SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several

major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (figure 1.1.A). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years (figure 1.1.B). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (figure 1.1.C).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spill overs from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year.

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than-anticipated recovery in China, but subsequently retraced those gains. Agricultural prices have been easing on the back of good production prospects for most crops.

INDIAN ECONOMY

Introduction

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalised public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favorable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favorable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

4. Our failure to perform in accordance with the standards prescribed in work order of our client could result in loss of business or compensation payment.

We received work orders from our clients. The majority of these work orders may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be

unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain work order may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

5. ***Our individual Promoters play key role in our functioning, and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoter and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.***

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive Directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive Directors have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters and executive Directors, along with the key managerial personnel, have over the years-built relations with various customers and other persons who form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

6. ***We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

7. ***The Company is dependent on a few suppliers for purchases of product. The loss of any of these large suppliers may affect our business operations.***

Our top ten suppliers contribute 64.34%, 50.76% and 63.20% of our total purchase for the financial year ended on March 31, 2023, 2022 and 2021, respectively based on consolidated restated financial statement. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seeking new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time.

8. ***The Company is dependent on few numbers of customers for sales. The loss of any of this large customer may affect our revenues and profitability.***

Our top ten customers contribute 100%, 100% and 100% of our total sales for the financial year ended on March 31, 2023, 2022 and 2021, respectively. Our Company is an integrated solution provider, offering a full range of Engineering, Procurement, Construction/ Commissioning (EPC) services in India. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations,

financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Any decline in our quality standards, growing competition and any change in demand may adversely affect our ability to retain them. We cannot assure you that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these customers might change, as we continue to add new customers in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new customers, there can be no assurance that we will be able to maintain long term relationships with such customers or find new customers in time.

9. *We have experienced significant working capital requirements in past and may continue to experience in future also. If we experience insufficient cash flows from our operations or are unable to borrow to meet our working capital requirements, it may materially and adversely affect our business, cash flows and results of operations.*

Our business is working capital driven. The successful operation of our business heavily relies on significant working capital, which is essential for various aspects, including financing project operations, inventory management, and the purchase of raw materials and may continue to so in future also. However, changes in credit terms and payment delays can adversely impact on our working capital, resulting in lower cash flows and increased funding requirements. Inadequate financing of our working capital needs may arise due to several factors, such as delays in disbursements under financing arrangements, higher interest rates, increased insurance costs, or borrowing and lending restrictions. Such circumstances could have a material adverse effect on our overall business, financial condition, and prospects.

Our present work orders often necessitate providing performance bank guarantees, letters of credit, and security deposits to secure contractual obligations with clients. Failure to provide sufficient collateral may limit our ability to enter into new contracts. Acquiring these financial instruments to secure contracts increases our working capital needs. However, we may encounter challenges in obtaining a sufficient number of letters of credit, bank guarantees, and performance bonds to meet our business requirements, potentially restricting our operations.

Furthermore, our working capital requirements may escalate if certain contracts lack advance payment terms or contain payment schedules that shift payments towards project completion, thereby imposing additional financial burdens. Another aspect influencing our working capital is the retention money withheld by clients, which is typically released after product testing or supply completion. Delays in receiving progress payments, release of retention money, or obtaining guarantees in the form of letters of credit from clients can significantly impact our working capital needs.

The combination of these factors places a substantial demand on our working capital, making its management and optimization a critical aspect of our business strategy. As such, we continually strive to enhance our financial management practices to effectively address working capital challenges. By closely monitoring credit terms, payment schedules, and contract agreements, we aim to mitigate risks associated with fluctuations in working capital requirements. Additionally, prudent financial planning, exploring diverse financing options and maintaining strong relationships with financial institutions are key factors in managing our working capital efficiently. Despite our proactive measures, there can be no assurance that working capital fluctuations will not impact on our business operations or financial performance. For details related to working capital requirement, please refer to chapter titled as “*Object of the Issue*” on page 86 of this Draft Red Herring Prospectus.

10. *Our revenues from our projects are difficult to predict and are subject to seasonal variations.*

Our business operations may be adversely affected by severe weather, which may require us to evacuate personnel or curtail services, may result in damage to a portion of our fleet of equipment or facilities resulting in the suspension of operations, and may prevent us from delivering materials to our project sites in accordance with contract schedules or generally reduce our productivity. Our operations may also be adversely affected by difficult working conditions and extremely high temperatures during summer months and during the monsoon season, each of which may restrict our ability to carry on engineering activities and fully utilize our resources. These factors may make it difficult for us to prepare accurate internal financial forecasts. In addition, Business of our company is seasonal in monsoon and summer season, efficiency of engineering work reduces during monsoon and summer season. As a result, our revenues and profits may vary significantly during different financial periods, and certain periods are not indicative of our financial position for the year.

11. *We source a large part of our new orders from our relationships with corporates and other customers, both present and past. Any failure to maintain our long-standing relationships with our existing customers or forge similar relationships with new ones would have a material adverse effect on our business operations and profitability.*

We believe that our focus on completing projects in a timely manner and on quality has helped us build strong relationships with our customers and bolster our reputation in the industry in which we operate. In fact, all of the

projects that we execute for private sector clients are sourced through nomination i.e. where customers with whom we have an existing relationship or new customers approach us directly for their proposed projects. Further, we have received additional projects from several of our existing customers despite increased competition in the region within which we operate. If any of our relationships with our existing customers were to be altered or terminated and we are unable to forge similar relationships with new customers in the future, our business, financial condition, results of operations, cash flows and business prospects could be materially and adversely affected.

12. *Inaccurate estimation of risks, revenues, or costs for a project could negatively impact our profitability and operational results. Actual costs during project execution may significantly deviate from bid assumptions, leading to challenges in recovering additional expenses and potentially having a material adverse effect on our operational results, cash flows, and financial condition.*

Under the agreements for our projects, we typically agree to receive a predetermined sum of money from clients, subject to contract variations that cover changes in the project requirements. However, some of our future projects may not include price escalation clauses, leaving us exposed to potential cost variations. As a result, the actual expenses incurred during these projects may significantly differ from the bid assumptions due to various factors. These factors include unanticipated increases in material, fuel, labor, or other input costs, unexpected conditions leading to delays and higher expenses, weather-related disruptions, and non-performance by suppliers.

If we are unable to pass on cost increases to clients due to limited or no price escalation provisions, our profitability may be adversely affected, and we could incur financial losses. Additionally, the inherent risks in the industry may result in lower profits than initially estimated or lead to cost and time overruns, potentially impacting our cash flows, overall business, financial health, and operational results.

The accurate estimation of risks, revenues, and costs for a project is critical to ensure profitability and operational success. Any inaccuracies in these estimates can have detrimental effects on our financial performance. During project execution, actual costs may vary significantly from the initial bid assumptions, making it challenging to recover additional expenses. Such deviations can have a material adverse impact on our operational results, cash flows, and overall financial condition.

13. *Failure to successfully implement our business strategies may materially and adversely affect our business, prospects, financial condition and results of operations.*

We aim to implement our business strategies to ensure future business growth, which may be subject to various risks and uncertainties, including but not limited to the following:

- *Maintaining Competitive Edge:* We face the risk of cost overruns or delays in project execution, which could erode our competitive advantage and reputation. Failing to deliver projects in a timely manner or meeting quality specifications may hinder our growth prospects.
- *Intensified Competition and Payment Issues:* We operate in a competitive landscape, and intensified competition may affect our ability to secure contracts. Delays or non-payments by clients and associated legal proceedings may also pose financial and operational challenges.
- *Bidding Strategy:* The success of our projects depends on effective bidding strategies. If we fail to implement suitable bidding plans, it could impact our ability to win projects and generate revenue.
- *Operational Efficiency:* Inefficiency in utilizing our execution system, equipment bank, IT/ERP systems, and centralized procurement may affect project performance and operational results.
- *Financing Challenges:* Managing financing resources and obtaining funds at affordable costs are critical for our business growth. Failure to maintain financial discipline may affect our ability to undertake projects.
- *Regulatory and Political Environment:* Changes in laws, regulations, policies, or the political environment could impact our business operations and profitability.
- *Diversification and Business Segments:* Expanding into new states or business segments involves inherent risks, including market acceptance and operational challenges.
- *Talent Acquisition and Retention:* Skilled employees play a vital role in our success. Difficulty in recruiting and retaining talent could affect our operations and project execution.
- *Market Trends and Portfolio Optimization:* Failure to identify market trends or optimize our project portfolio may hinder our ability to acquire new projects and meet client expectations.
- *Cost and Rate Fluctuations:* Fluctuations in the costs of raw materials, fuel, labor, equipment, and interest rates may impact project economics and profitability.

- *Corrupt Practices:* The risk of fraud or improper conduct may adversely affect our reputation and financial standing.

Implementation of our strategies may be subject to a number of risks and uncertainties including the ones mentioned above, some of which are beyond our control. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our results of operations and our reputation. Any failure or delay in the implementation of any of our strategies may have a material adverse effect on our business, prospects, financial condition and results of operations.

14. *Our Company operates under several statutory and regulatory permits, licenses and approvals. Our failure to obtain and/or renew any approvals or licenses in future may have an adverse impact on our business operations.*

Our Company requires several statutory and regulatory permits, licenses and approvals to operate the business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Our Company is required to renew such permits, licenses and approvals. There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals. Further pursuant to change of name of the Company upon conversion from Private Limited to Public Limited, we further need to get our licenses updated. Also, we have applied for approvals which are necessary for the furtherance of our objects. Failure by our Company to renew, alter, maintain or obtain the required permits, licenses or approvals, or cancellation, suspension or revocation of any of the permits, licenses or approvals which may result in the interruption of our Company's operations and may have a material adverse effect on the business.

For further details, please see chapters titled “*Key Industry Regulations and Policies*” and “*Government Approvals*” at pages 132 and 188 respectively of this Draft Red Herring Prospectus

15. *There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities.*

In the past, our company has at several instances, delayed in filing our TDS and Income Tax returns, GST returns, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees along with interest on delayed deposit of due taxes and statutory dues. Although the late filing fees and interest on late deposits levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of the above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. For further details of certain material legal proceedings involving our Company, our Promoter, our directors, see “*Restated Financial Information*” beginning on page 165 of this Draft Red Herring Prospectus.

16. *The title deeds of fixed assets shown in the financial statements of the Company are not held in the name of the Company and we are not sure the same will be transferred in the name of the Company in future or at all.*

The title of various vehicles purchased by our Company, which are shown in the standalone financial statements of the company, is held in the name of the Directors. However, loan borrowed for the purchase of the said vehicles are being repaid by the Company and the interest thereto have been debited to the Profit and loss account of the company, the title deeds of the said vehicles are held in the name of the Director and the same is in violation of the provisions of the Companies Act, 2013.

Although no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure you that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

17. *Our current Order Book does not guarantee full realization of future income. Some orders may be subject to modifications, cancellations, delays, holds, or partial payments by customers, which could have adverse effects on our operational results.*

Our Order Book represents the value of secured contracts yet to be executed as of a specific date, providing insight into our future expected revenues. As of March 31, 2023, we have 6 major on-going projects out of which 5 projects worth approximately ₹ 19,397.33 Lakhs has been confirmed based on Letter of Allocation / Purchase Order for which ₹ 16,952.80 Lakhs worth project execution is pending and 1 project has been finalized with Purchase Order, which is worth approximately ₹ 40,667.29 Lakhs, based on management estimates, suggesting our strong order book. However, it is crucial to note that the calculation and presentation of the Order Book may vary from other companies, including our competitors. Successful execution of the Order Book depends on adhering to contractual obligations, including delivery schedules and quality requirements. Failure to meet these terms, whether actual or perceived, may result in modifications, cancellations, or delays of our current orders and potential penalties.

Additionally, project execution relies on the cooperation of customers and other service providers involved. Factors beyond our or our clients' control, such as permit delays or practical difficulties, may lead to project postponements or cancellations. Due to uncertainties in project execution, we cannot accurately predict when, if, or to what extent a project will be completed, impacting the income and profits derived from the contracts. Delays can also lead to payment delays or refusals, affecting expected margins.

There is a risk of default or non-payment by contracting parties, even if a project proceeds as scheduled. Delays, scope reductions, cancellations, execution difficulties, payment postponements, defaults, or disputes related to the Order Book or ongoing projects can adversely affect cash flow, operational revenues, and profitability. These inherent risks in our industry and contractual relationships must be recognized as they can significantly impact on our financial performance.

18. *Our success depends on our ability to attract and retain our key management personnel. If we are unable to do so, it will adversely affect our business and the results of operations.*

Our future success substantially depends on the continued service and performance of the members of our senior management team and other key personnel in our business for management, running of our daily operations, and the planning and execution of our business strategy. There is intense competition for experienced senior management and other key personnel with technical and industry expertise in our business and if we lose the services of any of these or other key individuals and are unable to find suitable replacements in a timely manner, our ability to realize our strategic objectives could be impaired. We face specific disadvantages in our efforts to attract and retain our management. As a public sector undertaking, Government of India policies regulate and control the emoluments, benefits and requisites that we pay to our employees, including our key managerial and technical personnel and these policies may not permit us to pay at market rates.

Additionally, we may not have in place the necessary systems and processes to develop key personnel internally. Our Company does not maintain any director's and officer's insurance policy or any keyman insurance policy. The loss of key members of our senior management or other key team members, particularly to competitors, could have an adverse effect on our business and results of operations. Our performance also depends on our ability to attract and train highly skilled personnel. If we are unable to do so, it would materially and adversely affect our business, prospects and results of operations.

19. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Directors, Promoters and Promoter Group members and Group Companies. These transactions, inter-alia include, issue of shares, remuneration, loans and advances, purchase, sales, rent expenses, reimbursement of expenses etc. For details, please refer to "Annexure - IX - Related Party Transactions" under Section titled "Restated Financial Information" of the Company" and Chapter titled "Capital Structure" beginning on page 165 and 66 respectively of this Draft Red Herring Prospectus. Our Company has entered into such transactions due to easy proximity and quick execution. Although all related-party transactions that we may enter into in the future are subject to approval by our Audit Committee, Board or shareholders, as required under the Companies Act, we cannot assure you that such future transactions or any other future transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations or that we could not have achieved more favorable terms if such transactions are not entered into with related parties.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

20. *Certain Agreements in relation to our immovable Properties may be inadequately stamped or may not have been registered as a result of which our title to such properties may be faulty.*

Few of our agreements may not be adequately stamped or registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally

enforce the same, except after paying differential stamp duty and/or penalty for inadequate stamping. The effect of non-registration of an instrument is that the title to the property does not transfer in favor of the transferee and therefore, making the instrument unenforceable. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

21. *We may fail to obtain certain regulatory approvals in the ordinary course of our business in a timely manner or at all, or to comply with the terms and conditions of our existing regulatory approvals and licenses which may have a material adverse effect on the continuity of our business and may impede our effective operations in the future.*

We have submitted certain applications to various regulatory authorities seeking approvals and licenses. For details, please refer to the section titled “*Government Approvals*” of this Draft Red Herring Prospectus. There can be no assurance that the relevant authorities will issue such permits or approvals to us or that they will be issued on time. Further, these permits, licenses and approvals are subject to several conditions, and we cannot assure you that we will be able to continuously meet the conditions, which may lead to cancellation, revocation or suspension of relevant permits/licenses/approvals. Failure on our part to renew or maintain such permits, licenses or approvals may result in the interruption of our operations and may have a material impact on our business.

In the future, we may also be required to obtain new permits and approvals for our proposed operations. While we believe that we will be able to obtain such permits and approvals as and when required, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Failure by us to maintain or obtain the required permits or approvals, may result in the interruption of our operations or delay or prevent our expansion plans and may have a material and adverse effect on our business, financial condition and results of operations.

22. *We are exposed to significant risks on fixed-price or lump-sum turnkey contracts that could cause us to incur losses and adversely affect our business, results of operations and financial condition.*

A significant portion of our projects are undertaken on a fixed-price or lump-sum turnkey basis. These contracts involve agreeing to a predetermined fixed price for providing engineering, procurement, and construction services or delivering completed facilities in a ready-to-operate condition, subject to contract variations due to changes in the customer's project requirements. However, the actual expenses incurred during the execution of such contracts may substantially differ from the initial bid assumptions for various reasons, including but not limited to:

- Unanticipated changes in the engineering design of the project.
- Unforeseen increases in the cost of equipment, materials, or manpower.
- Delays associated with the delivery of equipment and materials to the project site.
- Unforeseen construction conditions, such as delays caused by the client's inability to obtain necessary environmental and other approvals, leading to increased costs.
- Delays caused by adverse local weather conditions.
- Commercial hardships or third-party breaches.
- Failures of suppliers or subcontractors to perform their obligations.
- Delays attributable to our own execution.

In the case of engineering and project management consultancy contracts, we assume various obligations, and any unanticipated costs or delays during contract execution may have compounding effects, leading to increased costs in other parts of the contract. Throughout the execution of the contract and up to the defect liability period, we are typically fully liable to compensate all parties concerned for any loss, damage, or destruction of work, structures, property, etc., including third-party risks arising due to our actions. We are also responsible for ensuring that we do not incur extra costs for our clients.

These variations and the inherent risks in the construction industry may result in our actual profits being different from the initial estimates, potentially leading to reduced profitability or even losses on certain projects.

23. *We have experienced negative cash flows from operations in the recent past, and we may have negative cash flows in the future.*

Our Standalone cash flows from operating activities, investing activities and financing activities for the financial year ended March 31 2023, 2022 and 2021 are set forth below:

(₹ in Lakhs)

Particulars	March 31, 2023	March 31, 2022	March 31, 2021
Net cash generated from/(used in) operating activities	(762.77)	1,040.33	294.83

Our Consolidated cash flows from operating activities, investing activities and financing activities for the financial year ended March 31 2023 and 2022 are set forth below:

(₹ in Lakhs)

Particulars	March 31, 2023	March 31, 2022
Net cash generated from/(used in) operating activities	(761.44)	1,040.51

Cash flows of a company are a key indicator to show the extent of cash generated from the operations of a company to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

24. If we are unable to service our debt obligations in a timely manner or to comply with various financial and other covenants and other terms and conditions of our financing agreements, it may adversely affect our business, prospects, results of operations and financial condition.

As of March 31, 2023 our Company had total indebtedness in the form of short term and long-term borrowings of ₹ 1,418.83 Lakhs. Our indebtedness could have several important consequences, including but not limited to the following:

- a portion of our cash flows may be used towards repayment of our existing debt, which will reduce the availability of our cash flows to fund working capital, capital expenditures and other general corporate requirements;
- our ability to obtain additional financing in the future at reasonable terms may be restricted;
- fluctuations in market interest rates may affect the cost of our borrowings, as some of our indebtedness is at variable interest rates;
- there could be a material adverse effect on our business, financial condition and results of operations if we are unable to service our indebtedness or otherwise comply with financial and other covenants specified in the financing agreements; and

Some of our financing agreements also include various conditions and covenants that require us to obtain the consent of the lenders prior to carrying out certain activities or entering into certain transactions. Certain covenants in these agreements require us to obtain approval/permission from our lenders in certain conditions. In the event of default or the breach of certain covenants, our lender has the option to make the entire outstanding amount payable immediately. There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe are required to operate and grow our business. For further details in this regard, please refer to chapter titled “Business Overview” beginning on page 116 of this Draft Red Herring Prospectus.

25. Our contingent liabilities as stated in our Restated Standalone and Consolidated Financial Statement could affect our financial condition.

Our Contingent liabilities as on March 31, 2023 were ₹ 668.47 Lakhs based on Restated Standalone Financial Statement and Consolidated Financial Statement. If these contingent liabilities materialize, fully or partly, the financial condition of our Company could be affected.

For more information, regarding our contingent liabilities, please refer chapter titled “*Restated Financial Information of the Company*” beginning on page 165 of this Draft Red Herring Prospectus.

Any operating losses by our group companies could adversely affect the overall operations of the group and financial conditions and also divert the attention of the management and promoter towards such entity which could have an adverse effect on our operations and financials.

26. Our projects require deployment of labour and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.

Our project operations require deployment and our ability to retain labour. In case such labour workforce is unavailable, or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, there have been amendments in the labour and Employment related laws, which may have a direct impact on our employee costs and consequently, on our margins. Further, latest amendments in labour laws in India may be led to increasing cost of compliance, wages, social security, Occupational Safety, Health and Working Conditions. We cannot assure you that we will continue to comply with all these labour related laws and that as we continue to grow our business in the future, our labour and employee costs coupled with operating compliances and expenses will not significantly increase. Our employees are not unionized currently. However, there is no assurance that our employees will not seek unionization in the future. In the event that employees at our project sites take any steps to unionize, it may become difficult for us to maintain flexible labour policies and may increase our costs and adversely affect our business.

Any strikes or lock-outs, work stoppages, slowdowns, shut downs, supply interruptions or costs or other factors beyond our control, may disrupt our operations and could negatively impact our financial performance or financial condition. Additionally, our inability to recruit employees, in particular skilled employees, and retain our current workforce could have a material adverse effect on our business, financial condition and profitability. There can be no assurance that we will not experience slowdowns or shutdowns in the manner described above, or in any other manner, in the future, for reasons which are beyond our control. Any slowdown or shutdown will adversely impact our results of operations, market share and financial condition.

27. Our Company has taken unsecured loans that may be recalled by the lenders at any time.

Our Company has availed unsecured loans which may be called by their lenders at any time. As on March 31, 2023 the unsecured loan amounting ₹ 282.63 lakhs were due to lenders. In the event that lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Also, there is no formal agreement with any of our lenders. As a result, any such demand may affect our business, cash flows, financial condition and results of operations. For further details on financing arrangements entered into by our Company, please refer chapter titled “*Business Overview*” beginning on page 116 of Draft Red Herring Prospectus.

28. The average cost of acquisition of Equity Shares by our Promoters could be lower than the issue price.

Our Promoter’s average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares Held	Weighted Average Price* (in ₹ per equity share)
1.	Mr. Nayankumar Manubhai Pansuriya	6479600	0.62
2.	Mr. Pratikkumar Maganlal Vekariya	6479600	0.62

*The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire and Shares allotted to them as reduced by amount received on sell of shares i.e. net of sale consideration is divided by net quantity of shares acquired.

29. *We could be adversely affected due to misconduct or errors of our employees that are difficult to detect and any such incidents could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and damage our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

30. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our company faces potential risks related to incidents of theft or damage to inventory. While we have not encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on our results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

31. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section “*Dividend Policy*” on page 164 of the Draft Red Herring Prospectus.

32. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the offer, which will allow them to determine the outcome of the matters requiring the approval of shareholders.*

Our promoter along with the promoter group will continue to hold collectively upto [●] % of the Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

33. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards utilization for the working capital requirement of our Company and general corporate purposes. For further details of the proposed objects of the Issue, see “*Objects of the Issue*” beginning on page 86. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders of our Company through a special resolution.

In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

34. *Any future issuance of our Equity Shares may dilute prospective investors' shareholding, and sales of our Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

35. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Offer Price.*

The offer price of the equity shares have been based on many factor and may not be indicative of the market price of our Equity Shares after the Issue. For further information please refer the section titled "*Basis for Issue Price*" beginning on page 95 of the Draft Red Herring Prospectus. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price.

36. *Our Promoters and Directors have provided personal guarantees for financing facilities availed by our Company and may in the future provide additional guarantees and any failure or default by our Company to repay such facilities in accordance with the terms and conditions of the financing agreements could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and Directors and thereby, adversely impact our business and operations.*

Our Promoters and Directors have personally guaranteed the repayment of certain loan facilities taken by us. Our Promoters may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by our Promoters and Directors may be invoked, which could negatively impact the reputation and net worth of our Promoters and Directors. In addition, our guarantors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company.

Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

- 37. *The Objects of the Issue for which funds are being raised are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled “Objects of the Issue”.***

The fund requirement and deployment, as mentioned in the “*Objects of the Issue*” on page 86 of this Draft Red Herring Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently meet these fund requirements. The deployment of the funds as stated on page 86 under chapter “*Objects of the Issue*” is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation as stated on page 86 under chapter “*Objects of the Issue*” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

- 38. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.***

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

- 39. *Industry information included in this Draft Red Herring Prospectus has been derived from industry sources. There can be no assurance that such third-party statistical, financial and other industry information is complete, reliable or accurate.***

This Draft Red Herring Prospectus includes information on Industry in which we operate from various sources. For further details, please see “*Industry Overview*” beginning on page 108. The data has been furnished by an independent agency on their websites and has no relationship with our Company, its Promoters, Directors, or the Book Running Lead Manager as on the date of this Draft Red Herring Prospectus. The data used in these sources may have been reclassified by us for the purposes of presentation and may also not be comparable. Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but that their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. Accordingly, investors must rely on their independent examination of, and should not place undue reliance on, or base their investment decision solely on this information. - 40. *Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.***

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

- 41. *In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “*Objects of The Issue*” on Page no. 86 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the

objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

42. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled "Objects of the Issue".*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavorable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled "*Object for the Issue*" beginning on page 86 of this Draft Red Herring Prospectus.

EXTERNAL RISK FACTORS:

1. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax ("GST") regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

2. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

4. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

5. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighboring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

6. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.*

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

7. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

8. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

9. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

10. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

11. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in affect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

12. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

13. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "Government and Other Statutory Approvals" on page 256 for details of the laws currently

applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see “Outstanding Litigation and Material Developments” on page __. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India’s Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non- resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

14. The Equity Shares have never been publicly traded, and the Offer may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Offer can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India’s economic liberalisation and deregulation policies, and significant developments in India’s fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry-specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has

experienced extreme price and volume fluctuations that have affected the market price of many companies in ways that may have been unrelated to the companies' operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

15. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and, or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

Any further issuance of Equity Shares, or convertible securities or other equity-linked instruments by us may dilute your shareholding. We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

16. *The sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.*

After the completion of the Offer, our Promoters will still own a significant percentage of our issued Equity Shares. The sale of a large number of the Equity Shares by our Promoters could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

17. *There is no guarantee that our Equity Shares will be listed on the relevant stock exchange in a timely manner or at all.*

[There is no guarantee that our Equity Shares will be listed on the relevant stock exchange in a timely manner or at all. In accordance with Indian law, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the relevant stock exchange within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

Justification for “Holding Period” levels

We are an Oil & Gas pipeline infrastructure service provider in India, focused on laying pipeline networks along with construction of associated facilities; and providing Operations & Maintenance services to the City Gas Distribution (“CGD”) Companies in India. The justifications for the holding levels mentioned in the table above are provided below:

Inventory – WIP	Inventories primarily include work in progress on account of ongoing work order for which invoicing is not done. With increasing value of contract, Company’s inventory days also increased from 5-7 days in Financial Year 2020-21, 15-20 days in Financial Year 2021-22 to 70-80 days in Financial Year 2022-23. The Company is anticipating Inventory days to 65-75 days for the Financial Year 2023-24 and 85-95 days for FY 2023-24 & FY 2024-25 respectively which is in the same line with the existing inventory days.

Our Company had trade receivable days of 100-110 days in the Financial Year 2020-21, 55-65 days in the Financial Year 2021-22 and 75-85 days in the Financial Year 2022-23. Company’s anticipation, for the projected trade receivables days are in line with existing trade receivable days i.e. 85-95 days for the Financial Year 2023-24 and 90-100 days for the Financial Year 2024-25.
Trade Payables	Trade payables are amount to be paid to suppliers by company following purchase of material and services rendered by supplier on credit. The Company had maintained trade payable days of 180-185 days in Financial Year 2020-21, 155-165 days in Financial Year 2021-22 and 190-200 days in Financial Year 2022-23. Our company expects Trade Payable days to be between 105-115 days for FY 2023-24 and FY 2024-25. Company expects better pricing from vendors by making early payment and negotiating better deals.

GLOBAL OUTLOOK

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (figure 1.1.A). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years (figure 1.1.B). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (figure 1.1.C).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns About the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spill overs from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year.

Energy prices have eased considerably since their peak in 2022 on account of weaker global growth prospects and a warmer-than-expected Northern winter, which reduced natural gas and electricity consumption. Metal prices increased in early 2023, reflecting signs of a stronger-than anticipated recovery in China, but subsequently retraced those gains. Agricultural prices have been easing on the back of good production prospects for most crops.

In all, global growth is forecast to slow from 3.1 percent in 2022 to 2.1 percent in 2023, before edging up to 2.4 percent in 2024. Relative to the January projections, this is 0.4 percentage point stronger in 2023 and 0.3 percentage point weaker in 2024. Greater-than-expected resilience of major economies at the end of 2022 and early in 2023 led to the overall upgrade to growth in 2023.

FIGURE 1.1 Global prospects

The global economy is projected to slow substantially this year, with a pronounced deceleration in advanced economies. The first half of the 2020s is expected to be one of the weakest half-decades of the past 30 years for emerging market and developing economies (EMDEs), as a result of both cyclical dynamics and slowing potential growth. EMDEs with lower credit ratings are set to experience a particularly sharp slowdown this year. Inflation remains elevated in many countries and is envisaged to remain above pre-pandemic levels beyond 2024. Excluding China, EMDEs are expected to make next to no progress at closing the gap in per capita incomes with advanced economies over the forecast horizon.

INDIAN ECONOMY

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalised public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

The global economy battles through a unique set of challenges

In the last century, several events can be recollected that have had an adverse impact on the global economy. The two world wars are still vivid in public memory, along with the Spanish flu and the great depression. Regional conflicts have been several, as also intermittent oil shocks. The previous millennium closed with the East Asian crisis, and the new millennium in its first decade opened with the technology bust, followed several years later by the global financial crisis. The second decade, apart from minor episodes of the taper tantrum and growing trade tensions between the super-powers, had gone relatively incident-free globally, although Europe had its moments of stress during the decade. Before the third decade of the new millennium commenced, incidents of global economic turbulence were generally spaced out, allowing economies breathing time to recover before preparing for the next challenge.

The Covid-19 pandemic ('pandemic' hereinafter) notified by the WHO in January 2020 was the first challenge of the third decade that hit global growth. Two years later, as the global economy was recovering from the pandemic-induced output contraction, the Russia-Ukraine conflict broke out in February 2022, triggering a swing in commodity prices and, thus, accelerating existing inflationary pressures. This posed the second challenge. Soon after, the third challenge emerged when nations undertook monetary tightening to rein in inflation causing growth to weaken. Monetary tightening also drove capital flows to safe-haven US markets, contributed to rising sovereign bond yields, and depreciation of most currencies against the US dollar. The consequent increase in borrowing costs also stressed high levels of public and private debt, threatening the financial system. Faced with the prospects of global stagflation, nations, feeling compelled to protect their respective economic space, slowed cross-border trade, which posed the fourth challenge to growth. All along, the fifth challenge was festering as China experienced a considerable slowdown induced by its policies. The sixth medium-term challenge to growth was seen in the scarring from the pandemic brought in by the loss of education and income earning opportunities. A simultaneous occurrence of several challenges to growth is perhaps unprecedented. Like the rest of the world, India, too, faced this extraordinary set of challenges but withstood them better than most economies.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localised lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimising the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

However, the conflict in Europe necessitated a revision in expectations for economic growth and inflation in FY23. The country's retail inflation had crept above the RBI's tolerance range in January 2022. It remained above the target range for ten months before returning to below the upper end of the target range of 6 per cent in November 2022. During those ten months, rising international commodity prices contributed to India's retail inflation as also local weather conditions like excessive heat and unseasonal rains, which kept food prices high. The government cut excise and customs duties and restricted exports to restrain inflation while the RBI, like other central banks, raised the repo rates and rolled back excess liquidity.

India's Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India's underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

INDUSTRY- OIL AND GAS

Executive summary

1. Second-Largest Refiner In Asia

- As of April 2022, India's oil refining capacity stood at 251.21 million metric tonnes per annum (MMTPA), making it the second-largest refiner in Asia and the fourth-largest in the world. Private companies owned about 35% of the total refining capacity.
- India is planning to double its refining capacity to 450-500 million tonnes by 2030.

2. World's Third largest Energy Consumer

- According to IEA (India Energy Outlook 2021), primary energy demand is expected to nearly double to 1,123 million tonnes of oil equivalent, as the country's gross domestic product (GDP) is expected to increase to US\$ 8.6 trillion by 2040.

3. Third-Largest Consumer of Oil

- India's oil consumption stood at almost 4.9 million barrels per day (BPD) in 2021, up from 4.65 million BPD in 2020.
- India retains its spot as the third-largest consumer of oil in the world, as of 2022.
- In FY23, India consumed 222.3 MMT of petroleum products, up 10.2% from the previous year. This is the highest-ever in the history of the world's third largest oil consumer.

4. Fourth-Largest LNG Importer

- LNG import in the country accounted for about one-fourth of total gas demand, which is estimated to double over the next five years. To meet this rising demand the country plans to increase its LNG import capacity to 50 MT in the coming years.
- India increasingly relies on imported LNG. It is the fourth-largest LNG importer.

ADVANTAGE

1. SUPPORTIVE FDI GUIDELINES

In July 2021, the Department for Promotion of Industry and Internal Trade (DPIIT) approved an order allowing 100% foreign direct investments (FDIs) under automatic route for oil and gas PSUs. The FDI limit for public sector refining projects has been raised to 49% without any disinvestment or dilution of domestic equity in existing PSUs.

2. GROWING DEMAND

India is the world's third-largest energy consumer globally. In February 2023, India's oil demand rose to a 24-year high, which resulted due to a boost in the industrial activity. It was the 15th consecutive year-on-year rise in demand.

Diesel demand in India is expected to double to 163 MT by 2029-30, with diesel and petrol covering 58% of India's oil demand by 2045.

3. RAPID EXPANSION

India aims to commercialise 50% of its SPR (strategic petroleum reserves) to raise funds and build additional storage tanks to offset high oil prices. In September 2021, the Indian government approved oil and gas projects worth Rs. 1 lakh crore (US\$ 13.46 billion) in Northeast India. These projects are expected to be completed by 2025.

In February 2021, Prime Minister Mr. Narendra Modi announced that the Government of India plans to invest Rs. 7.5 trillion (US\$ 102.49 billion) on oil and gas infrastructure in the next five years.

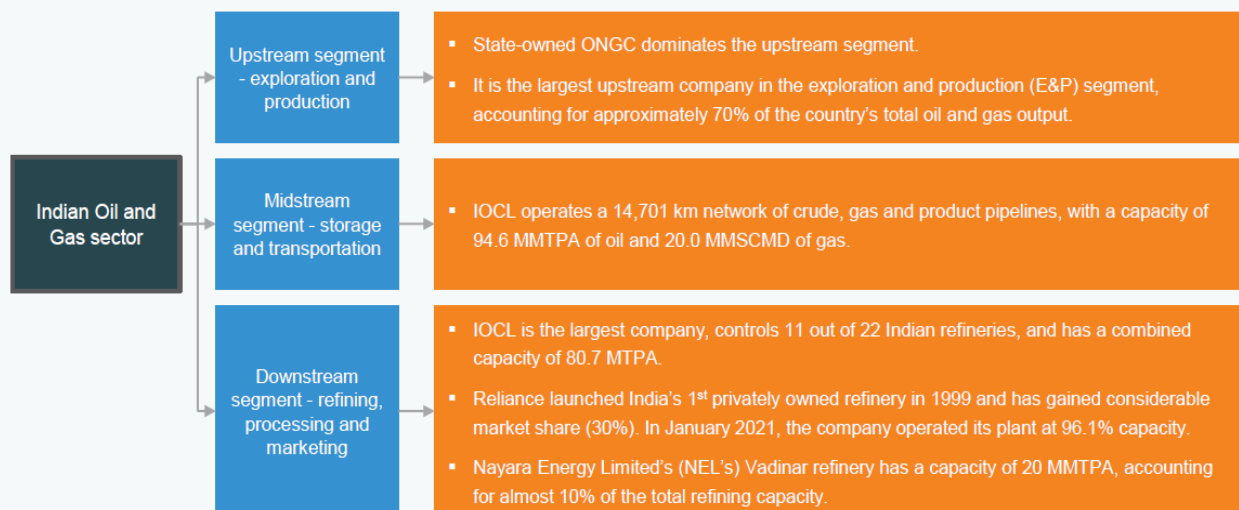

4. POLICY SUPPORT

Our track record in construction of pipeline projects has been instrumental in our consistent sales and performance. Our management team ensures efficient and rapid construction and completion of our pipeline projects, our quality assurance team ensures the quality construction of our pipeline projects, and our procurement team works with vendors who have the scale to deliver and meet our requirements to procure pipeline construction materials and equipment. We place significant emphasis on cost management and rigorously monitor our projects to ensure that they are completed within committed timelines and budgeted amounts. As a result of our end-to-end execution capabilities and in-house resources, we are able to complete our projects at competitive cost as well as create value for future projects through our efficient supply chain, which enables us to benefit from economies of scale.

3. Optimal Utilization of Resources

Our company constantly endeavours to improve our execution process, capabilities, skill up gradation of employees, modernization of plant and machineries to optimize the utilization of resources. We regularly analyse our material procurement policy and project execution process to de-bottle neck the grey areas and take corrective measures for smooth and efficient working thereby putting resources to optimal use.

4. Visible growth through a robust order book

An order book is considered one of the key indicators of future performance as it represents a portion of anticipated future revenue. Our strategy is not focused solely on order book addition but, rather, on adding quality projects with potentially higher margins and/or prestigious projects that help enhance our growing reputation. By diversifying our skill set and order book across different sectors, we are able to pursue a broader range of project tenders and consequently, optimize our business volume and profit margins. As of March 31, 2023, we have 6 major on-going projects out of which 5 projects worth approximately ₹ 19,397.33 Lakhs has been confirmed based on Letter of Allocation / Purchase Order for which ₹ 16,952.80 Lakhs worth project execution is pending and 1 project has been finalized with Purchase Order, which is worth approximately ₹ 40,667.29 Lakhs, based on management estimates, suggesting our strong order book.

4. Expand our geographical footprint.

We intend to expand our geographical footprint and grow our business by increasing orders from outside of Gujarat. To control diversification risks, we may at first, limit our expansion to other states to undertaking projects first in the areas where our core competencies lie. Through an increasingly diversified portfolio, we hope to broaden our revenue base and also hedge against risks in specific areas or projects and protect ourselves from fluctuations resulting from business concentration in limited geographical areas. With our increased experience and success, however, our rate of expansion may increase in terms of increases in the number of new states and projects we undertake. Till now 100% of our revenue from operations is from State of Gujarat. We believe that geographical diversification of our projects will reduce our reliance on our home state of Gujarat and allow us to capitalise on different growth trends in different states across the country. Further, we believe that as the reputed customers that comprise our existing client base continue to expand their geographical reach, our long-standing relationships will provide us with opportunities to undertake projects for such customers pan India.

BUSINESS PROCESS

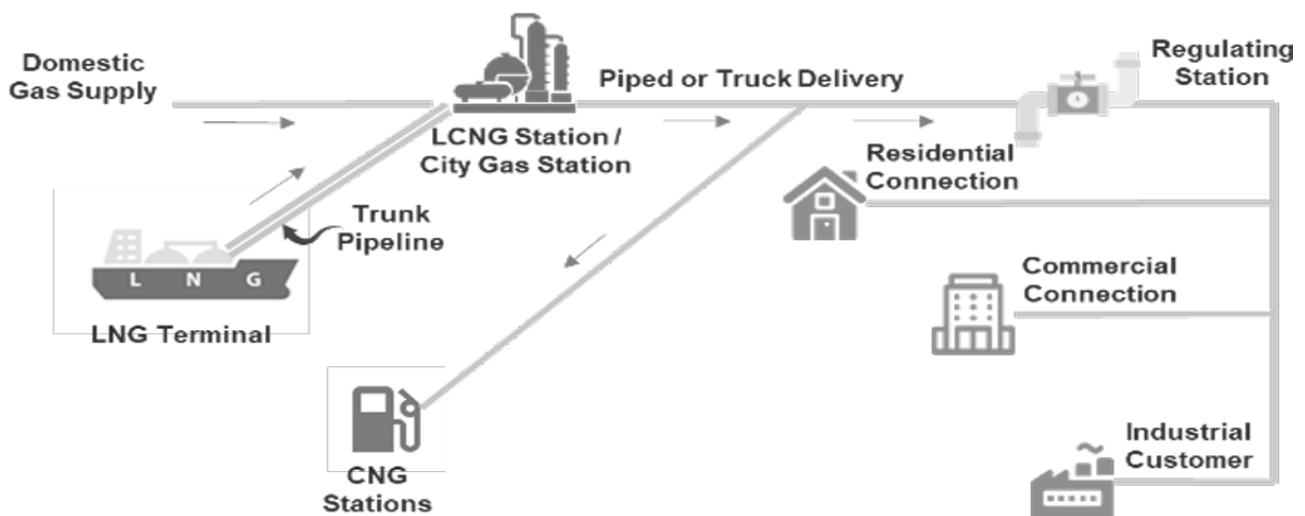

Following flow chart denotes our business process for both business verticals:

PROJECT EXECUTION PROCESS

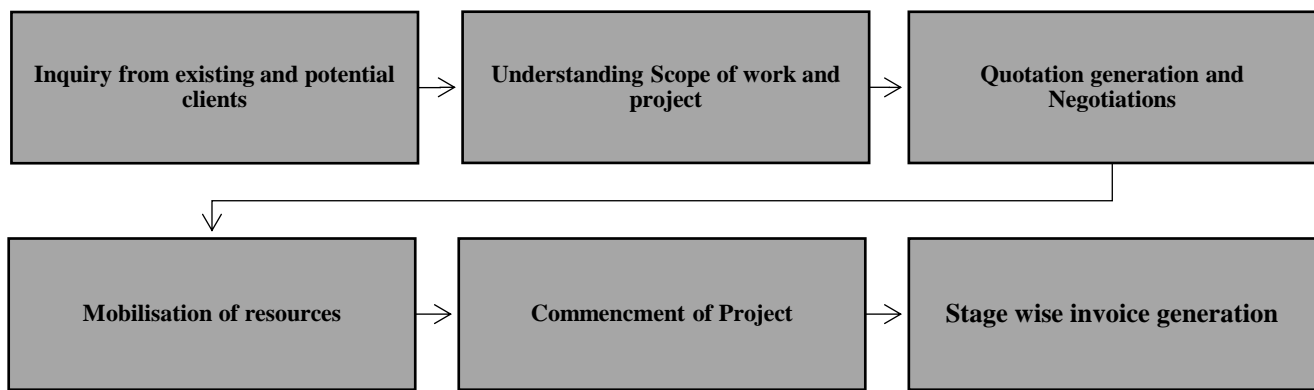

1. Oil & Gas Pipeline Projects

Following diagram enumerates gas distribution network:

We provide EPC services for pipeline network for city gas distribution service providers. We lay pipeline networks on Trunk basis between Cross Country LNG (Liquified Natural Gas) terminals, domestic LCNG (Liquified compressed natural gas) stations, gas regulation stations, households, commercial connections.

Process flow of our business operations is described below:

The typical project lifecycle for our pipeline construction business is described below:

a) Business Development:

While evaluating prospective projects, we consider a number of factors including, inter alia, project size and duration, the client's reputation and financial strength, the geographic location of the project and anticipated complexity, our current and projected workload, the likelihood of additional work, the project's cost and profitability estimates and our competitive advantage relative to other likely bidders. After we have evaluated a prospective project and determined that it meets our criteria, depending upon the manner in which said project was sourced, we meet the prospective customer to discuss the project in detail.

Prior to submitting a bid, we carry out a detailed study of the proposed project, including performing a detailed study of the technical and commercial conditions and requirements of the tender followed by a site visit. Our team determines the bidding strategy depending upon the type of contract.

b) Mobilisation of Resources and Procurement

Upon receipt and confirmation of work order, our team plans for execution of work order. Resources such as labour, machineries are allocated to allocated work order and mobilisation work starts. Execution work on awarded work order gets commenced with in due timeline along with requisite government approvals. We maintain experienced staff in our purchase department to carry out material, services and equipment procurement for our project sites. Procurement is a centralised function performed at our headquarters. Upon award of a contract, the purchase department is provided with the project details along with the budgeted rates for material, services and equipment. The material, services and equipment required for projects are estimated by the engineering personnel from the individual project sites and then passed on to the purchase department along with the schedule of requirements.

We maintain experienced staff in our purchase department to carry out material, services and equipment procurement for our project sites. Procurement is a centralised function performed at our headquarters. Upon award of a contract, the purchase department is provided with the project details along with the budgeted rates for material, services and equipment. The material, services and equipment required for projects are estimated by the engineering personnel from the individual project sites and then passed on to the purchase department along with the schedule of requirements. We have over the years developed relationships with a number of vendors for key materials, services and equipment. We have also developed an extensive vendor database for various materials and services. The materials ordered are provided to the sites from time to time as per their scheduled requirements. We maintain material procurement, tracking and control systems, which enable monitoring of our purchases. However, in certain projects, our agreements with our clients may stipulate that the client is responsible for the procurement of raw materials such as steel and cement. In such projects, we provide the clients with details of the quantity and quality of the materials required, and mutually agree upon a tentative delivery schedule for such materials.

The ability to procure material, services and equipment in a cost-effective manner, and to meet quality specifications for our projects is essential for the successful execution of such projects. We continually evaluate our existing vendors and also attempt to develop additional sources of supply for most of the materials, services and equipment needed for our projects.

c) Construction

The issuance of a letter of acceptance or letter of intent by the client signifies that we have been awarded the contract. Upon receipt of the letter, we typically commence pre-construction activities promptly, such as mobilising manpower and equipment resources and setting up other ancillary facilities. We execute projects across the various sectors, and thus, the methodology of construction depends upon the nature of the project. Construction activity typically commences once the client approves working designs and issues drawings, wherever applicable. The project team

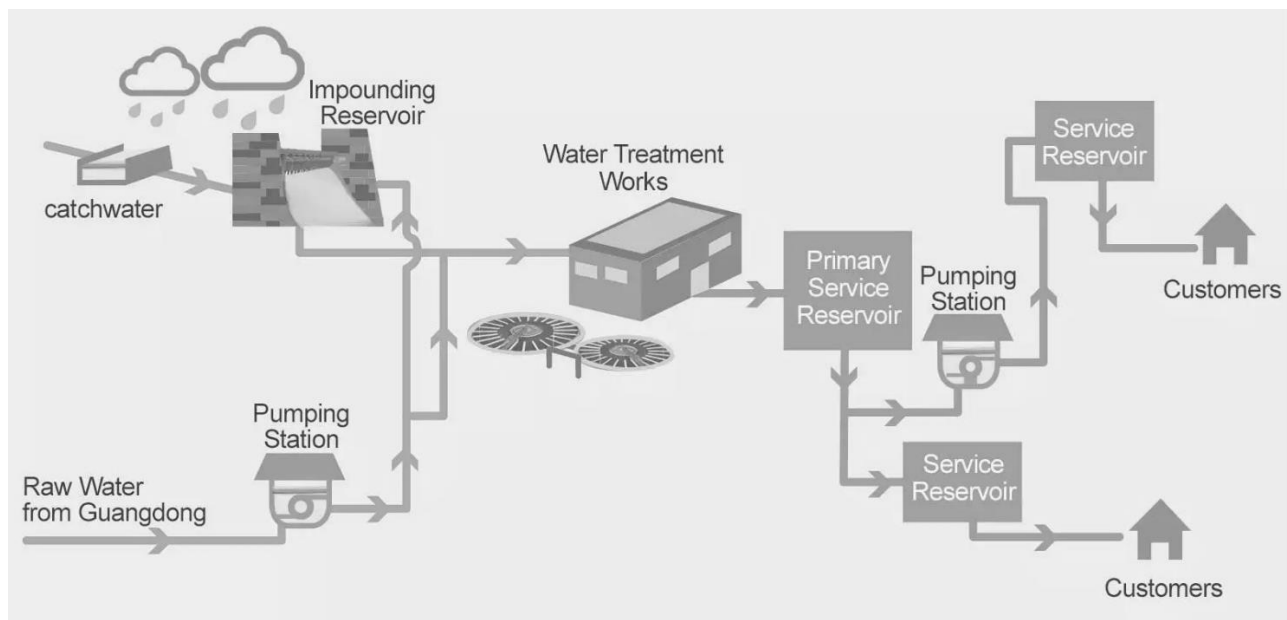

immediately identifies and works with the purchase department to procure the key construction materials and services required to commence construction. Based on the contract documents, a detailed schedule of pipeline construction activities is prepared. This schedule identifies interim milestones, if any, stipulated in the contract with corresponding time schedules for achieving these milestones. The sequence of pipeline construction activities largely follows the construction schedule that was prepared initially, subject to changes in scope requested by the client. Projects generally commence with excavation and earthmoving activities. Other major components of a typical construction project include concreting and reinforcement. Heavy earthmoving equipment, such as excavators, dumpers, loaders, dozers, graders and rock drilling tools, are used for excavation, whereas batching plants, transit mixers, and concrete pumps, among other equipment, are used for concreting. The key construction activities involved in a project depend on the nature and scope of the project.

We have a project management system that helps us track the physical and financial progress of work vis-à-vis the project schedule. Progress reports are prepared at the major project sites and sent to the project monitoring cell in the head office, which are reviewed on a weekly and on a monthly basis. Project personnel hold periodic review meetings with the client or project manager consultant, as applicable at the project sites to discuss the progress being made on the project. The project managers also hold periodic meetings with our vendors and subcontractors to Each project site has an employee designated to coordinate the billing function, who is responsible for preparing and dispatching periodic invoices to the client or the project management consultant, as applicable. Joint measurements with the client's representative are taken on a periodic basis and interim invoices prepared on the basis of such measurements are sent to the client for certification and release of interim payments.

The billing department is also responsible for certifying the bills prepared by our vendors and sub-contractors for particular projects and forwarding the same to our head office for further processing. We consider a project to be virtually complete when it is ready to be handed over. We then jointly inspect the project with the client to begin the process of handing over the project. Once satisfied, the client prepares a completion certificate, which signifies the commencement of the defects liability period or the maintenance period (i.e., the period during which we are contractually bound to rectify any defects arising out of construction). On completion of the defects liability period, we request the client to release any performance bonds or retention monies that may be outstanding. review the progress of the ongoing projects.

Whereas if the supply of goods or services happens between the states called as inter-state transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

BUSINESS/TRADE RELATED LAWS/REGULATIONS

Petroleum and Natural Gas Regulatory Board (the “PNGRB”) Regulations

i. PNGRB (Authorizing Entities to lay, build, operate or expand city or local natural gas distribution networks) Regulations, 2008 (the “CGD Authorization Regulations”)

The CGD Authorization Regulations authorize, regulate and lay down the criteria and procedure for entities to lay, build, operate or expand a City Gas Distribution (“CGD”) network. The CGD Authorization Regulations pave the way for development of CGD network and provides for selection of an entity through an open bidding process. Regulation 5 of the CGD Authorization Regulations specifies the minimum eligibility criteria for an entity to participate in the bidding process and regulation 14, 15 and 16 specify post authorization monitoring of activities, service obligations and the consequences of default and termination of authorization procedure. Regulation 5(8) provide for a period of ninety days for submission of application cum bid for grant of authorization for laying, building, operating and expanding the CGD network.

As per regulation 10(3) of the CGD Authorization Regulations, the grant of authorization to an entity cannot be renounced by way of sale, assignment, transfer or surrender to any person or entity till five years from the date of issue. On failure to abide by the terms and conditions specified in these regulations and/ or on failure to take remedial actions to correct the same, the performance bond may be encashed or the authorization of the entity may be terminated as per the procedure prescribed in regulation 16. Civil penalty under the PNGRB Act may also be applied.

The PNGRB (Authorizing Entities to Lay, Build, Operate or Expand City or Local Natural Gas Distribution Networks) Amendment Regulations, 2015, amended the CGD Authorization Regulations. Such amendments covered situations in case of a tie in the highest composite score between entities bidding for grant of authorization to lay, build, operate or expand city or local gas distribution network. In case of a tie between entities, such entities shall be asked to submit an additional bid bond and the entity submitting the bid bond of a higher amount shall be granted the said authorization. By way of this amendment, the PNGRB has also allowed an existing entity to induct a new partner in laying, building, operating or expanding city or local natural gas distribution network, till such time the existing entity continues to be a lead partner. In relation to selection criteria of an entity bidding for the authorization, the amendment lays down that an entity submitting the bid should not have been imposed any penalty under section 28 or punished under chapter IX of the PNGRB Act, during the period of preceding one year from the last date of submission of the bid. Further, the minimum time period before which an entity can renunciate its rights in favor of a new entity has been increased from three years to five years. The amendment in respect of an additional bid bond in case of a tie between the entities was applicable from the 4th City Gas Distribution Bidding Round to the 8th City Gas Distribution Bidding Round.

The PNGRB (Authorizing Entities to Lay, Build, Operate or Expand City or Local Natural Gas Distribution Networks) Amendment Regulations, 2016, amended the provisions of the CGD Authorization relating to definitions of “compression charge of CNG” and “network tariff”. The amendment also amended provisions in relation to criteria for bidding by entities and fixing of natural gas pipeline tariff etc. The amendment has allowed the PNGRB to determine the transportation tariff as per the PNGRB Act.

ii. PNGRB (Exclusivity for City or Local Natural Gas Distribution Network) Regulations, 2008 (the “PNGRB Exclusivity Regulations”)

The PNGRB Exclusivity Regulations stipulate the terms under which the PNGRB can grant exclusivity rights over CGD networks to entities selected through a bid process or through other provision of the CGD Authorization Regulations and relevant section of PNGRB Act (authorized entity). The PNGRB is empowered to grant an exclusive right to lay, build or expand CGD networks (infrastructure exclusivity). Infrastructure exclusivity is granted for a term lasting the economic life of the project which is normally expected to be twenty five years. The PNGRB can also grant an exclusive right to supply gas through the CGD network i.e., exclusivity from the purview of common carrier or contract carrier (marketing exclusivity) to an entity proposing to lay, build or expand a CGD network. Marketing exclusivity can only be granted for a limited period of time i.e., for a maximum period of five/eight years after which the authorized entity is required to allow other entities to supply gas through the CGD network on a non-discriminatory basis. Exclusivity has been offered to entities in order to incentivize investment in developing CGD networks and to facilitate their development in a planned and integrated manner. Entities selected to exclusively service a geographical area are required to furnish a specific performance bond to the PNGRB. Further, an authorized entity must comply with the service obligations set out in the regulations during and after the exclusivity period such as inter alia providing domestic PNG connections as per the bid and laying the CGD network throughout the authorized area.

iii. PNGRB (Guiding Principles for Declaring City or Local Natural Gas Distribution Network) Regulation, 2020 (the “PNGRB Guiding Principles Regulations”)

These PNGRB Guiding Principles Regulations have been issued by the PNGRB for the purpose of protecting the interests of consumers by fostering fair trade and competition amongst the entities, promoting competition among entities, avoiding infructuous investment and for maintaining or increasing supplies or for securing equitable distribution or ensuring adequate availability of natural gas to consumers. These regulations shall apply to an authorized entity after expiry of marketing exclusivity period of an authorized area.

iv. PNGRB (Technical Standards and Specifications including Safety Standards for City or Local Natural Gas Distribution Networks) Regulations, 2008 (the “Technical Standards Regulations”)

The Technical Standards Regulations address the design, materials, fabrication, installation, inspection and testing, commissioning, operation, maintenance, modifications and abandonment of CGD network. Standards for city or local natural gas distribution networks have been specified to ensure uniformity in the application of design principles and to guide selection and application of materials and components. These standards are monitored by the PNGRB to ensure compliance. In the event of failure to meet the standards laid down under the Technical Standards Regulations, the authorization of the entity may be suspended or terminated as per the procedure laid down thereunder. The PNGRB (Technical Standards and Specifications including Safety Standards for City or Local Natural Gas Distribution Networks) Amendment Regulations, 2016 have amended the provisions of Technical Standards Regulations relating to technical standards and specifications including safety standards for city or local natural gas distribution networks as specified in schedule-I which cover material and equipment (Schedule-1A), piping system components and fabrication (Schedule- 1C) and design, installation and testing (Schedule-1D).

Further, the Service Quality Regulations also prescribe a code of practice with reference to metering and billing of domestic, commercial and industrial connections and a code of practice with reference to planned network interruptions. Under these regulations, CGD entities are required to submit annual returns to the PNGRB as specified in Schedule I which covers technical, consumers, complaints, regulatory compliance plan and reliability of supply.

vi. PNGRB (Access Code for City or Local Natural Gas Distribution Networks) Regulations, 2020 (the “Access Code Regulations”)

The Access Code Regulations govern the contracts between authorized entities and shippers such as common carriers and contract carriers. The Access Code Regulations mandate authorized entities to provide nondiscriminatory access to CGD and LNG networks at the end of the exclusivity period to any entity or shippers who want access to entry point capacity, exit point capacity and delivery at CNG exit point capacity on such networks for supply of natural gas to domestic, commercial or industrial consumers. The authorized entities are required to declare entry point, exit point, exit point capacity and publish an information memorandum for seeking capacity booking on its website, 90 days before the end of its exclusivity period. The Access Code Regulations also provide for payment of certain charges to authorized entities by the shippers for gaining access to its CGD Networks. The Access Code Regulations prevent abuse of monopoly in the distribution system and promote the development of a competitive market by establishing uniform principles.

vii. PNGRB (Integrity Management System for City or Local Natural Gas Distribution Networks) Regulations, 2013 (the “Integrity Management Systems Regulations”)

The Integrity Management Systems Regulations outline the basic features and requirements for developing and implementing an effective and efficient integrity management plan for CGD networks through evaluating the risks associated with it and allocating resources effectively for prevention, detection and mitigation activities and improving the safety of CGD networks so as to protect personnel, property, public and environment and by streamlining operations. They provide a system for ensuring compliance with their provisions by conducting the following audits during operation phase:

- (a) Internal audit as per the checklist for CGD Networks provided by PNGRB to be carried out by the management of the operator every year; and
- (b) External audit by a third party, approved by the PNGRB, as per the methodology which is specified by the PNGRB every three years.

The Integrity Management System Regulations provide that in the event of any deviation or short fall in the implementation of the system the entity may be liable to face the penal consequences as per the relevant provisions of the PNGRB Act and Integrity Management System Regulations.

viii. PNGRB (Determining Capacity of City or Local Natural Gas Distribution Network) Regulations, 2015 (the “Capacity Determination Regulations”)

The Capacity Determination Regulations outline the methodology including procedure, parameters, both constant and variable and frequency of declaration of CGD network capacity which shall be used for providing access to a shipper on a non-discriminatory basis under the PNGRB (Access Code for City or Local Natural Gas Distribution Networks) Regulations, 2020.

The capacity of a CGD network shall be determined by entities on the first working day of October every year or whenever there is a change in quantity of natural gas plus or minus 10% of previous declared capacity due to any of the following:

- (a) change in quality of gas;
- (b) modification, upgradation, addition or deletion of entry or exit points; and
- (c) addition or deletion of loop lines, compressor etc.

Entities have to submit a report to the PNGRB once the determination of capacity is made. The PNGRB after analyzing the report submitted by an entity can either accept or reject the declared capacity. Once accepted, the entity shall publish the accepted CGD network capacity on its website in accordance with the Access Code Regulations.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use except where specifically stated hereunder.

2. Use of Estimates:

The preparation of financial statements in conformity with the generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities as at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. Revenue Recognition:

The revenues are recognized to the extent it is probable that the amount is measured reliably and that it is probable of inflow of resources. The revenue has been booked based on the work certified. The revenues are booked on completion of stages and accordingly, on achieving of the milestone, the revenues has been booked. The progress / work certified is measured on the basis of the certificate issued by the Chartered Engineer/Surveyor. Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as “Advances from customer”. An expected loss on the contract is recognized as an expense immediately. Cost incurred towards future contract activity is classified as project work in progress.

4. Property, Plant & Equipment and Intangible Assets:

Tangible assets are stated at cost, less accumulated depreciation and impairment, if any. Direct costs are capitalized until such assets are ready for use. Where an item of property, plant and equipment comprises major

components having different useful lives, these components are accounted for as separate items. Borrowing costs incurred during the period of construction is capitalized as part of cost of qualifying asset. The residual values, useful lives and method of depreciation of property, plant and equipment is reviewed at each financial year end and adjusted prospectively, if appropriate.

Capital work in progress comprises the cost of fixed assets that are not yet ready for their intended use at the reporting date.

Intangible assets comprising of software costs is included in the balance sheet as intangible assets when it is probable that associated future economic benefits would flow to the Company. In this case they are measured initially at purchase cost and then amortized on a written down value method over their estimated useful lives. All other costs on intangible assets including software are expensed in the statement of profit and loss as and when incurred.

5. Depreciation:

Depreciation has been charged on cost of fixed assets, adopting the following methods / rates:

- a. Depreciation is calculated using Straight Line Method (SLM) to allocate their cost, net of their residual values, over their estimated useful lives prescribed in Schedule II of the Companies Act, 2013 with the exception of the following:

Asset	Life as per Schedule II	Life of Asset considered by the management
Construction Equipment	10 / 12 / 15	12

- b. Depreciation is commenced from the dates the assets are available for their intended use and are spread over their estimated useful economic lives. The estimated useful lives of assets, residual values and depreciation method are reviewed regularly and are revised when necessary.
- c. The company has taken over the business of M/s Pratham Construction in 2015-16, a partnership firm, which was being carried on by the directors respectively, who are also directors in the company. The assets taken from the said firms has been recorded at the book value of which was reflected in the books of M/s Pratham Construction and are depreciated over the remaining useful life of the asset.
- d. If the cost of a part of the asset is significant to the total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part is determined separately for depreciation. For other assets acquired / sold during the year pro-rata charge has been made from the date of first use or till the date of sale.
- e. In accordance with Accounting Standard AS-26, Intangible Assets comprising of Computer Software are valued at cost less accumulated amortization. Computer software is amortized over the useful life of the software subject to maximum useful life of 10 years as prescribed under Accounting Standard - 26 "Intangible Asset".

6. Impairment of Asset:

At each balance sheet date, the Company reviews the carrying value of its property, plant and equipment and intangible assets to determine whether there is any indication that the carrying value of those assets may not be recoverable through continuing use. If any such indication exists, the recoverable amount of the asset is reviewed in order to determine the extent of impairment loss, if any. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash generating unit to which the asset belongs. Recoverable amount is the higher of assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value

using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. Since the company's net selling price of the cash generating unit to which the asset belongs based on the valuation report is higher than the recoverable amount, the company has not arrived at the value in use and has complied with the requirement of AS-28 based on the valuation of independent valuer.

An impairment loss is recognized in the statement of profit and loss as and when the carrying value of an asset exceeds its recoverable amount. Where an impairment loss subsequently reverses, the carrying value of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount so that the increased carrying value does not exceed the carrying value that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized in the statement of profit and loss immediately.

7. Employee Retirement Benefits:

i) Short Term:

Short Term employee benefits are recognized as an expense at the undiscounted amount expected to be paid over the period of services rendered by the employees to the company.

The service cost and net interest on the net defined benefit liability/(asset) are recognized as an expense within employee costs. The Company has not made any investment to meet the liability of gratuity payments till the financial year ended 31st March 2023. The retirement benefit obligations recognized in the balance sheet represents the present value of the defined benefit obligations arrived at based on the report of actuary.

iii) Defined Contribution Plans:

iv) Leave Encashment:

The employees of the Company are entitled for leave encashment on yearly basis. The amount accumulated during the year is paid in the next year.

8. Borrowing Cost:

Interest and other costs in connection with the borrowing of the funds to the extent related/attribution to the acquisition/construction of qualifying fixed assets are capitalized as a part of the cost of such asset up-to the date when such assets are ready for its intended use and other borrowing costs are charged to statement of Profit & Loss.

9. Inventories:

a. Construction Materials:

Construction materials are valued at lower of cost or net realizable value, on the basis of weighted average method after providing for obsolescence and other losses, where considered necessary. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.

b. Work-in-Progress:

The recognition of expenses in the statement of Profit and Loss Statement on the basis of Percentage of Completion method under which the contract cost incurred in reaching the stage of completion is matched with the percentage of work completed on the basis of the work certified by the surveyor/engineer. The cost incurred towards future contract activity and for the portion of work uncertified is classified under Project Work-in-progress. In respect of transactions covered by forward exchange contracts, the difference between the forward rate and the exchange rate at the date of transaction is recognized as income or expense at the time of maturity date.

11. Provision for Current and Deferred Tax:

Income tax expense is accounted for in accordance with AS 22- "Accounting for Taxes on Income" prescribed under the Companies (Accounting Standard) Rules, 2006 which includes current tax and deferred taxes.

Current taxes reflect the impact of tax on income of the previous year as defined under the Income Tax Act, 1961 as per applicable rates.

Deferred taxes reflect the impact of Current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years if any. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset will be recognized. Deferred tax assets are reviewed for their appropriateness of their respective carrying values at each reporting date. Deferred tax assets and deferred tax liabilities have been offset wherever the company has legally enforceable right to set off current tax assets against current tax liabilities and where deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority.

12. Cash and Cash Equivalent:

- iii. Interest payable at the end of the accounting period / year to MSME.
- iv. Interest accrued and unpaid at the end of the accounting period / year to MSME.

A provision is recognized if, as a result of a past event, the Company has a present legal obligation that is reasonably estimate, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by the best estimate of the outflow of economic benefits required to settle the obligation at the reporting date. B. Significant Accounting Policies:

1. Basis of Accounting:

The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 and the provisions of the Companies Act, 2013 to the extend notified. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use except where specifically stated hereunder.

2. Use of Estimates:

The preparation of financial statements in conformity with the generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities as at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. Revenue Recognition:

The revenues are recognized to the extent it is probable that the amount is measured reliably and that it is probable of inflow of resources. The revenue has been booked based on the work certified. The revenues are booked on completion of stages and accordingly, on achieving of the milestone, the revenues has been booked. The progress / work certified is measured on the basis of the certificate issued by the Chartered Engineer/Surveyor. Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as “Advances from customer”. An expected loss on the contract is recognized as an expense immediately. Cost incurred towards future contract activity is classified as project work in progress.

4. Property, Plant & Equipment and Intangible Assets:

Tangible assets are stated at cost, less accumulated depreciation and impairment, if any. Direct costs are capitalized until such assets are ready for use. Where an item of property, plant and equipment comprises major

components having different useful lives, these components are accounted for as separate items. Borrowing costs incurred during the period of construction is capitalized as part of cost of qualifying asset. The residual values, useful lives and method of depreciation of property, plant and equipment is reviewed at each financial year end and adjusted prospectively, if appropriate.

Capital work in progress comprises the cost of fixed assets that are not yet ready for their intended use at the reporting date.

Intangible assets comprising of software costs is included in the balance sheet as intangible assets when it is probable that associated future economic benefits would flow to the Company. In this case they are measured initially at purchase cost and then amortized on a written down value method over their estimated useful lives. All other costs on intangible assets including software are expensed in the statement of profit and loss as and when incurred.

5. Depreciation:

Depreciation has been charged on cost of fixed assets, adopting the following methods / rates:

- a. Depreciation is calculated using Straight Line Method (SLM) to allocate their cost, net of their residual values, over their estimated useful lives prescribed in Schedule II of the Companies Act, 2013 with the exception of the following:

Asset	Life as per Schedule II	Life of Asset considered by the management
Construction Equipment	10 / 12 / 15	12

- b. Depreciation is commenced from the dates the assets are available for their intended use and are spread over their estimated useful economic lives. The estimated useful lives of assets, residual values and depreciation method are reviewed regularly and are revised when necessary.
- c. The company has taken over the business of M/s Pratham Construction in 2015-16, a partnership firm, which was being carried on by the directors respectively, who are also directors in the company. The assets taken from the said firms has been recorded at the book value of which was reflected in the books of M/s Pratham Construction and are depreciated over the remaining useful life of the asset.
- d. If the cost of a part of the asset is significant to the total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part is determined separately for depreciation. For other assets acquired / sold during the year pro-rata charge has been made from the date of first use or till the date of sale.
- e. In accordance with Accounting Standard AS-26, Intangible Assets comprising of Computer Software are valued at cost less accumulated amortization. Computer software is amortized over the useful life of the software subject to maximum useful life of 10 years as prescribed under Accounting Standard - 26 "Intangible Asset".

6. Impairment of Asset:

At each balance sheet date, the Company reviews the carrying value of its property, plant and equipment and intangible assets to determine whether there is any indication that the carrying value of those assets may not be recoverable through continuing use. If any such indication exists, the recoverable amount of the asset is reviewed in order to determine the extent of impairment loss, if any. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash generating unit to which the asset belongs. Recoverable amount is the higher of assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value

using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. Since the company's net selling price of the cash generating unit to which the asset belongs based on the valuation report is higher than the recoverable amount, the company has not arrived at the value in use and has complied with the requirement of AS-28 based on the valuation of independent valuer.

An impairment loss is recognized in the statement of profit and loss as and when the carrying value of an asset exceeds its recoverable amount. Where an impairment loss subsequently reverses, the carrying value of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount so that the increased carrying value does not exceed the carrying value that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized in the statement of profit and loss immediately.

The service cost and net interest on the net defined benefit liability/(asset) are recognized as an expense within employee costs. The Company has not made any investment to meet the liability of gratuity payments till the financial year ended 31st March 2023. The retirement benefit obligations recognized in the balance sheet represents the present value of the defined benefit obligations arrived at based on the report of actuary.

iii) Defined Contribution Plans:

Contributions under defined contribution plans like provident fund, Employee State Insurance Scheme are recognized as expense for the period in which the employee has rendered service. iv) Leave Encashment:

The employees of the Company are entitled for leave encashment on yearly basis. The amount accumulated during the year is paid in the next year.

8. Borrowing Cost:

Interest and other costs in connection with the borrowing of the funds to the extent related/attribution to the acquisition/construction of qualifying fixed assets are capitalized as a part of the cost of such asset up-to the date when such assets are ready for its intended use and other borrowing costs are charged to statement of Profit & Loss.

9. Inventories:

a. Construction Materials:

Construction materials are valued at lower of cost or net realizable value, on the basis of weighted average method after providing for obsolescence and other losses, where considered necessary. Cost of inventory comprises all costs of purchase, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition.

b. Work-in-Progress:

The recognition of expenses in the statement of Profit and Loss Statement on the basis of Percentage of Completion method under which the contract cost incurred in reaching the stage of completion is matched with the percentage of work completed on the basis of the work certified by the surveyor/engineer. The cost incurred towards future contract activity and for the portion of work uncertified is classified under Project Work-in-progress. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax asset will be recognized. Deferred tax assets are reviewed for their appropriateness of their respective carrying values at each reporting date. Deferred tax assets and deferred tax liabilities have been offset wherever the company has legally enforceable right to set off current tax assets against current tax liabilities and where deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued

and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice. Subsequently, the time duration from public issue closure to listing would be reduced to be three Working Days. SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue.

- c) Phase III: The commencement period of Phase III is notified pursuant to SEBI press release bearing number 12/2023 and as per the SEBI Circular No. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, where the revised timeline of T+3 days shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. The Issue will be made under UPI Phase II of the UPI Circulars.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e. 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “*Issue Procedure*” beginning on page 219.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 219.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
