SECTION II: OFFER DOCUMENT SUMMARY

A. PRIMARY DETAIL OF BUSINESS AND INDUSTRY

Summary of Business

Our company is engaged in trading of various petroleum-based products for the different categories of industries based on their requirement. This includes supply of biodiesel and light density oils. Our company is also engaged in Operation & Maintenance as Job worker for Ethanol manufacturing in Government owned distilleries. We understand the market needs and upgrade our team constantly with growing technology and market trends. We provide business solutions and services to consumers of Fuels and other alternative materials across India.

For further details, please refer chapter titled “Business Overview” beginning on Page no. 93 of this Draft Prospectus.

Summary of Industry

India’s economic growth is closely related to its energy demand, therefore, the need for oil and gas is projected to increase, thereby making the sector quite conducive for investment. India retained its spot as the third-largest consumer of oil in the world as of 2022.

The Government has adopted several policies to fulfil the increasing demand. It has allowed 100% foreign direct investment (FDI) in many segments of the sector, including natural gas, petroleum products and refineries, among others. The FDI limit for public sector refining projects has been raised to 49% without any disinvestment or dilution of domestic equity in existing PSUs. Today, it attracts both domestic and foreign investment, as attested by the presence of companies such as Reliance Industries Ltd (RIL) and Cairn India. The industry is expected to attract US\$ 25 billion investment in exploration and production by 2022. India is already a refining hub with 23 refineries, and expansion is planned for tapping foreign investment in export-oriented infrastructure, including product pipelines and export terminals.

India’s crude oil production in FY23 stood at 29.2 MMT.

The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our cash flows, business, financial condition and results of operations could suffer, the price of our Equity Shares could decline, and you may lose all or part of your investment. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risks where the impact is not quantifiable and hence the same has not been disclosed in such risk factors. Investors are advised to read the risk factors carefully before taking an investment decision in this Issue. Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. ***The availability, quality and timely delivery of biofuels is an important factor for our business, any fluctuation, delay or increase in cost may affect our business and prices.***

Our company is engaged in trading of biofuels. We procure these biofuels from our suppliers. Any failure of our suppliers to deliver the product in the necessary quantities or to adhere to delivery schedules would adversely affect our business processes and our ability to deliver orders on time and at the desired level of quality. Any material shortage or interruption in the supply of biofuels due to natural causes or other factors could impact our growth and operations. Further, increase in prices of biofuels by the supplier shall lead to an increase in the price of our final product. This would have an adverse impact on our business, financial conditions and results of operations.

For Further details, kindly refer chapter titled "Business Overview" beginning on page 93 of Draft Prospectus.

2. *We may face resistance to change from existing users of conventional fossil fuel.*

We may face resistance from existing users of traditional conventional fuel to switch to bio-fuel, as such switching may require them to make certain changes to their existing fuel feeding equipment such as furnace, stove etc. and other operating patterns and convenience. This could be perceived as a considerable factor for the users on the grounds of costs, man-power adaptability and training. The management, however, believes that the switching from traditional conventional fossil fuel to bio-fuel might not involve any considerable change except minor change in certain basic equipment. In view of our management, the existing customers who have switched to bio-fuel could make it swiftly without any reportable inconvenience. The benefits of bio-fuel are far more than some basic adaptation challenges.

3. *Our company has entered into agreement with parties for operation and maintenance of ethanol plants for its production. Any termination of such agreements may have adverse effect on our business, prospects, results of operations and financial condition.*

Our company has entered into agreements with Rajasthan State Ganganagar Sugar Mills Ltd and Uttar Pradesh Cooperative Sugar Federation Limited for operation and maintenance of ethanol plants for its production. Our company produces ethanol in the manufacturing units provided by these parties and handover the final product to respective parties.

The Agreements with Rajasthan State Ganganagar Sugar Mills Ltd and Uttar Pradesh Cooperative Sugar Federation Limited has defined certain terms and conditions for operation and maintained of Ethanol Plant at their distillery such as production of ethanol as per prevailing of regulatory authorities, responsible for any damage to plant, obtain certain license, maintenance of efficiency targets etc. Breach of any terms and conditions may impact our agreement and any termination or expiration of agreement will affect our business operations which will affect our future prospects, growth and profitability of our company.

For Further details of agreement, kindly refer chapter titled “Business Overview” beginning on page 93 of Draft Prospectus.

4. *We do business with our customers on purchase order basis and do not have long-term contracts with most of them.*

Our business is conducted on purchase order basis, depending on customer requirements for energy generation. We do not have long-term contracts with most of our customers and there can be no assurance that we will continue to receive repeat orders from any of them. Further, even if we were to continue receiving orders from our customers, there can be no assurance that they will be on the same terms, and the new terms may be less favorable to us than those under the present terms. Our management attempts to ensure customer satisfaction and continuing repeat orders from them endorse our attempts.

5. *The restated financial statements have been provided by peer reviewed chartered accountants who is not statutory auditor of our Company.*

The Restated Financial Information of our Company as disclosed in section titled “Restated Financial statements” beginning on Page no. 135 of this Draft Prospectus for the period ended on July 31, 2023, May 13, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 are provided by peer reviewed chartered accountants i.e. A Y & Company, Chartered Accountants who is not the statutory Auditor of our Company.

6. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory.

7. *We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may affect our operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Additionally, we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company from partnership to private and private to public Company. Also we have entered into agreements with parties for operation and maintenance as job worker of ethanol manufacturing in the name of erstwhile partnership firm which is in process of transferring on company name.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities. There can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 153 of this Draft Prospectus.

8. *There are outstanding legal proceedings involving our Company and Group companies. Any adverse decision in such proceedings may have a material adverse effect on our business, results of operations and financial condition.*

We are involved in certain legal proceedings which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities.

We cannot provide assurance that these legal proceedings will be decided in our favor. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. A summary of the pending civil and other proceedings involving the Company is provided below:

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities. For further details of legal proceedings involving the Company, please see “Outstanding Litigation and Material Developments” beginning on page 147 of this Draft Prospectus.

9. *There is fluctuation in revenue from operations and profit margins of our Company in past years. Our inability to pursue our growth strategies successfully or at all, or an inability to manage our growth, may adversely affect our prospects.*

We have experienced significant growth in previous years and there are fluctuations in revenue from operations and Net Profit margins of our Company in previous years. For Example, the revenue from operations for the ended March 31, 2021, March 31, 2022, March 31, 2023, May 13, 2023 and July 31, 2013 is Rs. 4006.97 Lakhs, Rs. 6611.58 Lakhs, Rs.2504.35 Lakhs, Rs. 139.12 Lakhs and Rs. 158.59 Lakhs respectively and Profit Margin for the ended March 31, 2021, March 31, 2022, March 31, 2023, May 13, 2023 and July 31, 2013 are Rs. 24.19 Lakhs, Rs. 135.14 Lakhs, Rs. 57.23 Lakhs, Rs. 5.05 Lakhs and Rs. 13.49 Lakhs. The fluctuation is due to change in company strategies and model of business such shifting focus from trading business to manufacturing of job work. For further details of our financial data, please refer to chapter titled “Financial Information of the Company” and Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on Page 135 and 137 of this Draft Prospectus.

Our business prospects must be considered in light of the risks and uncertainties encountered by companies undergoing rapid growth in competitive markets. We may not be able to increase revenue or maintain profitability on a half year or an annual basis. If this occurs, our results of operations and financial condition will be adversely affected. Our growth exposes us to a wide range of increased risks. It will also place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls.

10. We have a substantial amount of outstanding indebtedness, which requires significant cash flows to service and are subject to certain conditions and restrictions in terms of our financing arrangements, which restricts our ability to conduct our business and operations in the manner we desire.

As of July 31, 2023, our long-term borrowings were ₹102.74 Lacs & short-term borrowings were ₹ 164.40 Lacs and we will continue to incur additional indebtedness in the future. Our level of indebtedness has important consequences to us, such as:

- increasing our vulnerability to general adverse economic, industry and competitive conditions;
- limiting our ability to borrow additional amounts in the future;
- affecting our capital adequacy requirements; and
- Increasing our finance costs.

In the event we breach any financial or other covenants contained in any of our financing arrangements or in the event we had breached any terms in the past which is noticed in the future, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. If the lenders of a material amount of the outstanding loans declare an event of default simultaneously, our Company may be unable to pay its debts when they fall due. For further details of our Company's borrowings, see "Financial Information of our Company" on page 135 of this Draft Prospectus.

11. If we are not successful in managing our growth, our business may be disrupted and our profitability may be reduced.

We have experienced growth in recent years and expect our businesses to continue to grow significantly. Our future growth is subject to risks arising from a rapid increase in volume, and inability to retain and recruit skilled staff. We may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit.

Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls within our Company. In particular, continued expansion may pose challenges in:

- maintaining high levels of quality control and customer satisfaction;
- recruiting, training and retaining sufficient skilled management and technical personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- making accurate assessments of the resources;
- adhering to the standards of health, safety and environment and quality and process execution to meet clients' expectations;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- Managing relationships with customers, suppliers and lenders.

If we are not successful in managing our growth, our business may be disrupted and profitability may be reduced. Our business, prospects, financial condition and results of operations may be adversely affected.

12. Any failure to comply with financial and other restrictive covenants imposed on us under our financing agreements may affect our operational flexibility, business, results of operations and prospects.

As on July 31, 2023, our total secured borrowings amounted to Rs. 146.44 Lacs. Our leverage has several important consequences, including the following:

- A portion of our cash flow will be used towards, which will reduce the availability of cash to fund working capital requirements and other general corporate purposes;
- Our borrowing cost and the existence of encumbrances on a significant portion of our immovable properties may constrain. In the event of enforcement of an event of default in connection with such secured borrowings (which is not waived or cured), our ability to continue to operate our business at such locations may be restricted;

- Fluctuations in interest rates may affect our cost of borrowing, as all or a substantial part of our borrowings is at floating rates of interest; and

The termination of, or declaration or enforcement of default under, any current or future financing agreement (if not waived or cured) may affect our ability to raise additional funds or renew maturing borrowings to finance our existing operations and pursue our growth initiatives and, therefore, have an effect on our business, results of operations and prospects.

For further details of our loans, Please refer chapter titled “Financial Information of our Company” beginning on Page 135 of this Draft Prospectus.

13. We derive a significant portion of our revenues from our top ten customers. The loss of, or a significant reduction in the revenues we receive from, one or more of these clients, may adversely affect our business.

Our top ten customers contribute approximately 100%, 100%, 99.96%, 99.97% of our revenues for the period ended July 31, 2023, March 31, 2023, March 31, 2022 and March 31, 2021. Any decline in our Quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. However, the composition and revenue generated from these clients might change as we continue to add new clients in normal course of business. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

For further of our ten top customers, please refer chapter titled “Management’s Discussion & Analysis of Financial Conditions & Results of Operations” beginning on Page 137 of Draft Prospectus.

14. Our top ten suppliers contribute majority of our purchases. Any loss of business with one or more of them may adversely affect our business operations and profitability.

Our top ten suppliers contributed approximately 100% of our total purchases for the period ended July 31, 2023, March 31, 2023, March 31, 2022 and March 31, 2021 based on Restated Financial Statements. However, our top suppliers may vary from period to period depending on the demand-supply mechanism and thus the supply process from these suppliers might change as we continue to seek more cost effective suppliers in normal course of business. Since our business is concentrated among relatively few significant suppliers, we could experience a reduction in our purchases and business operations if we lose one or more of these suppliers, including but not limited on account of any dispute or disqualification.

While we believe we have maintained good and long term relationships with our other suppliers too, there can be no assurance that we will continue to have such long term relationship with them. We cannot assure that we shall do the same quantum of business, or any business at all, with these customers, and loss of business with one or more of them may adversely affect our purchases and business operations.

15. Our failure to adapt to technological developments or industry trends could affect the performance and features of our products, and reduce our attractiveness to our customers.

As our operations grow in scope and size, whether through expansion into new markets, we must continuously improve, upgrade, adapt and expand our systems and infrastructure to offer our customers enhanced products, features and functionality ahead of rapidly evolving customer demands, while maintaining the reliability and integrity of our systems and infrastructure in a cost-efficient and competitive manner. The systems, infrastructure and technologies we currently employ may become obsolete or be unable to support our increased size and scale. Even if we are able to maintain, upgrade or replace our existing systems or innovate or customize and develop new technologies and systems, we may not be as quick or efficient as our competitors in upgrading or replacing our systems. We may be unable to devote adequate financial resources or obtain sufficient financing on commercially acceptable terms in time, or at all, which may have a material adverse effect on our business, prospects, results of operation and financial condition. For further details regarding our business, please refer to chapter titled “Business Overview” beginning on Page 93 of this Draft Prospectus.

16. The ethanol manufacturing business is slightly seasonal in our country which effect some portion of our revenue and such seasonality may affect our operating results.

The ethanol manufacturing business is slightly seasonal in our country. This is due to the fact that distillery is shut down for period of rainy season, the timing and seasonality of weather impacts the business of our Company. Thus, we are subject to seasonal factors for ethanol manufacturing business, which make our operating results unpredictable. Due to the inherent seasonality of our

business, results of one reporting period (half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. Sometimes, if there is a slight change in timing of shut down of distillery, the sales will get deferred from one reporting period to another reporting period. The sales that were supposed to take place during one financial year will be added to sales of the next financial year and therefore results of even full financial year may not necessarily be comparable to other financial year.

17. We have entered into and may enter into related party transactions in the future also.

Our Company has in the course of our business entered into, and will continue to enter into, transactions with related parties. Our Company has entered into several related party transactions with our Promoters and group companies including in relation to remuneration, loans and purchases etc. Our Company entered into such transactions at arm length price due to easy proximity and quick execution. Also the transactions are in compliance with Companies Act, 2013 and other applicable provisions. For more information regarding our related party transactions, see “Financial Information of the Company – Annexure X –Statement of Related Party Transactions” beginning on page 135 of this Draft Prospectus.

We cannot assure you that we will receive similar terms in our related party transactions in the future. Further we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties and such transactions, individually or in the aggregate, will not have an adverse effect on our reputation, cash flows, business, results of operations and financial condition.

18. We have experienced negative cash flows in the past. Any such negative cash flows in the future could affect our business, results of operations and prospects.

Our Company had reported certain negative cash flows from our operating, investing activities and financing activities in the previous years as per the Restated Financial Statements and the same are summarized as under:

Particulars	For the period ended		For the year ended March 31,		
	July 31, 2023	May 13, 2023	2023	2022	2021
Cash flow from Operating Activities	86.27	(88.53)	(80.04)	(63.17)	(158.60)
Cash flow from Investing Activities	(0.10)	(0.22)	(5.31)	(8.28)	(25.14)
Cash flow from Financing Activities	(80.98)	88.71	91.57	67.88	155.66

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may affect our business and financial operations. For further please refer chapter titled “Financial Information” beginning on Page 135 of this Draft Prospectus.

19. Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.

Our Company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the Shareholders and our Promoters or controlling Shareholders will be required to provide an exit opportunity to the Shareholders of our Company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI.

Accordingly, prospective investors in the Issue will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to enter into arrangements for utilization of Net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the Issue and our business and financial results may suffer.

48. Any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.

We propose to utilize the Net Proceeds for raising funds for working capital Requirement. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Draft Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations.

A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment

50. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have more difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders’ rights under Indian law may not be as extensive as shareholders’ rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

51. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.

For further information, see “Basis for Issue Price” beginning on page 71 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

52. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving actual or threatened change in control of us. Under the takeover regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian takeover regulations.

53. The requirements of being a listed company may strain our resources and distract management.

We have no experience as a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public that is associated with being a listed company. As a listed company, we will incur additional legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI Listing Regulation, 2015 which would require us to file audited annual and unaudited semi-annual and limited review reports with respect to our business and financial condition. If we delay making such filings, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management’s attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

54. We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure and any future equity offerings by us.

Our growth is dependent on having a balance sheet to support our activities. In addition to the IPO Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, dependent on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable

terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

EXTERNAL RISK FACTORS

55. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

56. Our business and activities may be further regulated by the Competition Act and any adverse application or interpretation of the Competition Act could materially and adversely affect our business, financial condition and results of operations.

The Competition Act seeks to prevent business practices that have or are likely to have an appreciable adverse effect on competition in India and has established the Competition Commission of India (the "CCI"). Under the Competition Act, any arrangement, understanding or action, whether formal or informal, which has or is likely to have an appreciable adverse effect on competition is void and attracts substantial penalties. Any agreement among competitors which, directly or indirectly, determines purchase or sale prices, results in bid rigging or collusive bidding, limits or controls the production, supply or distribution of goods and services, or shares the market or source of production or providing of services by way of allocation of geographical area or type of goods or services or number of customers in the relevant market or in any other similar way, is presumed to have an appreciable adverse effect on competition and shall be void. Further, the Competition Act prohibits the abuse of a dominant position by any enterprise. If it is proven that a breach of the Competition Act committed by a company took place with the consent or connivance or is attributable to any neglect on the part of, any director, manager, secretary or other officer of such company, that person shall be guilty of the breach themselves and may be punished as an individual. If we, or any of our employees are penalized under the Competition Act, our business may be adversely affected. Further, the Competition Act also regulates combinations and requires approval of the CCI for effecting any acquisition of shares, voting rights, assets or control or mergers or amalgamations above the prescribed asset and turnover based thresholds.

On March 4, 2011, the Government of India notified and brought into force new provisions under the Competition Act in relation to combined entities (the "Combination Regulation Provisions"), which came into effect from June 1, 2011. The Combination Regulation Provisions require that any acquisition of shares, voting rights, assets or control or mergers or amalgamations, which cross the prescribed asset and turnover based thresholds, must be notified to and preapproved by the CCI. In addition, on May 11, 2011, the CCI issued the final Competition Commission of India (Procedure in regard to the transaction of business relating to combinations) Regulations, 2011 (as amended). These regulations, as amended, set out the mechanism for the implementation of the Combination Regulation Provisions under the Competition Act.

57. The Indian tax regime is currently undergoing substantial changes which could adversely affect our business.

The goods and service tax ("GST") that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments.

As regards the General Anti-Avoidance Rules (“GAAR”), The general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

58. You may be restricted in your ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of your ownership position.

Under the Companies Act, a company incorporated in India must offer its shareholders pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the shares who have voted on the resolution, or unless the company has obtained approval from the Government of India to issue without such special resolution, subject to votes being cast in favour of the proposal exceeding the votes cast against such proposal. However, if the law of the jurisdiction you are in does not permit you to exercise your pre-emptive rights without our Company filing an offering document or a registration statement with the applicable authority in the jurisdiction you are in, you will be unable to exercise your pre-emptive rights unless our Company makes such a filing. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interest in our Company would be reduced.

59. Political, economic or other factors that are beyond our control may have an adverse effect on our business, results of operations and cash flows.

We currently operate in India and are dependent on domestic, regional and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent on the textile industry of the Indian economy. There have been periods of slowdown in the economic growth of India. For instance, the present situation of lock-down is prevailing in India due to pandemic Covid-19 spread in India and all other parts of world. If such condition prevail for longer time the Demand for our products & services may be adversely affected by an economic downturn in domestic, regional and global economies. India’s economic growth is also affected by various other factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, cash flows and financial condition. Also, a change in the Government or a change in the economic and deregulation policies could affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

60. Companies in India are required to prepare financial statements under the new Indian Accounting Standards. In addition, all income-tax assessee in India will be required to follow the Income Computation and Disclosure Standards.

The Ministry of Corporate Affairs (“MCA”), Government of India, has through notification dated February 16, 2015 issued the Indian Accounting Standards Rules, 2015 (“Ind AS”) which have come into effect from April 1, 2015 and are applicable to companies which fulfill certain conditions. Further, there can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any of these factors relating to the use of Ind AS may adversely affect our financial condition and results of operations.

Further, the Ministry of Finance, Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“ICDS”), thereby creating a new framework for computation of taxable income. The ICDS shall apply from the assessment year 2017-2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

61. Our business is substantially affected by prevailing economic, political and other prevailing conditions in India.

Our Company is incorporated in India, and the majority of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- Any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- Prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its ER&D sector; international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;

62. Financial instability, economic developments and volatility in securities markets in other countries may also cause the price of the Equity Shares to decline.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging Asian market countries. Financial turmoil in Europe and elsewhere in the world in recent years has affected the Indian economy. In recent times, the Indian financial markets had been negatively affected by the volatility in global financial market, including on account of certain European nations' debt troubles and move to break away by the United Kingdom from the European Union. Although, economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. Currencies of a few Asian countries have in the past suffered depreciation against the U.S. Dollar owing to, amongst other, the announcements by the U.S. government that it may consider reducing its quantitative easing measures. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur and could harm our business, future financial performance and the prices of the Equity Shares.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events, such as the European sovereign debt crisis, have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets.

However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and the trading price of the Equity Shares.

GLOBAL OUTLOOK

Near-Term Resilience, Persistent Challenges

Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.

The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking, reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation could remain high and even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China's recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for tight monetary policy, and domestic demand could again prove more resilient.

In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthening financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels

Forces Shaping the Outlook

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions.

The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a "global health emergency." Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. But forces that hindered growth in 2022 persist. Inflation remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments. As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations.

Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism-dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter (Figure 1). However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited.

At the same time, nonservices sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the

pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

The fight against inflation continues

Inflation is easing in most countries but remains high, with divergences across economies and inflation measures. Following the buildup of gas inventories in Europe and weaker-than-expected demand in China, energy and food prices have dropped substantially from their 2022 peaks, although food prices remain elevated. Together with the normalization of supply chains, these developments have contributed to a rapid decline in headline inflation in most countries. Core inflation, however, has on average declined more gradually and remains well above most central banks' targets. Its persistence reflects, depending on the particular economy considered, pass-through of past shocks to headline inflation into core inflation, corporate profits remaining high, and tight labor markets with strong wage growth, especially in the context of weak productivity growth that lifts unit labor costs. However, to date, wage-price spirals—wherein prices and wages accelerate together for a sustained period—do not appear to have taken hold in the average advanced economy, and longer-term inflation expectations remain anchored. In response to the persistence of core inflation, major central banks have communicated that they will need to tighten monetary policy further. The Federal Reserve paused rate hikes at its June meeting but signaled further ones ahead, and the Reserve Bank of Australia, Bank of Canada, Bank of England, and European Central Bank have continued to raise rates. At the same time, in some other economies, particularly in East Asia, where mobility curbs during the pandemic restricted demand for services longer than elsewhere, core inflation has remained low. In China, where inflation is well below target, the central bank recently cut policy interest rates. The Bank of Japan has kept interest rates near zero under the quantitative and qualitative monetary easing with yield curve control policy.

Acute stress in the banking sector has receded, but credit availability is tight.

Thanks to the authorities' swift reaction, the March 2023 banking scare remained contained and limited to problematic regional banks in the United States and Credit Suisse in Switzerland. Accordingly, since the April 2023 WEO, global financial conditions

have eased (Box 1), a sign that financial markets may have become less concerned about risks to financial stability coming from the banking sector. But tight monetary policy continues to put some banks under pressure, both directly (through higher costs of funding) and indirectly (by increasing credit risk). Bank lending surveys in the United States and Europe suggest that banks restricted access to credit considerably in the first quarter of 2023, and they are expected to continue to do so in coming months. Corporate loans have been declining lately, as has commercial real estate lending.

Following a reopening boost, China's recovery is losing steam.

Manufacturing activity and consumption of services in China rebounded at the beginning of the year when Chinese authorities abandoned their strict lockdown policies; net exports contributed strongly to sequential growth in February and March as supply chains normalized and firms swiftly put backlogs of orders into production. Nonetheless, continued weakness in the real estate sector is weighing on investment, foreign demand remains weak, and rising and elevated youth unemployment (at 20.8 percent in May 2023) indicates labor market weakness. High-frequency data through June confirm a softening in momentum into the second quarter of 2023.

Growth Slowing, with Shifting Composition

Global growth is projected to fall from 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024 on an annual average basis (Table 1). Compared with projections in the April 2023 WEO, growth has been upgraded by 0.2 percentage point for 2023, with no change for 2024. The forecast for 2023–24 remains well below the historical (2000–19) annual average of 3.8 percent. It is also below the historical average across broad income groups, in overall GDP as well as per capita GDP terms. Advanced economies continue to drive the decline in growth from 2022 to 2023, with weaker manufacturing, as well as idiosyncratic factors, offsetting stronger services activity. In emerging market and developing economies, the growth outlook is broadly stable for 2023 and 2024, although with notable shifts across regions. On a year-over-year basis, global growth bottomed out in the fourth quarter of 2022. However, in some major economies, it is not expected to bottom out before the second half of 2023.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

India has emerged as the fastest growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market size

- India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY2021-22,
- India is the third-largest unicorn base in the world with more than 100 unicorns valued at US\$ 332.7 billion, as per the Economic Survey.

- The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.
- India needs to increase its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030s, for productivity and economic growth according to McKinsey Global Institute. The net employment rate needs to grow by 1.5% per year from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030.
- According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.

- Merchandise exports in September 2022 stood at US\$ 32.62 billion. PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crore (US\$ 7.13 billion).
- The wheat procurement in Rabi 2021-22 and the anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

- In April 2021, Minister for Railways and Commerce & Industry and Consumer Affairs, Food & Public Distribution, Mr. Piyush Goyal, launched 'DGFT Trade Facilitation' app to provide instant access to exporters/importers anytime and anywhere.
- In April 2021, Dr. Ahmed Abdul Rahman AlBanna, Ambassador of the UAE to India and Founding Patron of IFIICC, stated that trilateral trade between India, the UAE and Israel is expected to reach US\$ 110 billion by 2030.
- India is expected to attract investment of around US\$ 100 billion in developing the oil and gas infrastructure during 2019-23.
- The Government of India is going to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

OIL AND GAS INDUSTRY

INTRODUCTION

The oil and gas sector is among the eight core industries in India and plays a major role in influencing the decision-making for all the other important sections of the economy.

India's economic growth is closely related to its energy demand, therefore, the need for oil and gas is projected to increase, thereby making the sector quite conducive for investment. India retained its spot as the third-largest consumer of oil in the world as of 2022.

The Government has adopted several policies to fulfil the increasing demand. It has allowed 100% foreign direct investment (FDI) in many segments of the sector, including natural gas, petroleum products and refineries, among others. The FDI limit for public sector refining projects has been raised to 49% without any disinvestment or dilution of domestic equity in existing PSUs. Today, it attracts both domestic and foreign investment, as attested by the presence of companies such as Reliance Industries Ltd (RIL) and Cairn India. The industry is expected to attract US\$ 25 billion investment in exploration and production by 2022. India is already a refining hub with 23 refineries, and expansion is planned for tapping foreign investment in export-oriented infrastructure, including product pipelines and export terminals.

India's crude oil production in FY23 stood at 29.2 MMT.

MARKET SIZE

According to the IEA (India Energy Outlook 2021), primary energy demand is expected to nearly double to 1,123 million tonnes of oil equivalent, as India's gross domestic product (GDP) is expected to increase to US\$ 8.6 trillion by 2040.

As of April 2022, India's oil refining capacity stood at 251.2 MMTA, making it the second-largest refiner in Asia. Private companies owned about 35% of the total refining capacity.

India is expected to be one of the largest contributors to non-OECD petroleum consumption growth globally. India's consumption of petrol products stood at 222.3 MMT in FY23. High-Speed Diesel was the most consumed oil product in India and accounted for 38.6% of petroleum product consumption in FY23.

India's consumption of petroleum products stood at almost 4.44 million barrels per day (BPD) in FY23, up from 4.05 million BPD in FY22.

India's LNG import stood at 20.1 million metric tonnes (MMT) in FY23. Gross production of LNG was 2,883 MMSCM in January, 2023. According to the International Energy Agency (IEA), consumption of natural gas in India is expected to grow by 25 BCM, registering an average annual growth of 9% until 2024.

GAIL will supply the agreed quantity of natural gas through its pipeline from Gujarat to Athgarh.
- The Petroleum and Natural Gas Regulatory Board (PNGRB), the downstream regulator, in March, 2023, announced that it has amended the PNGRB Determination of Natural Gas Pipeline Tariff regulations to incorporate provisions for Unified Tariff for natural gas pipelines with a mission of "One Nation, One Grid, and One Tariff." Based on the regulations, PNGRB has notified a levelized Unified Tariff of Rs. 73.93/MMBTU and created three tariff zones for Unified Tariff, where the first zone is up to a distance of 300 kms from the gas source, the second zone is 300-1,200 kms, and the third zone is beyond 1,200 kms.

These three oil PSUs have joined hands to launch model retail outlets to enhance service standards and amenities across their networks, which serve over six crore consumers every day.

GOVERNMENT INITIATIVES

Some of the major initiatives taken by the Government of India to promote the oil and gas sector are:

- On May 21, 2022, the Government announced a reduction in excise duty of Rs. 8 (US\$ 0.10) per litre on petrol and Rs. 6 (US\$ 0.077) per litre on diesel.

- In the Union Budget 2022-23, the customs duty on certain critical chemicals such as methanol, acetic acid and heavy feed stocks for petroleum refining were reduced.
- In February 2022, Minister of Petroleum & Natural Gas, and Housing & Urban Affairs, Mr. Hardeep Singh Puri, said that India will more than double its exploration area of oil and gas to 0.5 million sq. km. by 2025 and to 1 million sq. km. by 2030 with a view to increase domestic output.
- In 2022, the Ministry of Petroleum and Natural Gas launched the ninth bid round under the OALP. Under this round, investors have been offered around 223,031.4 square kilometre.

- The Government is planning to set up around 5,000 compressed biogas (CBG) plants by 2023.

ROAD AHEAD

Rapid economic growth is leading to greater outputs, which in turn is increasing the demand of oil for production and transportation. Crude oil consumption is expected to grow at a CAGR of 5.14% to 500 million tonnes by FY40 from 202.7 million tonnes in FY22. In terms of barrels, India's oil consumption is forecast to rise from 4.05 MBPD in FY22 to 7.2 MBPD in 2030 and 9.2 MBPD in 2050. Diesel demand in India is expected to double to 163 MT by 2029-30, with diesel and petrol covering 58% of India's oil demand by 2045. Demand is not likely to simmer down anytime soon, given strong economic growth and rising urbanisation.

Natural Gas consumption is forecast to increase at a CAGR of 12.2% to 550 MCMPD by 2030 from 174 MCMPD in 2021. India is planning to double its oil refining capacity to 450-500 million tonnes by 2030.

Energy demand of India is anticipated to grow faster than energy demand of all major economies globally on the back of continuous robust economic growth. Moreover, the country's share in global primary energy consumption is projected to increase to two-fold by 2035.

BIOFUEL INDUSTRY

India, Brazil and Indonesia will account for almost two-thirds of biofuel demand growth in 2023-24, the International Energy Agency (IEA) said

"All three countries have ample domestic feedstocks, additional production capacity, relatively low production costs and a package of policies they can leverage to increase demand," the IEA said in its Renewable Energy Market update for June 2023.

Energy security considerations helped drive biofuel production to offset the consumption of over 2 million barrels of oil a day in 2022, the IEA said. This was equivalent to 4 percent of the global transport sector oil demand.

The IEA report is aligned with India's National Policy on Biofuels, which was amended last year to advance the target year for 20 percent blending of ethanol (E20) in petrol to FY26 from 2030.

The IEA said that while biofuels offered energy security benefits, their prices climbed more quickly than those of gasoline and diesel in many countries. Biofuel prices peaked in 2022 and have since declined, it said.

In India, raw materials such as sugarcane and food grains are priced to benefit farmers. Sugarcane-based ethanol in India is priced at \$0.865 (Rs 62.65) per litre, while ethanol costs \$0.606 per litre in Brazil, according to Niti Aayog and the oil ministry.

Despite initial challenges, a successful E20 programme can save India \$4 billion (Rs 30,000 crore) annually, Niti Aayog said. That was about 35 percent of India's net oil and gas import bill of \$11.2 billion in December, as per oil ministry data.

The NITI Aayog's E20 roadmap includes production of E20-tuned engine vehicles from April 2025. It recommended gradual diversification into water-efficient maize and non-sugar food grains to produce

INDIA ETHANOL MARKET

India ethanol market size was estimated at USD 2.27 billion in 2022. During the forecast period between 2023 and 2029, India ethanol market size is projected to grow at a CAGR of 9.16% reaching a value of USD 4.15 billion by 2029. The rising demand for biofuels is expected to lead to growth in the India ethanol market. The country is gradually embracing the usage of ethanol-based fuels and electric cars, which will fuel market expansion in India. A major trend in the nation is the expansion of the agricultural sector and the use of feedstock for the production of ethanol. To increase output and support the schemes and plans that will lead to the expansion of the India ethanol market During the forecast period, the government is actively investing in the sector.

India Ethanol Market - Overview

Ethanol (C_2H_5OH) is the intoxicating agent in alcoholic drinks. This colorless and flammable liquid is made through the fermentation and distillation processes. Ethanol is a popular alcoholic beverage that can be found in beer, cider, wine, and spirits. As a result, factors such as changing lifestyles and increasing adoption of Western culture are likely to drive Ethanol demand in the country. Ethanol is also utilized as the primary fuel source or as an addition in engines that run on fossil fuels, such as gasoline. Ethanol-powered or flex-fuel vehicles are designed to run on a blend of ethanol and gasoline. These vehicles have a fuel system capable of adjusting to different fuel mixtures, allowing the driver to use either gasoline or a blend of gasoline and ethanol. The most common blend in flex-fuel vehicles is E10, a mixture of 10% ethanol and 90% gasoline. However, some flex-fuel vehicles can also run on higher blends, such as E85, a mixture of 85% ethanol and 15% gasoline.

Growth Drivers

Favorable Government Measures

The automobile industry worldwide is swiftly moving towards an all-electric future, and just a few years ago, India proposed a 100% EV objective by 2030. Nevertheless, that has now been revised to a more realistic 2040. Surprisingly, despite the EV aim, ethanol flex-fuel cars are being seriously considered, and India's minister for road transport and highways is actively lobbying for the cause. Ethanol-blended gasoline is not new to India; for over a decade, Petrol has been combined with ethanol, albeit at trace amounts of 2–3%. As modest quantities of ethanol - approximately 10% - have no negative impact on modern internal combustion engines (ICEs), ethanol blending was used to reduce India's heavy burden due to humongous crude oil import bill. The doping threshold has risen to about 10% recently, with the government aiming to raise it to 20% by 2025.

According to projections of petrol use and a 20% ethanol mix, India will require 1,016 crore liters of ethanol by 2025, much less than India's expected supply of 1,500 crore liters. The public sector oil marketing corporations under the administrative jurisdiction of the Ministry of Petroleum and Natural Gas are also investing Rs. 14,000 crore in the construction of 12 second generation (2G) bio-refineries. Besides bagasse, which is sugarcane waste left behind after juice extraction, 2G ethanol is made from agricultural leftovers, such as rice and wheat straw, maize cobs, and even empty fruit branches. As a result, the proposed 2G ethanol facilities are expected to enhance ethanol output using agricultural waste.

Impact of COVID-19 on India Ethanol Market

Due to stringent lockdown measures imposed to stop the transmission of novel corona virus, the COVID-19 outbreak caused an unprecedented drop in fuel demand, which hurt transportation and logistics. Despite the decline in fuel demand, participants in the ethanol market continued to seize opportunities as demand for hand sanitizers topped records for the first time since the epidemic hit the nation. Ethanol is a necessary component in the creation of alcohol-based hand sanitizers and has been suggested by the WHO as a potential viral deactivator. Due to the rapid surge in domestic ethanol demand in Q4 FY20, several sugar mills, including the All India Distiller Association (AIDA) and the Indian Sugar Mills Association (ISMA), increased the volume of ethanol they produced.

India Ethanol Market - By Source

Based on source, India ethanol market is divided into Sugar & Molasses-based, Grain-based, and Second Generation segments. In terms of volume, the grain-based segment dominates market. Ample availability of corn and maize and development of efficient technologies across the nation have encouraged the category growth. Grain-based ethanol is predominantly created via the dry milling technique and 1 bushel of corn may produce 2.86 gallons of denatured ethanol. As producers address issues related to yields and demand saturation, corn production is expected to slow down globally. One of the main methods for producing ethanol nationwide is presently sugar mills. National acceptance of molasses-derived ethanol is growing, and developing nations are setting the pace.

India Ethanol Market - By Purity

Based on purity, India ethanol market is split into Denatured and Undenatured segments. The denatured ethanol segment is expected to be a faster-growing segment in terms of volume, owing to rising demand from the fuel and household chemicals industries. To achieve the desired properties, it can be combined with other chemicals. It is primarily used in cleaning and sanitizing formulations for indoor and outdoor environments. Denatured alcohol is derived primarily from natural sources such as corn starch and grains, making it suitable for household use. Other major growth drivers include increased awareness of indoor hygiene and the harmful effects of synthetic ingredients.

India Ethanol Market - By Application

Based on purity, India ethanol market is divided into Industrial Solvents, Fuel & Fuel Additives, Beverages, Disinfectant, Personal Care, and other segments. The fuel and fuel additives segment leads the India ethanol market by application. Rising demand for automotive fuel and changing regulations aimed at reducing air pollution is driving up demand for the product, which is used in the production of gasoline additives to improve fuel efficiency.

As it is widely used in major end-use industries, industrial solvent is one of the steadily growing applications. Rising demand from the pharmaceutical and paints and coatings industries is expected to boost overall demand. The application segment's future growth is heavily reliant on macroeconomic factors such as government policies and federal bank provisions.

India Ethanol Market - By Region

Geographically, the India ethanol market is divided into North India, South India, East India, West India. Because of rising fuel consumption and increased industrial activity, South India is expected to grow the fastest CAGR from 2023 to 2029. The region's diverse industries, combined with steadily growing economies, are expected to boost market growth. Fuel and industrial solvents are the major application segments expected to drive the market in the region.

Competitive Landscape

Major companies in India ethanol market include United Breweries, Aventine Renewable Energy, AB Miller, Archer Daniels Midland Company, Kirin, Pure Energy Inc., and Cargill Corporation. The key strategies used by these market leaders are new product launches, mergers & acquisitions, and alliances. To grow their market share, these companies are also focusing on investing in innovations, collaborations, and expansions.

OUR BUSINESS OFFERINGS

1) TRADING OF BIOFUELS:

Our Company is a supplier of various petroleum-based products for the different categories of industries based on their requirement. We understand the market needs and upgrade our team constantly with growing technology and market trends.

We basically trade in two types of Biofuels:

Biofuels Specifications:

1. Our fuel qualifies as Bio-Diesel B-10
2. Indigenously Manufactured at Chunar and Varanasi
3. An Environment friendly fuel
4. Has low sulphur content thus making it more suitable for Diesel Engines
5. An alternative fuel to any engine using diesel
6. Can be used and any kind of Engines, Gensets or Machines
7. Being a clean fuel its usage any diesel engine
8. Matches all criteria for Bharat Stage 6 as prescribed by Bureau of Indian Standards

BioDiesel Utilization:

- On-Road Vehicles: All Vehicles having Diesel Engine can be powered by Biodiesel without any hassle.
- Off-Road Vehicles: Natural Biodiesel fuel can be used for construction, mining, and farm machinery.
- Marine Vessels: Natural Biodiesel can be used in marine engines safely. Marine use is especially attractive due to the elimination of any possibility for contamination of waterways.
- Stationary Power Generation: With new power generation capacity coming online, Natural biodiesel makes an attractive choice to meet the regulations. Many stationary applications are permitted sources requiring exhaust emission control system, which will work well with biodiesel but will not work with diesel fuel.
- Boiler: With natural gas prices rising high, biodiesel can be substituted easily for natural gas with minor changes necessary to the burner train.
- Hybrid Vehicles: With many states now mandating hybrid electric vehicles (including the fuel cell hybrid), biodiesel will make excellent reforming fuel.
- Lubricity Agent /Additive: Natural biodiesel can also be used as a lubricity agent/enhancer in many applications. It is especially useful in marine applications where water contamination with petroleum lubricity agents can create problems. With the low-sulfur fuel regulation of future, biodiesel can be used as a lubricity additive. A 1-2% biodiesel added to diesel fuel can increase diesel lubricity by 65%.
- Fuel Additive: Biodiesel can also be used as a diesel fuel additive for the purpose of keeping the injectors, pumps and other combustion components clean. A 1-2% blend should be sufficient for this purpose.

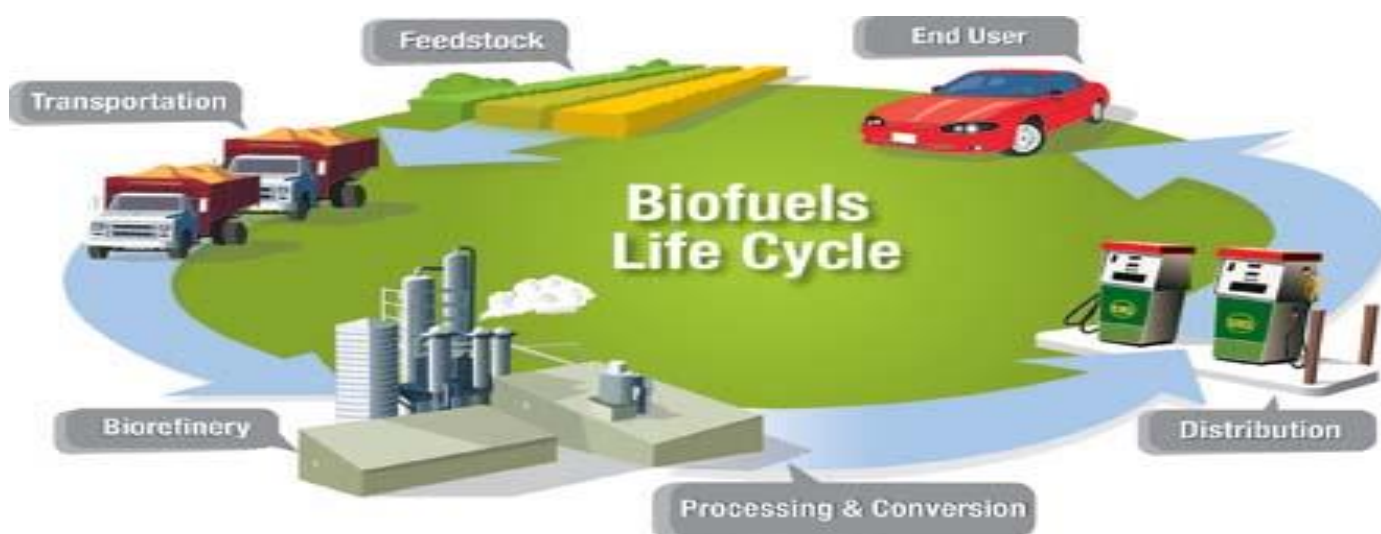

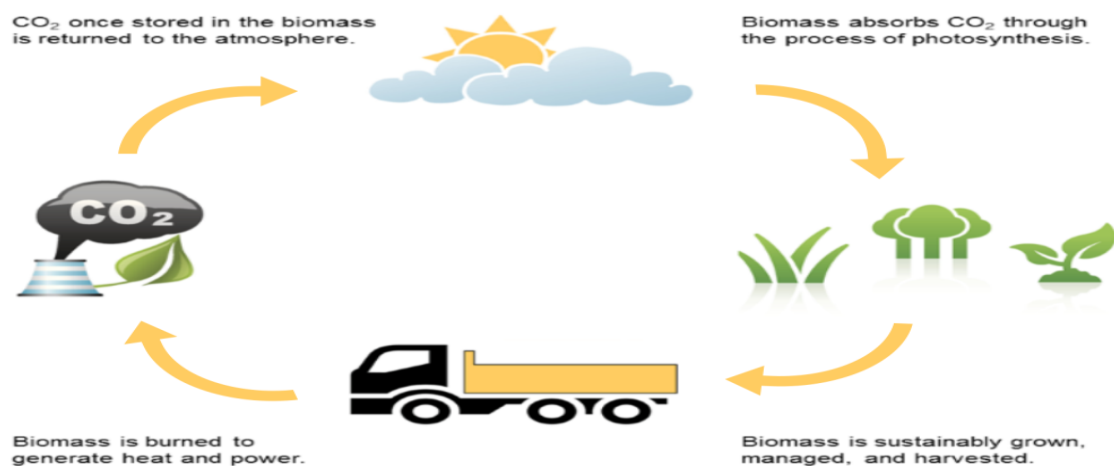

Technical Evaluation of Biodiesel

Biodiesel is a clean-burning fuel and safe alternative to replace traditional petroleum diesel. It has high-lubricity and can be a fuel component for use in existing, unmodified diesel engines. This means that no retrofits are necessary when using biodiesel fuel in any diesel-powered combustion engine. It is the only alternative fuel that offers such convenience. Biodiesel acts like petroleum diesel, but produces less air pollution, comes from renewable sources, is biodegradable and is safer for the environment. Biodiesel fuels can help create local economic revitalization and local environmental benefits.

Our Biodiesel provides improved efficiency thus increasing the average of vehicle. There is minimal carbon formation in the engine. It shall be experienced as no sulphur deposition in the exhaust chambers

Biodiesel Life Cycle

Light Diesel Oil

Light diesel oil comprises of distillate fuel with small proportions of residual fuel. LDO (Light Diesel Oil) is largely an industrial fuel. It acts as a key ingredient in the generation of electricity and heat in a number of production units. It has been used since a long time for such purposes and has gained much importance and inevitable value.

- The LDO (Light Diesel Oil)) consists of Medium length chains of hydrogen and carbon mainly alkanes, cycloalkanes, aromatics and oils. Basically LDO (Light Diesel Oil) is termed for medium commercial extracts from crude oil.
- LDO (Light Diesel Oil) is widely used by various industries in thier manufacturing activities for the purpose of generation of heat and power. It has a lower flash point compared to heavier Fuel Oil (FO), for easier ignition.
- LDO (Light Diesel Oil) is a medium colored fuel, either distilled or residual fraction of various oils that is extracted while distillation.This fuel is free flowing in nature.
- Class C category fuel.
- Flash point above 60 degrees Celsius.
- Effective fuel alternative for varieties of furnace & boiler applications.
- Accurately composed & provides superior performances in engines & machines.

Comparison of Revenue from Operations:

The Revenue from Operation in the year ended March 31, 2021 is Rs. 4006.97 Lakhs which is increased to Rs. 6611.58 Lakhs. The reason for such increase was due to expansion of its trading business which was in Uttar Pradesh and neighboring states till the year 2021 but from the year 2021-22 its expand to other states such as Gujarat, Karnataka and Kolkata. The other reason for such increase in Revenue from operations was active marketing of our trading business in all states of India.

Secondly the Revenue from operation decrease from the year ended March 31, 2022 i.e. Rs. 6611.58 Lakhs to Rs. 2504.35 Lakhs in the year ended March 31, 2023. The reason for decrease in revenue is due to shifting focus and working capital from trading business to manufacturing of ethanol on Job work basis. In the year 2022-23, our Company has received a tender from The Rajasthan State Ganganagar Sugar Mills Ltd. (RSGSM Ltd.) and The Kisan Sahkari Chini Mills Ltd., Ghosi Distt. Mau, Uttar Pradesh (The Distillery Unit) and signed agreement for Operation and maintenance of ethanol plant as Job-worker at government owned distilleries. The reason from shifting focus and working capital from trading business to manufacturing of ethanol on Job work basis is that the ethanol manufacturing business is higher in Profit margins as compared to trading business and very few players are involved in similar services of operation and maintenance of ethanol plant. The major dip in turnover is due to decrease in trading revenue.

Lastly the revenue from operation from April 01, 2023 to July 31, 2023 is Rs. 297.71 Lakhs which is from manufacturing of ethanol on Job work basis. Further the distillery plant is not operated from month of June till October due to rainy seasonal. The manufacturing of ethanol starts from November month; hence the revenue is comparative low in initial four months of financial year.

Comparison of Profit Margins:

The Profit after tax in the year ended March 31, 2021 is Rs. 24.39 Lakhs which is increased to Rs. 135.14 Lakhs. The reason for such increase was due to increase in revenue from operation and increased profit margin from sales to other states such as Orissa, Jharkhand and Bihar as compared to Uttar Pradesh only.

Secondly the Profit after Tax decrease from the year ended March 31, 2022 i.e. Rs. 135.14 Lakhs to Rs. 57.23 Lakhs in the year ended March 31, 2023. The sole reason for decrease is due to decrease in revenue from operations as there is substantial decrease in revenue. In addition to that since there is decrease in Profit after tax but the Net Profit Margin is increase from 2.04% in the year 2022 to 2.29% in the year 2023.

Lastly the Profit after tax from April 01, 2023 to July 31, 2023 is Rs. 18.54. The sole reason for decrease is due to decrease in revenue from operations as there is substantial decrease in revenue as per justification mentioned above. In addition to that since there is decrease in Profit after tax but the Net Profit Margin is increase from 2.29% in the year 2023 to 6.23% in the period ended July 31, 2023.
