled labours and good quality materials.

4. Expand our geographical footprint.

We intend to expand our geographical footprint and grow our business by increasing orders from outside of Gujarat. To control diversification risks, we may at first, limit our expansion to other states to undertaking projects first in the areas where our core competencies lie. Through an increasingly diversified portfolio, we hope to broaden our revenue base and also hedge against risks in specific areas or projects and protect ourselves from fluctuations resulting from business concentration in limited geographical areas. With our increased experience and success, however, our rate of expansion may increase in terms of increases in the number of new states and projects we undertake. Till now 100% of our revenue from operations is from State of Gujarat. We believe that geographical diversification of our projects will reduce our reliance on our home state of Gujarat and allow us to capitalise on different growth trends in different states across the country. Further, we believe that as the reputed customers that comprise our existing client base continue to expand their geographical reach, our long-standing relationships will provide us with opportunities to undertake projects for such customers pan India.

BUSINESS PROCESS

The Process flow of our business operations is described below:

The typical project lifecycle for our construction business is described below:

1) *Business Development:*

100% of our Projects comes from private sector. A majority of the projects that we execute are sourced through nomination i.e. where customers with whom we have an existing relationship or new customers approach us directly for their proposed projects. Further, we also undertake business development activities and attempt to source private sector projects.

While evaluating prospective projects, we consider a number of factors including, inter alia, project size and duration, the client's reputation and financial strength, existing relationships with the clients, the geographic location of the project and anticipated complexity, our current and projected workload, the likelihood of additional work, the project's cost and profitability estimates and our competitive advantage relative to other likely bidders. After we have evaluated a prospective project and determined that it meets our criteria, depending upon the manner in which said project was sourced, we meet the prospective customer to discuss the project in detail.

Prior to submitting a bid, we carry out a detailed study of the proposed project, including performing a detailed study of the technical and commercial conditions and requirements of the tender followed by a site visit. Our team determines the bidding strategy depending upon the type of contract.

Since our business is project-specific, we cannot quantitatively assess our available capacity according to any uniform measure.

2) *Mobilisation of Resources Procurement*

Upon receipt and confirmation of work order, our team plans for execution of work order. Resources such as labour, machineries are allocated to allocated work order and mobilisation work starts. Execution work on awarded work order gets commenced with in due timeline along with requisite government approvals. We maintain experienced staff in our purchase department to carry out material, services and equipment procurement for our project sites. Procurement is a centralised function performed at our headquarters. Upon award of a contract, the purchase department is provided with the project details along with the budgeted rates for material, services and equipment. The material, services and equipment required for projects are estimated by the engineering personnel from the individual project sites and then passed on to the purchase department along with the schedule of requirements.

We maintain experienced staff in our purchase department to carry out material, services and equipment procurement for our project sites. Procurement is a centralised function performed at our headquarters. Upon award of a contract, the purchase department is provided with the project details along with the budgeted rates for material, services and equipment. The material, services and equipment required for projects are estimated by the engineering personnel from the individual project sites and then passed on to the purchase department along with the schedule of requirements. We have over the years developed relationships with a number of vendors for key materials, services and equipment. We have also developed an extensive vendor database for various materials and services. The materials ordered are provided to the sites from time to time as per their scheduled requirements. We maintain material procurement, tracking and control systems, which enable monitoring of our purchases. However, in certain projects, our agreements with our clients may stipulate that the client is responsible for the procurement of raw materials such as steel and cement. In such projects, we provide the clients with details of the quantity and quality of the materials required, and mutually agree upon a tentative delivery schedule for such materials.

The ability to procure material, services and equipment in a cost effective manner, and to meet quality specifications for our projects is essential for the successful execution of such projects. We continually evaluate our existing vendors

and also attempt to develop additional sources of supply for most of the materials, services and equipment needed for our projects.

3) **Construction**

The issuance of a letter of acceptance or letter of intent by the client signifies that we have been awarded the contract. Upon receipt of the letter, we typically commence pre-construction activities promptly, such as mobilising manpower and equipment resources and setting up site offices, stores and other ancillary facilities. We execute projects across the various sectors, and thus, the methodology of construction depends upon the nature of the project. Construction activity typically commences once the client approves working designs and issues drawings, wherever applicable. The project team immediately identifies and works with the purchase department to procure the key construction materials and services required to commence construction. Based on the contract documents, a detailed schedule of construction activities is prepared. This schedule identifies interim milestones, if any, stipulated in the contract with corresponding time schedules for achieving these milestones. The sequence of construction activities largely follows the construction schedule that was prepared initially, subject to changes in scope requested by the client. Projects generally commence with excavation and earthmoving activities. Other major components of a typical construction project include concreting and reinforcement. Heavy earthmoving equipment, such as excavators, dumpers, loaders, dozers, graders and rock drilling tools, are used for excavation, whereas batching plants, transit mixers, tower cranes and concrete pumps, among other equipment, are used for concreting. The key construction activities involved in a project depend on the nature and scope of the project.

We have a project management system that helps us track the physical and financial progress of work vis-à-vis the project schedule. Progress reports are prepared at the major project sites and sent to the project monitoring cell in the head office, which are reviewed on a weekly and on a monthly basis. Project personnel hold periodic review meetings with the client or project manager consultant, as applicable at the project sites to discuss the progress being made on the project. The project managers also hold periodic meetings with our vendors and subcontractors to Each project site has an employee designated to coordinate the billing function, who is responsible for preparing and dispatching periodic invoices to the client or the project management consultant, as applicable. Joint measurements with the client’s representative are taken on a periodic basis and interim invoices prepared on the basis of such measurements are sent to the client for certification and release of interim payments.

The billing department is also responsible for certifying the bills prepared by our vendors and sub-contractors for particular projects and forwarding the same to our head office for further processing. We consider a project to be virtually complete when it is ready to be handed over to the client. We then jointly inspect the project with the client to begin the process of handing over the project to the client. Once satisfied, the client prepares a completion certificate, which signifies the commencement of the defects liability period or the maintenance period (i.e., the period during which we are contractually bound to rectify any defects arising out of construction). On completion of the defects liability period, we request the client to release any performance bonds or retention monies that may be outstanding. review the progress of the ongoing projects.

COLLABORATIONS, ANY PERFORMANCE GUARANTEE OR ASSISTANCE IN MARKETING BY THE COLLABORATORS

Our Company has not entered into any collaboration, or performance guarantee or assistance for marketing with any Company.

MARKETING & DISTRIBUTION

The efficiency of the marketing and sales network is critical to the success of our Company. Our success lies in the strength of our relationship with our existing customers that are associated with our Company. Our team through their experience and good rapport with marketers, owing to timely and quality delivery of work orders, plays an instrumental role in creating and expanding a work platform for our Company.

Our Marketing team in supervision of our directors generate new business by cold callings, references and relationship to market players. 100% of business of our company comes from State of Gujarat. Our company enjoys good relation of our Managing Director with our clients. We receive work orders from existing and potential new clients. Our company believes in traditional mouth to mouth marketing strategy. Our company also applies in tenders by various companies / institutions in the industry via email. The management and promoters strive hard to maintain their standards and excellence in service to meet maximum customer contentment.

We are integrated civil construction company offering a diversified range of construction and allied services across residential, commercial and institutional projects in Gujarat, especially in Ahmedabad and Rajkot. Our company construct various residential, commercial and institutional Buildings. End users of our construction work are owners and users of the property / building being constructed.

COMPETITION

We operate in a highly competitive market and there are large numbers of players. We operate in the competitive environment; quality of service and price are the main factor for client in making decision to have our services. We may face competition from our peers who have similar one or more division of our business. Competition emerges not only from small but also from big Regional and National and International players. Our experience in this business has enabled us to provide quality work in response to customer's demand for best quality. Moreover, there are minimal entry barriers in this industry and any expansion in capacity of existing producers would further intensify competition.

RAW MATERIAL

The principal raw materials used in our projects are steel, cement, bricks, concrete, sand, and shuttering material items and others.

As activities in the construction industry in India generally slowed down during periods of adverse weather, such as during the half-yearly monsoon season, our requirements for principal raw materials (such as cement and steel) are also according to the project requirement. Our arrangement for raw materials is typically supply contracts with prices determined on a spot basis. We prefer to avail ready mix concrete from our Group Entity viz. Chavda RMC LLC for un-interrupted supply. However, these supplies are obtained on a need-basis, and we have negotiated with our suppliers for certain agreed price. Raw Material such as steel, diesel and bitumen, our requirements are project specific, with similar agreed discounts factored into the prices for the raw materials.

We have not entered into long term supply contract with our vendors. We buy steel from our suppliers on spot basis. Due to the large volume of our purchases, we typically enjoy discounts which are only offered to bulk purchasers. Raw materials are usually sourced from a location near the project site and most of the raw materials and consumables are easily available. Our contract terms may also provide for escalation clauses which may address price variations for our raw material requirements. For some of our projects, we may be required to purchase specific equipment and components or bought outs for project implementation.

TECHNOLOGY

We use information technology systems to enhance our performance and efficiency. We use third party software "Farvision" as ERP and Tally Accounting Software for Accounting Record Keeping. We believe that this system allows us to streamline our processes while enhancing our monitoring and control functions.

UTILITIES AND WATER

POWER

This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. BUSINESS / TRADE RELATED LAWS / REGULATIONS

Laws relating to land acquisition and land use:

The Urban Land (Ceiling & Regulation) Act, 1976 prescribes the limits to urban areas that can be acquired by an entity. It has been repealed in some states and union territories under the Urban Land (Ceiling & Regulation) Repeal Act, 1999, but it remains in operation in the other states. Further, land holdings are subject to the Land Acquisition Act, 1894, which provides for the compulsory acquisition of land by the appropriate government for purposes categorized as “public purpose”, including planned development and town and rural planning. However, any person having an interest in such land has the right to object and the right to compensation.

The National Building Code, 2016

The National Building Code of India, 2016 (NBC), comprehensive building Code, is a comprehensive building code providing guidelines for regulating the building construction activities across the country. It serves as a Model Code for adoption by all agencies involved in building construction works, Public Works Departments, other government construction departments, local bodies or private construction agencies. The Code mainly contains administrative regulations, development control rules and general building requirements, fire safety requirements, stipulations regarding materials, structural design and construction (including safety, building and plumbing services; approach to sustainability; and asset and facility management).

The Real Estate (Regulation and Development) Act, 2016

The Real Estate (Regulation and Development) Act, 2016 is expedient to establish the Real Estate Regulatory Authority for regulation and promotion of the real estate sector and to ensure sale of real estate project, in an efficient and transparent manner and to protect the interest of consumers in the real estate sector. Every project where the area of the land propose to be developed exceeds 500 meters as the number of apartment proposes to be developed or number of apartment exceeds 8, such project shall be compulsory required to be registered by the promoter with the Real Estate Regulator Authority (RERA). Any person aggrieved by any direction or decision made by the Regulatory Authority or by an adjudicating officer, may make an appeal before the Appellate Tribunal within a period of 60 days from the date of receipt of a copy of the order or direction.

The Easements Act, 1882

The law relating to easements is governed by the Easements Act, 1882 (“Easements Act”). The right of easement is derived from the ownership of property and has been defined under the Easements Act to mean a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits him to do or to prevent something from being done in respect of certain other land not his own. Under this law an easement may be acquired by the owner of immovable property, i.e. the dominant owner, or on his behalf by the person in possession of the property. Such a right may also arise out of necessity or by virtue of a local custom.

Urban Development Laws

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages.

Where projects are undertaken on lands, which form part of the approved layout plans and/or fall within municipal limits of a town, generally the building plans of the projects have to be approved from concerned municipal or developmental authority. Building plans are required to be approved for individual buildings. Clearances with respect to other aspects of development such as fire, civil aviation and pollution control are required from appropriate authorities, depending on the nature, size and height of the projects. The approvals granted by the authorities generally prescribe a time limit for completion of the projects. These time limits are renewable upon payment of a prescribed fee. The regulations provide for obtaining a completion/occupancy certificate upon completion of the project.

Agricultural development laws

The acquisition of land is regulated by state land reform laws, which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land that results in the aggregate land holdings of the acquirer in the state to exceed this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the state government free of all encumbrances. When local authorities declare certain agricultural areas as earmarked for townships, lands are acquired by different entities. After obtaining a conversion certificate from the appropriate authority with respect to a change in use of the land from agricultural to non-agricultural for development into townships, commercial complexes etc. such ceilings are not applicable. While granting licenses for development of townships, the authorities generally levy development/external development charges for provision of peripheral services. Such licenses require approvals of layout plans for development and building plans for construction activities.

The licenses are transferable on permission of the appropriate authority. Similar to urban development laws, approvals of the layout plans and building plans, if applicable, need to be obtained.

The Central Government may also enter into an agreement with any person (being, either an individual, a partnership firm, a company, a joint venture, a consortium or any other form of legal entity, Indian or foreign, capable of financing from own resources or funds raised from financial institutions, banks or open market) in relation to the development and maintenance of the whole or any part of a 'National Highway'. Such agreement may provide for designing and building a project and operating and maintaining it, collecting fees from users during an agreed period, which period together with construction period is usually referred to as the 'concession period'. Upon expiry of the 'concession period', the right of the person to collect fees and his obligation to operate and maintain the project ceases and the facility stands transferred to the central government.

Other legislations relevant to the Infrastructure Sector

In addition to the above, there are also certain other legislations that are relevant to the road sector which include the Road Transport Corporation Act, 1950, National Highways Rules, 1957, National Highways (Temporary Bridges) Rules, 1964, National Highways (Fees for the Use of National Highways Section and Permanent Bridge Public Funded Project) Rules, 1997, National Highways (Rate of Fee) Rules, 1997, National Highways Tribunal (Procedure) Rules, 2003, Central Road and Infrastructure Act, 2000, Central Road Fund (State Roads) Rules 2007 and Green Highways (Plantation, Transplantation, Beautification & Maintenance) Policy, 2015.

Laws regulating transfer of property:

Registration Act, 1908

The Registration Act, 1908 ("Registration Act") has been enacted with the object of providing public notice of the execution of documents affecting a transfer of interest in immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title, publication of documents and prevention of fraud. It details the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes, among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding one year or reserving a yearly rent. An unregistered document will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the T.P. Act or as collateral), unless it has been registered. The Act provides for registration of other documents also, which can give these documents more authenticity. Registering authorities have been provided in all the districts for this purpose.

The Indian Stamp Act, 1899

There is a direct link between the Registration Act and the Indian Stamp Act, 1899 ("Stamp Act"). Stamp duty needs to be paid on all documents, which are registered, and the rate varies from state to state. The Stamp Act provides for the imposition of stamp duty at the specified rates on instruments listed in Schedule I of the said Act. The applicable rates for stamp duty on these instruments, including those relating to conveyance, are prescribed by state legislation. Instruments chargeable to duty under the Stamp Act, which are not duly stamped, are incapable of being admitted in court as evidence of the transaction contained therein. However, the document can be accepted as evidence in criminal court.

Transfer of Property Act, 1882

The transfer of property, including immovable property, between living persons, as opposed to the transfer of property by the operation of law, is governed by the Transfer of Property Act, 1882 ("T.P. Act"). The T.P. Act establishes the general principles relating to the transfer of property including among other things identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property.

Transfer of property is subject to stamping and registration under the specific statutes enacted for the purposes which have been dealt with hereinafter. The T.P. Act recognizes, among others, the following forms in which an interest in an immovable property may be transferred:

- **Sale:** The transfer of ownership in property for a price, paid or promised to be paid.
- **Mortgage:** The transfer of an interest in property for the purpose of securing the payment of a loan, existing or future debt, or performance of an engagement which gives rise to a pecuniary liability. The T.P. Act recognizes several forms of mortgages over a property.
- **Charges:** Transactions including the creation of security over property for payment of money to another which are not classifiable as a mortgage. Charges can be created either by operation of law, e.g. decree of the court attaching to specified immovable property, or by an act of the parties.
- **Leases:** The transfer of a right to enjoy property for consideration paid or rendered periodically or on specified occasions.
- **Leave and License:** The transfer of a right to do something upon immovable property without creating interest in the property.

ENVIRONMENT LAWS:

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:—

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance
- Enhancement of resources for Environmental Conservation

The Industrial Relations Code, 2020 (“Industrial Code”)

The Code provides that the Central Government may repeal the provisions of the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946, and the Industrial Disputes Act, 1947 and may supersede them with the applicability of any provision of the Industrial Code. The Industrial Code is a central legislation and extends to the whole of India. The Industrial Code empowers the Central Government to require an establishment in which one hundred or more workers are employed or have been employed on any day in the preceding twelve months to constitute a works committee consisting of representatives of employer and workers engaged in the establishment. The code further requires every establishment with twenty or more workers to have grievance redressal committees for resolution of disputes arising out of individual grievances. The code bars the jurisdiction of civil courts to any matter to which the provisions of the Industrial Code apply, and provides for establishment of industrial tribunals for adjudication of such matters. The Industrial Code provides for provisions pertaining to lay-off and retrenchment of employees and closure of establishments and compensation provisions in relation thereto. The Industrial Code provides for monetary fines, penalties and imprisonment in case of contravention of the provisions of the code.

There is also a requirement to maintain prescribed records and registers and filing of forms with the concerned authorities. The EPF Act also prescribes penalties for avoiding payments required to be made under the abovementioned schemes.

All Income and Expenditures having material bearing on the Financial Statements are recognized on accrual basis.

b) Use of Estimates:

The preparation of financial statements in conformity with the generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities as at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

c) Property, Plant and Equipment

1. Tangible Assets

- The Company is using cost model for determining the gross carrying amount of fixed assets. Accordingly, fixed assets are shown at historical cost less accumulated depreciation and impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use but excluding GST credit availed. Where the construction or development of any such asset require a substantial period of time to set up for its intended use, is funded by borrowings if any, the corresponding borrowing cost are capitalized up to the date when the asset is ready for its intended use.
- Depreciation/amortisation is charged on a straight line basis so as to write off the cost of the assets over the useful lives as prescribed in Schedule II of the Companies Act, 2013 and for the assets acquired prior to April 1, 2014, the carrying amount as on April 1, 2014 is depreciated over the remaining useful life of the assets.
- Depreciation for additions / deletion from assets is calculated pro-rata from the day of additions / deletion.
- Fixed Assets costing Rs. 5000/- or less are fully depreciated in the year of acquisition.

2. Intangible Assets

In accordance with Accounting Standard AS-26, Intangible Assets comprising of Computer Software are valued at cost less accumulated amortization. Computer software is amortised over the useful lives as prescribed in Schedule II of the Companies Act, 2013

d) Impairment of assets:

The carrying value of assets of the company's cash generating units are reviewed for impairment annually or more often if there is an indication of decline in value. If any indication of such impairment exists, the recoverable amounts of those assets are estimated and impairment loss is recognized, if the carrying

amount of those assets exceeds their recoverable amount. The recoverable amount is the greater of net selling price and their value in use. Value in use is arrived at by discounting the estimated future cash flows to their present value base on appropriate discount factor. Net selling price is the estimated selling price in the ordinary course of business, less estimated cost of completion and to make the sales.

e) Investments:

Long Term Investments are valued at cost less provision for diminution other than temporary, in value, if any as at the Balance sheet date.

f) Inventories:

a) Construction Materials:

Construction materials are valued at lower of cost or net realizable value, on the basis of weighted average method after providing for obsolescence and other losses, where considered necessary. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.

b) Work in Progress:

Work-in-progress represents cost incurred directly in respect of construction activity and indirect construction cost to the extent to which the expenditure is related to the construction or incidental thereto is valued at lower of cost or net realizable value.

g) Revenue Recognition:

Revenue from Contracts with Customers:

The Company recognises revenue from contracts with customers when it satisfies a performance obligation by transferring promised goods or service to a customer. The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Performance obligation is satisfied over time when the transfer of control of good or service to a customer is done over time and in other cases, performance obligation is satisfied at a point in time. For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation. For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as “Due from customers”. For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as “Due to customers”. Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as “Advances from customer”. The amounts billed on customer for work performed and are unconditionally due for payment i.e only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables

The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Transaction price is the amount of consideration to which the Company expects it to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. Variable consideration is estimated using the expected value method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit & loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation. When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised only to the extent of

contract cost incurred that are likely to be recoverable. An expected loss on the contract is recognized as an expense immediately. The differences between the timing of our revenue recognised (based on costs incurred) and customer billings (based on contractual terms) results in changes to revenue in excess of billing or billing in excess of revenue. Cost incurred towards future contract activity is classified as project work in progress.

i) Borrowing Cost:

Borrowing costs are recognized in the period to which they relate, regardless of how the funds have been utilized, except where it relates to the financing of construction or development of assets requiring a substantial period of time to prepare for their intended future use. Interest on borrowings if any is capitalized up to the date when the asset is ready for its intended use. The amount of interest capitalized for the period is determined by applying the interest rate applicable to appropriate borrowings.

j) Taxation on Income

- Provision for Current Tax is made as per the provisions of the Income Tax Act, 1961.
- Deferred Tax results from “timing differences that are temporary in nature” between accounting and taxable profit is accounted for, using the tax rates and laws that have been enacted as on the Balance sheet date. Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in

the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “*Issue Procedure*” beginning on page 223.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 223.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
