We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

4. *Our Company has taken warehouses on lease basis and some of the lease agreements are not renewed/inadequately executed, because of which operations may be adversely affected.*

As of date our Company operates from 41 warehouses, out of which 15 warehouses are owned and operated by private bodies other than Amazon / Flipkart / Reliance stores and are taken on the basis of arrangement of warehousing and logistics agreements. Under the terms of several warehousing agreements, they are required to be renewed at regular intervals, varying from warehouse to warehouse, from the date of execution. Some of the said lease agreements are not renewed as on date. Some of the warehousing agreements are not renewed and registered. If we are required to vacate the current premises, we would be required to make alternative arrangements for new warehouse, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms.

If we are required to relocate our warehouse during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition. Some of the lease agreements are not properly stamped/executed and still we are continuing our business from the respective premises. Further, the regulatory authorities may take action against us for not executing the documents properly and not paying the stamp duty for registering the agreement.

5. *Our company has entered into supply agreement and service agreement with various parties for supplying the products and for providing after sale services to the customers. Any termination of such agreements may temporarily affect our business operations.*

Our company has entered into supply agreements with various parties to manufacture and supply the products under the brand name of Akai in accordance with purchase order raised by our company. Also, service agreement has been entered into for providing after sale services including sale and supply of spare parts/consumables of various household electronics and electrical goods manufactured/ marketed by our company. Any termination or expiration of agreement will affect our business operations which will affect our future prospects, growth and profitability of our company.

6. We may be subject to risks associated with product warranty for the brand products.

We are subject to risks and costs associated with product warranties on account of supply of defective or inferior quality products within the warranty periods stipulated for such products. Any defects in the products may result in invocation of such warranties. The defects in such products or any product liability claim against us could generate adverse publicity, leading to a loss of reputation, customers and/or increase our costs, thereby adversely affecting our reputation, business, results of operations, financial condition and cash flows.

7. Our Company has capitalized certain sum of expenses in financial statement and the same expenses is considered as revenue nature while filing income tax return. Such deviation in financial statement and income tax return filed by our Company may raise a demand or penalty which may impact the financial position of our Company.

Our Company has spent a sum of ₹5339.69 Lakhs till September 30, 2023 for setting up distribution and marketing channel across India which has been capitalised and treated as “Intangible Assets under development” in the Restated Financial Statement and Audited Financial statement as the company is expecting future benefit from such investment and same will be amortised in future years as and when the capitalisation will be completed. Further such expenses are treated as revenue nature while filing income tax return and full allowance is taken on such expenses while calculating taxable income.

Although, no regulatory action or penalty has been taken/ levied on the Company from Income Tax Department till date, however, it cannot be assured that no such regulatory action or tax will be taken/ levied in the future. Therefore, if the concerned authorities impose monetary penalties on us or take certain punitive actions against our Company or its directors/ officers in relation to the same, our business and financial condition could be adversely affected.

For further details, see “Financial Information of our Company” on page 163 of this Draft Red Herring Prospectus.

8. Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.

Our top ten suppliers contributed approximately 88.27%, 98.09%, 96.65% and 94.33% of our total purchases for the period ended September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost-effective suppliers in normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

While we believe we have maintained good and long-term relationships with our other suppliers too, there can be no assurance that we will continue to have such long-term relationship with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

9. Our Trademark is not owned/registered by us and we are using the trademark pursuant to Trademark License Agreement.

Our Company is currently using the logo which is not registered in the name of our Company. It is registered in the name of Phenomenon Agents Limited with whom the company has signed Trademark License Agreement. We have a right to use the brand for the next 5 years and our whole of the business is dependent only on this trademark. If we are unable to get the agreement renewed or it stands cancelled or the agreement is renewed at terms not at par with the current agreement then, our Company may not be able to operate the business. Further we do not have any additional line of business other than our current business and in the event of our failure to renew the present Trademark License agreement, we may stand to loose materially the whole of our business resulting into the depletion of the wealth of the stakeholders.

Further our logo is also not registered. we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

For further details, please refer to section titled “Government and Other Approvals” on page 185 of this Draft Red Herring Prospectus.

10. *The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.*

The Restated Financial Information of our Company as disclosed in section titled “Restated Financial statements” beginning on Page no. 163 of this Draft Red Herring Prospectus for the period ended on September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 are provided by peer reviewed chartered accountants i.e. A Y & Company, Chartered Accountants who is not the statutory Auditor of our Company.

11. *Our business is subject to seasonal and cyclical volatility due to which there may be fluctuation in the sales of products which could lead to higher closing inventory position, which may adversely affect our business.*

We offer products that our consumers require, and our success is dependent on our ability to meet our consumers requirements. The retail consumer spending is heavily dependent on the economy and, to a large extent, on various occasions such as festivals, seasonal changes, weddings, etc. Any year also has phases of lean sales. We have also seen higher sales volume of products in a certain season. These seasonal variations in consumer demand subject our sector to a considerable degree of volatility. As a result, our revenue and profits may vary during different quarters of the financial year and certain periods may not be indicative of our financial position for a full financial year or future quarters or periods and may be below market expectations. Further, any unanticipated decrease in demand for our products during our peak selling season could result into higher closing inventory position, which may lead to sale and liquidation of inventory getting delayed against the trajectory under normal course of business, which could adversely affect our financial position and business operations. Fluctuations in the electronic retail market affect the inventory owned by electronic retailers, since merchandise usually must be manufactured in advance of the season and frequently before the trends are evidenced by customer purchases. In addition, the cyclical nature of the retail electronics business requires us to carry a significant amount of inventory, especially prior to peak selling seasons when we build up our inventory levels.

12. *Competition from online retailers who can offer products at competitive prices and are also able to offer wide range of products may adversely affect our business and our financial condition, results of operations and cash flows.*

We are witnessing a growth in the competition from online retailers who have been able to offer products at competitive prices. Due to various factors, including efficient logistics management and strategic tie-ups, online retailers are not only able to offer more discounts, but also a wider range of consumer durables. Due to the said reasons, online retailing has been witnessing noticeable growth in the recent years and increased competition from them could reduce footfalls and sales in our stores. There is no assurance that we would be able to effectively offset the advantages that our competitors in the online business may have and grow our business in a similar fashion like our online competitors, or that the competition we face would not drain our financial or other resources. If we are unable to adequately address such competitive pressures, our business, financial condition, results of operations and cash flows may be adversely affected.

13. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company from private to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 185 of this Draft Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

14. We have indebtedness, which requires cash outflows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.

As of September 30, 2023, our long-term borrowings were ₹17.23 Lacs & short term borrowings were ₹3033.83 Lacs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "Financial Information of our Company" on page 163 of this Draft Red Herring Prospectus.

15. If we are not successful in managing our growth, our business may be disrupted and our profitability may be reduced.

We have experienced sustainable growth in recent years and expect our businesses to continue to grow significantly. Our future growth is subject to risks arising from a rapid increase in volume, and inability to retain and recruit skilled staff. We may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit.

Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls within our Company. In particular, continued expansion may pose challenges in:

- maintaining high levels of quality control and cost effective manufacturing, and customer satisfaction;
- recruiting, training and retaining sufficient skilled management and technical personnel for our manufacturing process;
- developing and improving our internal administrative infrastructure, particularly our financial,
- operational, communications, internal control and other internal systems;
- making accurate assessments of the resources;
- adhering to the standards of health, safety and environment and quality and process execution to meet clients' expectations;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- Managing relationships with customers, suppliers and lenders.

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

16. Our top ten customers contribute majority of our revenues from operations. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Our top ten customers have contributed 51.26%, 44.69%, 38.58% & 36.61% of our revenues for the period ended September 30, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Standalone Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Since our business is concentrated among relatively few significant customers, we could experience a reduction in our results of operations, cash flows and liquidity if we lose one or more of these customers or the amount of business we obtain from them is reduced for any reason, including but not limited on account of any dispute or disqualification.

Accordingly, we cannot assure you that the customers which contribute to the major part of our revenue stream will pay us the amounts due to us on time, or at all. In the event any of our significant customers fail to fulfil their respective obligations, our business, financial condition and results of operations would be adversely affected. While we believe we have maintained good and long term relationships with our customers, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability

17. Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.

As on September 30, 2023, our total secured borrowings amounted to Rs. 1999.65 Lacs from Karnataka Bank Limited. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards repayment of debt, which will reduce the availability of cash to fund working capital requirements, capital expenditures and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;
- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and

The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, Please refer chapter titled “Financial Information of our Company” beginning on Page 163 of this Draft Red Herring Prospectus.

18. We have entered into and may enter into related party transactions in the future also.

Our Company in the past has entered into Related Party Transactions and may continue to do so in future also, which may affect our competitive edge. Our Company had entered into various transactions with our Promoter Group Entities and Group Companies. These transactions, inter-alia includes sale and purchase of goods. Our Company entered into such transactions at arm length price due to easy proximity and quick execution. The transaction is in compliance with Companies Act, 2013 and other applicable regulations.

However, there is no assurance that we could not have obtained better and more favourable terms that our Company not entered into such related party transactions. Our Company may enter into such transactions in future also and we cannot assure that in such an event there would be no adverse effect on results of our operations. For details please refer to Annexure J on Related Party Transactions of the Auditor’s Report under Section titled “Financial Information of the Company” beginning on page no. 163 of this Draft Red Herring Prospectus

Our Promoters, Managing Director, Whole Time Directors and senior management have significantly contributed to the growth of our business, and our future success is dependent on the continued services of our senior management team. Our Managing Director Mr. Anurag Sharma and whole-time Directors Mr. Anil Sharma and Mr. Rahul Mehta, have been employed with our Company since our incorporation. They are having experience of 18, 42 and 22 years each in Electronics Industry which turn out beneficial for the Company. An inability to retain any key managerial personnel may have an adverse effect on our operations. Our ability to execute contracts and to obtain new clients also depends on our ability to attract, train, motivate and retain highly skilled professionals, particularly at managerial levels. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be unable to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our whole time directors or other key personnel or an inability on our part to manage the attrition levels; may materially and adversely impact our business, results of operations, financial condition and growth prospects.

The success of our business is also dependent upon our ability to hire, retain, and utilize qualified personnel and corporate management professionals who have required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the requisite expertise and we may not be able to satisfy the demand from customers for our Products because of our inability to successfully hire and retain qualified personnel.

For details regarding income tax deductions, please refer to the chapter “Statement of Possible Tax Benefits” on page 88 of this Draft Red Herring Prospectus.

New or revised accounting policies or policies related to tax, duties or other such levies promulgated from time to time by the relevant authorities may significantly affect our results of operations. We cannot assure you that we would continue to be eligible for such lower tax rates or any other benefits. Our revenues are influenced by our marketing plans including advertising. If we adopt unsuccessful marketing and advertising campaigns, we may fail to attract new customers or retain existing customers. If our marketing and advertising strategies are unsuccessful, our business and results of operations could be materially adversely affected.

In addition, increased spending by our competitors on advertising and promotion or an increase in the cost of advertising in the markets in which we operate, could adversely affect our results of operations and financial condition. Moreover, a material decrease in our funds earmarked for marketing and advertising or an ineffective advertising campaign relative to that of our competitors, could also adversely affect our business and results of operations.

Our major fund based and non-fund based financial assistance has been sanctioned by the bank, i.e. the Karnataka Bank on the security of assets. The Company is dependent on the Banks for its Working Capital requirement and further borrowing would be limited to the extent of security available. Since future borrowing would be limited so there would be a need to raise further capital in the future.

Additionally, this may result into difficulty in arranging for funds for re-payment and may also affect the financial position of the Company. If we are unable in the future to generate sufficient cash flow from operations or borrow the necessary capital to fund our future capital expenditures, we will be forced to limit our growth. In addition, we may not be able to service our existing customers or to acquire new customers. The inability to raise additional capital on acceptable terms could have an effect on our business, results of operations and financial condition.

For further details of our loans, Please refer chapter titled “Financial Information of our Company” beginning on Page 163 of this Draft Red Herring Prospectus.

32. Our operating results could be adversely affected by weakening of economic conditions due to lock-down in all parts of India and other parts of world due to pandemic covid-19, or similar unforeseen events.

Our overall performance depends in part on the global economic conditions. Certain economies have experienced periods of downturn due to the present situation prevailing in India and outside India due to pandemic disease of Covid-19 which impact financial markets, concerns regarding the stability and viability of major financial institutions, declines in gross domestic product, and increases in unemployment and volatility in commodity prices and worldwide stock markets, and excessive government debt.

Moreover, the instability in the global economy affects countries in different ways, at different times and with varying severity, which makes the impact to our business unforeseeable and indeterminate. During such downturns, many customers may delay or reduce digital marketing purchases. Contract negotiations may become more protracted or conditions could result in reductions in the sale of our services, longer sales cycles, pressure on our margins, difficulties in collection of accounts receivable or delayed payments, increased default risks associated with our accounts receivables, slower adoption of new technologies and increased price competition. Any of these events, as well as a general weakening of, or declining corporate confidence in the global economy,

or a curtailment in government or corporate spending could delay or decrease our revenues and therefore have a material adverse effect on our business, operating results and financial condition.

33. *We are subject to the risk of failure of, or a material weakness in, our internal control systems.*

We are exposed to risks arising from the inadequacy or failure of internal systems or processes, and any actions we may take to mitigate these risks may not be sufficient to ensure an effective internal control environment. Given our high volume of transactions, errors may be repeated or compounded before they are discovered and rectified. Our management information systems and internal control procedures may not be able to identify non-compliance or suspicious transactions in a timely manner, or at all. Where internal control weaknesses are identified, our actions may not be sufficient to fully correct such weaknesses. In addition, several of our collection related processes are yet to be fully automated, which may increase the risk that human error, tampering or manipulation will result in losses that may be difficult to detect. As a result, we may incur expenses or suffer monetary losses, which may not be covered by our insurance policies and may result in a material effect on our business, financial condition and results of operations.

34. *Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.*

Our Company is incorporated in India, and our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters
- prevailing regional or global economic conditions, including in India's principal export markets; and
- Other significant regulatory or economic developments in or affecting India or its Electronics sector.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition and the price of the Equity Shares.

35. *Our Promoters and Executive Directors hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Our Promoters and Directors are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For further information on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see "Our Management" and "Our Promoters and Promoter Group" on pages 146 and 158 respectively of this Draft Red Herring Prospectus.

36. *The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.*

The company's operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company's control. The results of operations during any financial year or from period to period may differ from one another or from the expected results operation. Its business, results of operations and financial condition may be adversely affected by, inter alia, a decrease in the growth and demand for the products and services offered by the us or any strategic alliances which may subsequently become a liability or non-profitable. Due to various reasons including the above, the future performance may fluctuate or adversely vary from our past performances and may not be predictable. For further details of our operating results, section titled "Financial Information of the Company" beginning on Page 163 of this Draft Red Herring Prospectus.

37. *We have not independently verified certain data in this Draft Red Herring Prospectus.*

We have not independently verified data from the Industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

38. *Any Penalty or demand raise by statutory authorities in future will affect our financial position of the Company.*

Our Company is mainly engaged in trading of electronic goods which attracts tax liability such as Income tax & Goods and Service Tax and other applicable provision of the Acts. However, the Company has been depositing the return under above applicable acts but any demand or penalty raise by concerned authority in future for any previous year and current year will affect the financial position of the Company. For detail, please refer “Outstanding Litigation and Material Development” beginning on page 174 of this Draft Red Herring Prospectus. Any such penalty arising in future may lead to financial loss to our Company.

39. *We have not identified any alternate source of raising the working capital mentioned as our ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

Our Company has not identified any alternate source of funding for our working capital requirement and for general corporate purposes and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of working capital or may require our Company to borrow funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the Company.

For further details of our Object for the Issue, Please refer chapter titled “Object for the Issue” beginning on Page 76 of this Draft Red Herring Prospectus.

40. *Our Company’s management will have flexibility in utilizing the Net Proceeds from the Issue. The deployment of the Net Proceeds from the Issue is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the Net Proceeds towards working capital requirement and for general corporate purposes as described in “Objects of the Issue” on page 76 of this Draft Red Herring Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the Issue size is not in excess of ₹100 crores. The management of our Company will have discretion to use the Net Proceeds from the Issue, and investors will be relying on the judgment of our Company’s management regarding the application of the Net Proceeds from the Issue. Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

41. *Any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds for raising funds for working capital Requirement. For further details of the proposed objects of the Issue, please refer the chapter titled “Objects of the Issue” beginning on Page No. 76 of this Draft Red Herring Prospectus. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Red Herring Prospectus without obtaining the approval of shareholders

of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

42. Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●] of the Issue Proceed. As on date we have not identified the use of such funds.

Portion of our Issue Proceeds are proposed to be utilized for general corporate purposes which constitute [●] of the Issue Proceed. We have not identified the general corporate purposes for which these funds may be utilized. The deployment of such funds is entirely at the discretion of our management in accordance with policies established by our Board of Directors from time to time and subject to compliance with the necessary provisions of the Companies Act. For details please refer the chapter titled "Objects of the Issue" beginning on Page No. 76 of this Draft Red Herring Prospectus.

43. The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapters "Capital Structure" beginning on pages 59 of this Draft Red Herring Prospectus.

44. We have not paid any dividends in the last five Financial Years. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.

Our ability to generate returns for Shareholders is dependent on a host of factors that impact our business and financial condition. Our Company has not paid any dividend on its Equity Shares during the last five Financial Years. The amount of future dividend payments, if any, will depend upon a number of factors, such as our future earnings, financial condition, cash flows, working capital requirements, contractual obligations, applicable Indian legal restrictions, capital expenditures and cost of indebtedness.

In addition, our ability to pay dividends may be impacted by a number of factors, including restrictive covenants under the loan or financing agreements our Company may enter into. Even in years in which we may have profits, we may decide to retain all of our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. There can therefore be no assurance that we will be able to pay dividends in the future. For further details, see section "Dividend Policy" on page 162 of this Draft Red Herring Prospectus.

45. We will continue to be controlled by our Promoters and Promoter Group after the completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.

As on the date of this Draft Red Herring Prospectus, our Promoters and Promoter Group hold 93.16% of the issued and outstanding paid-up share capital of our Company. Following the completion of the Issue, our Promoters and Promoter Group will continue to hold together [●]% of our post-Issue Equity Share capital. As a result, they will have the ability to influence matters requiring shareholders' approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders' meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any other business decisions. We cannot assure you that our Promoters and Promoter Group will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

For further details regarding our shareholding, please refer to chapter titled “Capital Structure” beginning on Page 59 of this Draft Red Herring Prospectus.

46. *Our Equity Shares have never been publicly traded and may experience price and volume fluctuations following the completion of the Issue, an active trading market for the Equity Shares may not develop, the price of our Equity Shares may be volatile and you may be unable to resell your Equity Shares at or above the Issue Price or at all.*

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for our Equity Shares will develop or, if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is determined considering various financial factors of the Company and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after this Issue could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Red Herring Prospectus. A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment

47. *Deployment of the Proceeds is not subject to any monitoring by any independent agency. The purposes for which the Proceeds of the Issue are to be utilized are based on management estimates and have not been appraised by any banks or financial institutions.*

We intend to use the Proceeds of the Issue for the purposes described in “Objects of the Issue” on page no. 76 of this Draft Red Herring Prospectus. Our management may revise estimated costs, fund requirements and deployment schedule owing to factors relating to our business and operations and external factors which may not be within the control of our management. The utilization of the Proceeds of the Issue and other financings will be monitored only by the Audit Committee of the Board and is not subject to any monitoring by any independent agency. Further, pending utilization of the Proceeds of the Issue, we intend to deposit the Net Proceeds only in scheduled commercial banks included in the Second Schedule of the Reserve Bank of India Act, 1934.

Our funding requirements and the deployment of the Proceeds of the Issue are based on management estimates and have not been appraised by any banks or financial institutions. In view of the highly competitive nature of the industry in which we operate, we may have to revise our management estimates from time to time and, consequently, our funding requirements may also change.

48. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

49. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue Price of our Equity Shares has been determined on the basis of the Fixed Price Issue. This price is based on numerous factors. For further information, see “Basis for Issue Price” beginning on page 83 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;

- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

50. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

51. The requirements of being a listed company may strain our resources and distract management.

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

52. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

EXTERNAL RISK FACTORS

53. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

54. Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the “CCI”). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void. Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the “Combination Regulation Provisions”), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

55. The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.

The goods and service tax (“GST”) that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

56. *You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.*

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

57. *Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.*

We currently operate in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the IT industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India's economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

58. *Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.*

The Ministry of Corporate Affairs ("MCA"), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 ("Ind AS") which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards ("ICDS"), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

59. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.*

Our financial statements are prepared and presented in conformity with Indian GAAP. No attempt has been made to reconcile any of the information given in this document to any other principles or to base it on any other standards. Indian GAAP differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar.

60. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

61. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

62. A significant change in the Government of India's economic liberalization and deregulation policies could adversely affect our business and the price of our Equity Shares.

The Government of India has traditionally exercised, and continues to exercise, a dominant influence over many aspects of the economy. Unfavourable government policies including those relating to the internet and e-commerce, consumer protection and data-privacy, could adversely affect business and economic conditions in India, and could also affect our ability to implement our strategy and our future financial performance. Since 1991, successive governments, including coalition governments, have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector and encouraging the development of the Indian financial sector. However, the members of the Government of India and the composition of the coalition

in power are subject to change. As a result, it is difficult to predict the economic policies that will be pursued by the Government of India. For example, there may be an increasing number of laws and regulations pertaining to the internet and ecommerce, which may relate to liability for information retrieved from or transmitted over the internet or mobile networks, user privacy, content restrictions and the quality of services and products sold or provided through the internet. The rate of economic liberalization could change and specific laws and policies affecting the financial services industry, foreign investment, currency exchange and other matters affecting investment in our securities could change as well. Any significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Justification of negative working capital in previous years:

In the year 2020 with the spread of COVID in the world the entire global economy came to a standstill. India was also effected and the entire country was locked down for nearly two months and parts of the country remained closed even after that. This abrupt shut down of business effected all businesses big and small. It was sudden blow for our company also. The entire cash inflows of

the business stopped and there were LCs and other payment commitments which could not be deferred. The management of the company approached the vendors and with their consent the LCs were further extended. This helped us survive the period of lockdown. The entire lockdown was during the period of Mar-April-May which are the peak seasons for air-conditioner sales. Our company was carrying substantial stocks of air-conditioners which got stuck. Whatever stocks we managed to place with our distributor/dealers did not move as buying white goods during pandemic was on nobody's priority list. We had to extend additional credit to all our trade partners. With stuck inventory of air-conditioners on one-side and almost negligible collection from the market, there was another challenge to keep the business running and for that purchases were to be made, for whatever little demand was coming from the market. This is when we approached an intermediary for facilitating purchases for our company. Our intermediary agreed to act as a sourcing agency for our company and in return we agreed for passing on a fixed margin on purchases sourced through them. This enabled us to keep the business running through the period of the pandemic. But again, early in the year 2021 there was a second-wave of COVID and there was a repeat of the previous year the entire summer season was effected and for nearly two quarters of the year sales were badly effected for the white goods industry. During this period, we had to further increase our dependence on buying through intermediary. This resulted in the further extension of our working capital cycle.

These two years of turmoil have adversely effected the working capital cycle of the company, but with the sales picking up things have started improving. The promoters have introduced additional funds also and have been regular in honoring their business commitments in spite of all the challenges.

Justification of increase in working capital requirement:

With the growth in business there is a continuous need to arrange for additional working capital. For immediate needs the company is finding the existing working capital limits insufficient so it has arranged for short term measures where in the purchases are being sourced through an intermediary and a part of the margin is passed on to the intermediary for arranging the purchases. This arrangement is not only affecting our margins but is also restricting us from growing at the desired pace.

Requirement of additional working capital: -

- 1) Remove Intermediary: - After getting the additional working capital the company would be in a position to purchase directly from the company and this would save it the margin it is presently passing on to the intermediary. This will not only improve the gross margins of the company but will enable it to enjoy other benefits such as extended credit which the vendors offer to their customers.
- 2) Bulk Buying: - Due to restricted working capital the company is presently making purchases in small lots which is debarring it from getting the quantity discounts which is available to buying in larger lots. With the availability of additional working capital, the company would purchase in bigger lots there by reducing its costs and increasing its margins.
- 3) Advance planning/buying of products: - For products like air conditioners the entire buying of products is planned in the winter season (Off season) as the products at that time are available at hefty discounts. Due to limited working capital company is unable to make such advance purchases and has to buy products at higher prices there by making its buying costlier than competition. With availability of additional working capital our buying would match the competition and we would be able to get better market share for our products.
- 4) Launch New Products: - The company has plans to launch a range of Interactive LED Televisions which are presently being used in Smart Schools and by corporate for meetings, displays and other commercial purposes. This is niche market with not many players at present. The company foresees huge demand and healthy margins in this product category. With the availability of working capital company will soon launch these product range also.

Till now the company was arranging its funds from either the own resources of the promoters or by borrowing it from banks and financial institutions. All borrowings from fintech companies are at a higher cost and should be resorted to as short-term measure only. On the other hand, borrowings from banks are to be backed by collateral security and after a certain level it becomes difficult to arrange for security to make additional borrowings. The infusion of funds through IPO will not only fulfill the urgent need of working capital but will also strengthen the capital base of the company and would place it in a better position to arrange funds for future growth.

GLOBAL OUTLOOK

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine remains slow and uneven. Despite economic resilience earlier this year, with a reopening rebound and progress in reducing inflation from last year's peaks, it is too soon to take comfort. Economic activity still falls short of its prepandemic path, especially in emerging market and developing economies, and there are widening divergences among regions. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, the war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical in nature, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events.

Global growth is forecast to slow from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024. The projections remain below the historical (2000–19) average of 3.8 percent, and the forecast for 2024 is down by 0.1 percentage point from the July 2023 Update to the World Economic Outlook. For advanced economies, the expected slowdown is from 2.6 percent in 2022 to 1.5 percent in 2023 and 1.4 percent in 2024, amid stronger-than-expected US momentum but weaker-than-expected growth in the euro area. Emerging market and developing economies are projected to have growth modestly decline, from 4.1 percent in 2022 to 4.0 percent in both 2023 and 2024, with a downward revision of 0.1 percentage point in 2024, reflecting the property sector crisis in China. Forecasts for global growth over the medium term, at 3.1 percent, are at their lowest in decades, and prospects for countries to catch up to higher living standards are weak. Global inflation is forecast to decline steadily, from 8.7 percent in 2022 to 6.9 percent in 2023 and 5.8 percent in 2024. But the forecasts for 2023 and 2024 are revised up by 0.1 percentage point and 0.6 percentage point, respectively, and inflation is not expected to return to target until 2025 in most cases.

Risks to the outlook are more balanced than they were six months ago, on account of the resolution of US debt ceiling tensions and Swiss and US authorities' having acted decisively to contain financial turbulence. The likelihood of a hard landing has receded, but the balance of risks to global growth remains tilted to the downside. China's property sector crisis could deepen, with global spillovers, particularly for commodity exporters. Elsewhere, near-term inflation expectations have risen and could contribute—along with tight labor markets—to core inflation pressures persisting and requiring higher policy rates than expected. More climate and geopolitical shocks could cause additional food and energy price spikes.

Growing Global Divergences

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events.

Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of prepandemic (January 2020) projections, especially in emerging market and developing economies (Figure 1.1, panel 1). The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its prepandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below prepandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with prepandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below prepandemic projections.

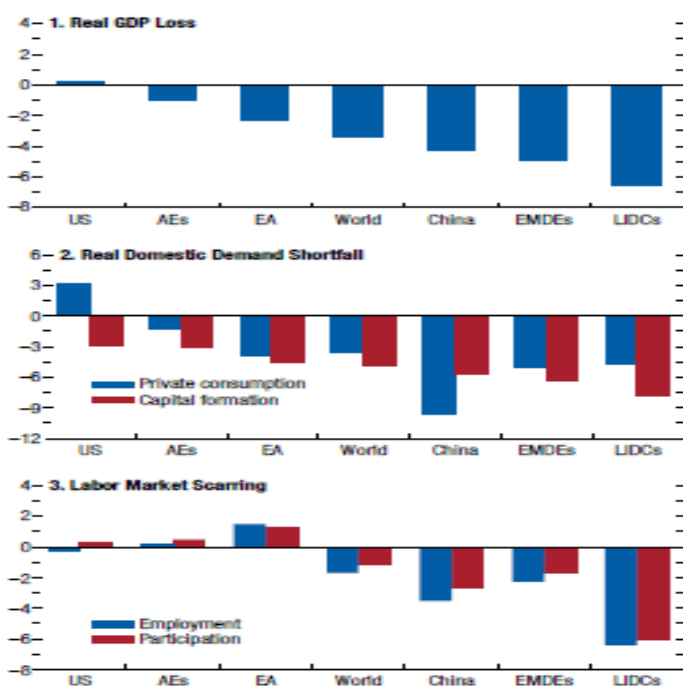

Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to prepandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes (Figure 1.1, panel 2). Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis.

Resilient Start to 2023, Signs of Slowdown

Despite these persistent challenges, several headwinds to global growth subsided earlier this year. The World Health Organization announced in May that it no longer considered COVID-19 a global health emergency, and infections and hospitalizations appear to remain relatively limited, despite a recent uptick in some regions. Supply chains, which the pandemic disrupted, have largely normalized, with shipping costs and suppliers’ delivery times back to prepandemic levels (Figure 1.2). And global financial conditions eased after Swiss and US authorities took strong action in March to contain turbulence in their banking sectors.

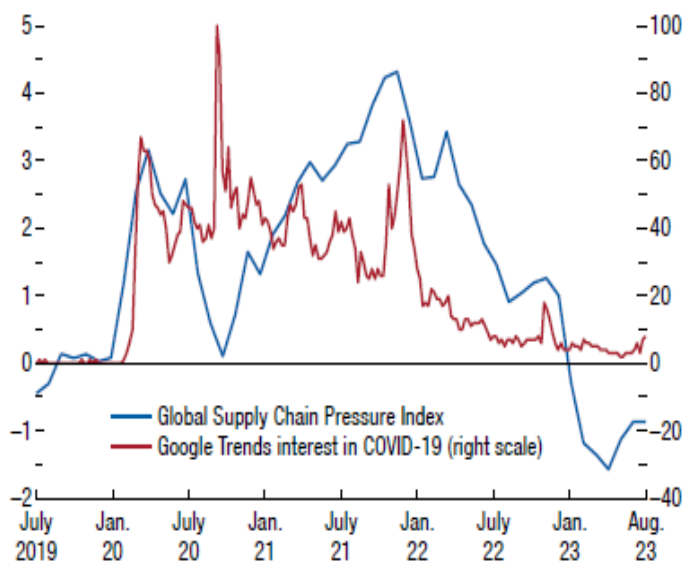

Amid these conditions, global GDP expanded by 3.4 percent in the second quarter of 2023 compared with a year earlier outperforming forecasts, including those in the April 2023 WEO. The resilience reflected strong consumption amid tight labor markets in the United States and robust activity in economies with large travel and tourism sectors, such as Italy, Mexico, and Spain. These developments offset a slowdown in more interest-rate-sensitive manufacturing sectors.

Outlook: Stable but Slow

The latest projections confirm that the global economy is slowing as inflation declines from last year’s multidecade peak. A contraction in global per capita real GDP—which often happens in a global recession—is not part of the baseline scenario. Growth and employment in the first half of the year remained more resilient than forecast in the April 2023 WEO. Although there is little change in the forecast for the global average since the July 2023 WEO Update, several shifts in growth and inflation prospects are

observed across countries. In addition, medium-term prospects for economic growth remain the lowest in decades, with middle- and lower-income countries facing a slower pace of convergence toward higher living standards.

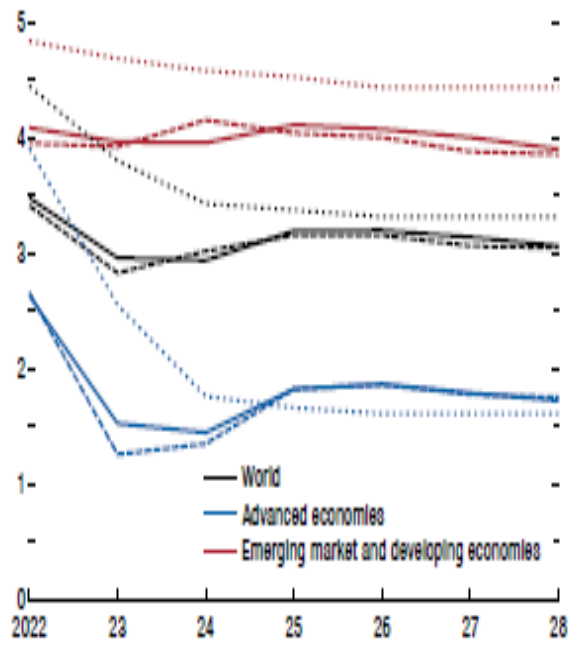

The baseline forecasts for the global economy are predicated on a number of assumptions (Figure 1.16), notably for fuel and nonfuel commodity prices, as well as the stances of monetary and fiscal policy:

Growth Outlook: Offsetting Divergences

Global growth is projected to fall from 3.5 percent in 2022 to 3.0 percent in 2023 and 2.9 percent in 2024 on an annual average basis (Table 1.1). There is a downward revision of 0.1 percentage point for 2024 compared with the July 2023 WEO Update projection. At the same time, there are more sizable changes in the underlying growth trajectories of major economies, with stronger projections for the United States and downward revisions for China and the euro area. The forecasts for growth during 2023–24 are also slower than those before the onset of the shocks of 2020–22 (Figure 1.17): the January 2022 WEO Update projected global growth at 3.8 percent in 2023 and 3.4 percent in 2024. The 2023–24 forecasts are also below the historical (2000–19) annual average of 3.8 percent. Growth is below the historical average across broad income groups, both in overall GDP as well as in per capita GDP. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to have bottomed out until the second half of 2023.

Advanced economies continue to drive the decline in annual average growth from 2022 to 2023, with stronger services activity offset by weaker manufacturing, as well as idiosyncratic factors. On average, these economies are expected to have broadly stable growth in 2024 with a pickup in 2025. By contrast, emerging market and developing economies, on average, are projected to see stable growth over 2022–24, with a slight pickup in 2025, although with sizable shifts across regions.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

- India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY2021-22,
- India is the third-largest unicorn base in the world with more than 100 unicorns valued at US\$ 332.7 billion, as per the Economic Survey.
- The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030s, for productivity and economic growth according to McKinsey Global Institute. The net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.
- According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion. PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crore (US\$ 7.13 billion).

- The wheat procurement in Rabi 2021-22 and the anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

Government Initiatives

The Government of India has taken several initiatives to improve the economic condition of the country. Some of these are:

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- In August 2022, a Special Food Processing Fund of Rs. 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of Rs. 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.
- India and Namibia entered into a Memorandum of Understanding (MoU) on wildlife conservation and sustainable biodiversity utilization on July 20, 2022, for establishing the cheetah into the historical range in India.
- In July 2022, the Reserve Bank of India (RBI) approved international trade settlements in Indian rupees (INR) in order to promote the growth of global trade with emphasis on exports from India and to support the increasing interest of the global trading community.
- In June 2022, Prime Minister Mr. Narendra Modi inaugurated and laid the foundation stone of development projects worth Rs. 21,000 crore (US\$ 2.63 billion) at Gujarat Gaurav Abhiyan at Vadodara.
- Mr. Rajnath Singh, Minister of Defence, launched 75 newly-developed artificial intelligence (AI) products and technologies during the first-ever “AI in Defence” (AIDef) symposium and exhibition, organised by the Ministry of Defence in New Delhi on July 11, 2022.
- The Indian Institute of Spices Research (IISR) under the Indian Council for Agricultural Research (ICAR) inked a Memorandum of Understanding (MoU) with Lysterra LLC, a Russia-based company for the commercialization of biocapsule, an encapsulation technology for bio-fertilization on 30 June, 2022.

In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at Rs. 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- Under PM GatiShakti Master Plan the National Highway Network will develop 25,000 km of new highways network which will be worth Rs. 20,000 crore (US\$ 2.67 billion). In 2022-23. Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

ROAD AHEAD

Local electronics design and production are being positively influenced by ongoing domestic consumption, changing dynamics in the global supply chain, and a plethora of policy initiatives to assist indigenous manufacturing in the current period is most advantageous. The smooth implementation of new initiatives and the reversal of restrictive laws will go a long way toward boosting international business confidence in India's business environment and attracting manufacturing investments.

In India, Sony, Samsung, LG Electronics, Panasonic, and other companies are the market leaders in ESDM sector. Government efforts are concentrated on bridging the digital gap. Projects like "Digital India," "Smart Cities," "ePanchayats," "National Optical Fiber Network," etc. enhanced consumer demand for electronic goods around the nation. India's middle class is rapidly expanding, which has improved the affordability of electronics products. The demand for electronic goods has increased as consumers' preferences for products and devices with smart technology (like smart LED TVs) and inventive designs have changed and disposable incomes have increased. The personal disposable income in India increased at a CAGR of 15.6% between FY07 and FY11, which is directly correlated with consumers' desire to spend money on electronics.

Fueled by strong policy support, huge investments by public and private stakeholders and a spike in demand for electronic products, the ESDM sector in India has bright prospects ahead of it and is predicted to reach US\$ 220 billion by 2025, expanding at 16.1% CAGR between 2019-2025.

Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the central and state governments on goods as services. In line with this changed business scenario, our company also shifted to manufacturing its products within India. Under manufacturing arrangement with suppliers the product specifications and features are decided by our company and post manufacturing the production is inspected by Quality Control Team approved by AKAI and then only the products are launched into the market. This setup enables our company to benefit from the economies of scale which these ODM/OEM manufacturers offers while maintaining the quality standards set by AKAI.

Post manufacturing the entire distribution, marketing, sales promotions and servicing is being handled by our company HDL. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock

Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India, from time to time, has made policy pronouncements on Foreign Direct Investment ("FDI") through press notes and press releases. The DIPP, has issued consolidated FDI Policy Circular of 2020 ("FDI Policy 2020"), effective from October 15, 2020, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2020 will be valid until the DIPP issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015 as updated from time to time by RBI and Master Direction –Foreign Investment In India (updated upto March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed).
