SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

Global growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income—only three years after emerging from the pandemic-induced recession of 2020. Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it, including across major advanced economies. Although this tightening has been necessary for price stability, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. This drag is set to deepen given the lags between changes in monetary policy and its economic impacts, and the fact that real rates are expected to continue to increase.

Asset prices have been in broad, synchronous decline, investment growth has weakened substantially, and housing markets in many countries are worsening rapidly. Shockwaves continue to emanate from the Russian Federation’s invasion of Ukraine, especially in energy and other commodity markets. Against this backdrop, confidence has fallen precipitously. The world’s three major engines of growth—the United States, the euro area, and China—are undergoing a period of pronounced weakness, with adverse spillovers for emerging market and developing economies (EMDEs), many of which are already struggling with weakening domestic conditions.

Global inflation has been pushed higher by demand pressures, including those from the lagged effects of earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. In some countries, inflation has also been spurred by large currency depreciations relative to the U.S. dollar, as well as tight labor market conditions.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies. Although inflation is likely to gradually moderate over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. In response, central banks around the world have been tightening policy faster than previously expected. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers.

INDIAN ECONOMY

Introduction

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

India’s economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECLGS) is easing their debt servicing concerns. The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has been directly providing jobs in rural areas and indirectly creating opportunities for rural households to diversify their sources of income generation. Schemes like PM-Kisan and PM Garib Kalyan Yojana have helped in ensuring food security in the country, and their impact was also endorsed by the United Nations Development Programme (UNDP). The results of the National Family Health Survey (NFHS) also show improvement in rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localised lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimising the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

With monetary tightening, the US dollar has appreciated against several currencies, including the rupee. However, the rupee has been one of the better-performing currencies worldwide, but the modest depreciation it underwent may have added to the domestic inflationary pressures besides widening the CAD. Global commodity prices may have eased but are still higher compared to pre-conflict levels. They have further widened the CAD, already enlarged by India’s growth momentum. For FY23, India has sufficient forex reserves to finance the CAD and intervene in the forex market to manage volatility in the Indian rupee.

Majority of franchisee agreements, as on date, are not renewed/inadequately executed/stamped. We are continuing our business with the franchisee on same terms and conditions. However, our company is in process of renewal of the said franchise agreements on same terms and conditions stated in the original agreement executed between our company and franchisee. Any discontinuance of such arrangement may adversely affect our operations, finances and profitability of our Company.

6. *Our business is a high volume-low margin business.*

Our revenues derived from franchise as well as company operated retail stores. We may need to generate higher volume in terms of quantity to increase our profitability. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability from the said business vertical and hence adversely affect our operating results, debt service capabilities and financial conditions. Due to the nature of our business, we may not be able to charge higher margins on our products. Hence, our business is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to procurement of traded goods, timely sales, and continuous cost control of non-core activities. Our Promoters and Directors have personally guaranteed the repayment of certain loan facilities taken by us. Further our group company has given a corporate guarantee towards repayment of certain of the loans availed by us. Our They may continue to provide such guarantees and other security post listing. In case of a default under our loan agreements, any of the guarantees provided by them may be invoked, which could negatively impact on their reputation and net worth. In addition, our guarantors may be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company.

Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

9. Our insurance coverage may not be adequate to protect us against certain operating hazards and this may have a material adverse effect on our business.

Our Company has obtained insurance coverage in respect of certain risks. While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks. We may be exposed to various risks which we may not be able to foresee or may not have adequate insurance coverage. Our insurance coverage may not be adequate to cover such loss or damage to life and property, and any consequential losses arising due to such events will affect our operations and financial condition. Further, in addition to the above, any such fatal accident or incident causing damage or loss to life and property, even if we are fully insured or held not to be liable, could negatively affect our reputation, thereby making it more difficult for us to conduct our business operations effectively, and could significantly affect our business, availability of insurance coverage in the future and our results of operations. 2022-23	Gujarat	GSTR-3B	1

Although the late filing fees and interest on late deposits levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” on page 90 of this Prospectus. The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” on page 90 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

- 18. Our revenues are highly dependent on our operations in geographical region of state of Gujarat. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.**

We derive our revenue from products sold to customers based in the state of Gujarat only. If the economic conditions of State of Gujarat become volatile or uncertain or the conditions in the financial market were to deteriorate, especially in recent times due to the COVID-19 pandemic, or if there are any changes in laws applicable to our industry or if any restrictive conditions are imposed on us or our business, there will be a severe impact on the financial condition of our business. Further, the ultimate customers located in this geography may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions.

- 19. Our business is subject to seasonal and cyclical volatility due to which there may be fluctuation in the sales of products which could lead to higher closing inventory position, which may adversely affect our business.**

We offer products at our stores that our consumers require, and our success is dependent on our ability to meet our consumers’ requirements. The retail consumer spending is heavily dependent on the economy and, to a large extent, on various occasions such as festivals like Diwali, Navratri, Raksha Bandhan etc., seasonal changes, weddings, etc. Any year also has phases of lean sales. We have historically experienced seasonal fluctuation in our sales, with higher sales volumes associated with the festive period in the third quarter of each Financial Year. We have also seen higher sales volume of products in a certain season. These seasonal variations in consumer demand subject our sector to a considerable degree of volatility. As a result, our revenue and profits may vary during different quarters of the financial year and certain periods may not be indicative of our financial position for a full financial year or future quarters or periods and may be below market expectations. Further, any unanticipated decrease in demand for our products during our peak selling season could result into higher closing inventory position, which may lead to sale and liquidation of inventory getting delayed against the trajectory under normal course of business, which could adversely affect our financial position and business operations. Fluctuations in the electronic retail market affect the inventory owned by electronic retailers, since merchandise usually must be manufactured in advance of the season and frequently before the trends are evidenced by customer purchases. In addition, the cyclical nature of the retail electronics business requires us to carry a significant amount of inventory, especially prior to peak selling seasons when we build up our inventory levels.

- 20. We have working capital requirements. If we experience insufficient cash flows to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.**

Our business requires significant working capital, part of which would be met through additional borrowings in the future. In many cases, significant amounts of working capital are required to finance the procurement of branded products before payments are received from customers. Our working capital requirements may increase, under certain conditions, where payment terms do not include advance payments or include delayed payments from customers. Additionally, our working capital requirements have increased in recent years due to the general growth of our business. All these factors may result, or have resulted, in increases in our working capital needs. The details of working capital requirements are as follows:

22. *We face competition in our business from organized and unorganized players, which may adversely affect our business operation and financial condition.*

The market for our industry is competitive on account of both the organized and unorganized players. Players in this industry generally compete on key attributes such as timely delivery, pricing, the quality etc. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

23. *Our company has availed credit facility from bank and it is subject to certain restrictive covenants. Any Delay in issuing No Objection Certificate for the proposed issue may delay our proposed Initial public offering.*

At present, we avail credit facilities from HDFC Bank aggregating to ₹ 91.09 Lakh as on September 30, 2023 and ₹ 397.10 Lakhs for the year ended March 31, 2023. We have entered into mortgage agreement with our lenders and the covenants in borrowings from bank / lenders, among other things require us to obtain prior permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of the Company, declaration of dividend, capital structure of the Company; undertake any new project, implement any scheme of expansion or

acquire fixed assets, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. and for which we have received NOC from the lender Bank..

24. *We operate in a competitive industry and our market share may be adversely impacted in case we do not keep ourselves appraised of the latest consumer trends and technology and if we fail to compete effectively in the markets in which we operate.*

We operate in a competitive industry which is characterized by rapid shifts in consumer trends and technology and our market share may be adversely impacted at any time by the significant number of competitors in our industry that may compete more effectively than us. These frequent changes and their impact on consumer demand may result into both price and demand volatility, leading to change in the competitive scenario. Due to the expansive nature of our business, we face competition from various kinds of players including, players operating in retail, wholesale and e-commerce space. We compete with national and local consumer durable stores, independent retail stores and internet businesses that market similar lines of products as us. Many of our competitors are, and many of our potential competitors may be, larger, and may have substantially greater financial, marketing and other resources and, therefore, may be able to adapt to changes in customer requirements more quickly and devote greater resources in marketing and sale of their products or adopt more aggressive pricing policies than we can.

We face a variety of competitive challenges, including:

1. pricing our products to remain competitive while achieving a customer perception of comparatively higher value;
2. anticipating and quickly responding to changing consumer demands;
3. maintaining favourable brand recognition and effectively marketing our products to consumers in diverse markets;
4. providing strong and effective marketing support;
5. maintaining high levels of consumer traffic to our retail and online stores; and
6. local stores which may have a fixed clientele base and wider penetration in certain geographical areas;

Similarly, some of our organized competitors may also have advantages over us on account of, more prominent locations of their stores, more efficient distribution networks, better trained employees, greater geographic reach, broader product ranges or access to a large pool of financial resources. Further, certain regional and national competitors have already expanded in untapped new markets. As a result, we will need to put in efforts to create brands and propositions that will provide access to high value products and also create a customer connect to our brand identity.

25. *Competition from online retailers who can offer products at competitive prices and are also able to offer wide range of products may adversely affect our business and our financial condition, results of operations and cash flows.*

We are witnessing a growth in the competition from online retailers who have been able to offer products at competitive prices. Due to various factors, including efficient logistics management and strategic tie-ups, online retailers are not only able to offer more discounts, but also a wider range of consumer durables. Due to the said reasons, online retailing has been witnessing noticeable growth in the recent years and increased competition from them could reduce footfalls and sales in our stores. There is no assurance that we would be able to effectively offset the advantages that our competitors in the online business may have and grow our business in a similar fashion like our online competitors, or that the competition we face would not drain our financial or other resources. If we are unable to adequately address such competitive pressures, our business, financial condition, results of operations and cash flows may be adversely affected.

26. *Our success depends heavily upon our Promoters, Directors and Key Managerial Personnel for their continuing services, strategic guidance and financial support. Our success depends heavily upon the continuing services of Promoters, Directors and Key Managerial Personnel who are the natural person in control of our Company.*

Our Promoters and Directors have a vast experience in the field of retail business of consumer durables. They have established cordial relations with various customers and suppliers over the past several years, which have immensely benefitted our Company's current customer and supplier relations. We believe, our Promoters and Directors, who have rich experience in this industry, managing customers and handling overall businesses, has enabled us to experience growth and profitability.

We benefit from our relationship with our Promoters, Director and Key Managerial Personnel and our success depends upon their continuing services. We also depend significantly on our Directors and Key Managerial Persons for executing our day-to-day activities. The loss of any of our Promoters, Directors and Key Management Personnel, or failure to retain, recruit suitable or comparable replacements, could have an adverse effect on us. The loss of

service of the Promoters and other senior management could seriously impair the ability to continue to manage and expand the business efficiently. If we are unable to retain qualified employees at a reasonable cost, we may be unable to execute our growth strategy. For further details of our Directors and Key Managerial Personnel, please refer to the chapter titled “*Our Management*” on page 174 of this Prospectus.

- 27. *Our Company has availed ₹ 403.31 lakhs and ₹ 646.49 lakhs as unsecured loan as on September 30, 2023 and year ended March 31, 2023 from promoters, promoter group, group companies/entities and relatives of Director/Promoter, financial institutions, which are repayable on demand. Any demand from the lenders for repayment of such unsecured loan may affect our cash flow and financial condition.***

Our Company has, as per the restated audited financial statement as on September 30, 2023 and March 31, 2023, availed total sum of ₹ 403.31 lakhs and ₹ 646.49 lakhs as unsecured loan from promoters, promoter group, group companies/entities and relatives of Director/Promoter, financial institutions which may be recalled at any time. Sudden recall may impact our operations and also may force us to opt for funding at unviable terms resulting in higher financial burden. Further, we will not be able to raise funds at short notice and thus result in shortage of working capital fund. For details of transactions, please refer “*Annexure – IX - Related Party Transactions*” under the chapter titled “*Restated Financial Information*” beginning from page 198 of this Prospectus.

- 28. *Any conflict of interest which may occur between our business and any other similar business activities pursued by our Promoters and Promoter Group entity could have a material adverse effect on our business and results of operations.***

As of the date of this Prospectus, certain of our promoter group entities in which our Promoters are promoters and directors are engaged in business activities similar to our business, thereby causing a conflict of interest between our Company, our Promoters and such Promoter Group entities. We have not entered into a non-compete arrangement with them to address such conflicts. We cannot assure you that a conflict will not arise, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations. For further details of conflict of interest please refer chapter titled “*Information with respect to Group Companies/Entities*” on page 240 of this Prospectus.

- 29. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the issue price.***

Our Promoter’s average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹) *
1.	Mr. Manishbhai Girishbhai Patel	1837500	6.82
2.	Mr. Jigar Lallubhai Desai	1212750	8.35
3.	Mr. Parth Lallubhai Desai	1212750	8.35
4.	Mr. Jigneshkumar Dashrathlal Parekh	294000	8.98
5.	Mr. Amitkumar Gopalbhai Patel	275625	8.89

*The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire and Shares allotted to them as reduced by amount received on sell of shares i.e. net of sale consideration is divided by net quantity of shares acquired.

- 30. *Our Promoter and the Promoter Group will jointly continue to retain majority shareholding in our Company after the offer, which will allow them to determine the outcome of the matters requiring the approval of shareholders.***

Our promoter along with the promoter group will continue to hold collectively upto 71.64 % of the Equity share capital of the company. As a result of the same, they will be able to exercise significant influence over the control of the outcome of the matter that requires approval of the majority shareholder’s vote. Such a concentration of the ownership may also have the affect of delaying, preventing or deterring any change in the control of our company. In addition to the above, our promoter will continue to have the ability to take actions that are not in, or may conflict with our interest or the interest of some or all of our minority shareholders, and there is no assurance that such action will not have any adverse effect on our future financials or results of operations.

- 31. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors

deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders' investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our Dividend history refer to the Section "Dividend Policy" on page 197 of the Prospectus.

32. Any future issuance of our Equity Shares may dilute prospective investors' shareholding, and sales of our Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Our growth is dependent on having a strong balance sheet to support our activities. In addition to the internally generated cash flow, we may need other sources of financing to meet our capital needs which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, depending on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and such issuance may not be done at terms and conditions, which are favorable to the then existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt-to-equity ratio to increase or require us to create charges or lines on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any issuance of Equity Shares by our Company may dilute the shareholding of investors in our Company; and hence affect the trading price of our Company's Equity Shares and its ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Company's Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

33. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and the results of operations.

As of period ended September 30, 2023 and for the year ended March 31, 2023, we have ₹ 1058.22 Lakhs, ₹ 506.57 Lakhs, respectively of outstanding debt as per restated financials of the Company resulting into Debt-Equity Ratio of 0.55 and 5.03 as on September 30, 2023 and March 31, 2023, respectively.

Our level of indebtedness has important consequences to us, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

For details, please refer to chapter titled "Business Overview" beginning on page 127 of the Prospectus

34. There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

35. *Industry information included in this Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.*

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. We have not independently verified data from such industry reports and other sources. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed, and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Due to possibly flawed or ineffective collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

36. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion subject to applicable laws post discretion and as per the details mentioned in the section titled “Objects of the Issue”.*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management subject to applicable laws post discretion and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. For further details of Please refer chapter titled “Object for the Issue” beginning on page 90 of this Prospectus.

37. *Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company.*

We propose to utilize the Net Proceeds towards utilization for the working capital requirement and General Corporate Purposes of our Company. For further details of the proposed objects of the Issue, see Chapter titled as “Objects of the Issue” beginning on page 90. However, these objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake any variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of shareholders of our Company through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations. Further, our Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Issue, at a price and manner as prescribed by SEBI. Additionally, the requirement to provide an exit opportunity to such dissenting shareholders of our Company may deter our Promoters from agreeing to the variation of the proposed utilization of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoter will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Issue to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition, if any, which may adversely affect our business and results of operations.

38. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our

Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

EXTERNAL RISK FACTORS

1. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments in India may not implement new regulations and policies which will require us to obtain approvals and licenses from the central or the state governments in India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the implementation of the new regulations may have a material adverse effect on all our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. For instance, the Government has proposed a comprehensive national goods and services tax (“GST”) regime that will combine taxes and levies by the Central and state Governments into a unified rate structure. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the tax regime following implementation of the GST. The implementation of this new structure may be affected by any disagreement between certain state Governments, which could create uncertainty. Any such future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

2. *Investor may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our services may be adversely affected by an economic downturn in domestic, regional and global economies. The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of our Equity Shares. Any political instability could delay the reform of the Indian economy and could have a material adverse effect on the market for our Equity Shares. There can be no assurance to the investors that these liberalization policies will continue under the newly elected government. Protests against privatization could slow down the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting companies in the industrial equipment manufacturing sectors, foreign investment, currency exchange rates and other matters affecting investment in our securities could change as well. A significant change in India’s economic liberalization and deregulation policies could disrupt business and economic conditions in India and thereby affect our business.

4. *An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our business, results of operations and financial condition.*

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the COVID-19 virus, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

5. *Terrorist attacks or war or conflicts involving India or other countries could adversely affect consumer and business sentiment and the financial markets and adversely affect our business.*

Terrorist attacks and other acts of violence or war may adversely affect global equity markets and economic growth as well as the Indian economy and stock markets. Such acts negatively impact business and economic sentiment, which could adversely affect our business and profitability. Also, India has from time to time experienced, and continues to experience, social and civil unrest and hostilities with neighbouring countries. Armed conflicts could disrupt communications and adversely affect the Indian economy. Such events could also create a perception that investments in Indian companies involve a high degree of risk. This, in turn, could have a material adverse effect on the market for securities of Indian companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable and we therefore may not be able to foresee events that could have an adverse effect on our business.

6. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock prices.*

Global economic and political factors that are beyond our control, influence forecasts directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

7. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

8. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

9. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion affect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

10. *Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

11. *Government regulation of foreign ownership of Indian securities may have an adverse effect on the price of the Equity Shares.*

Foreign ownership of Indian securities is subject to government regulation. Under foreign exchange regulations currently in effect in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the rupees proceeds from the sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the Income Tax authorities. There can be no assurance that any approval required from the RBI or any other government agency can be obtained.

12. *A slowdown in economic growth in India may adversely affect our business, financial condition, cash flows, results of operations and prospects.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by centre or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise. There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports (oil and oil products), global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our raw materials and demand for our products and, as a result, on our business and financial results. The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

13. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter "Government and Other Statutory Approvals" on page 256 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future

operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see “Outstanding Litigation and Material Developments” on page __. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India’s Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would influence our profitability.

The Finance Act, 2022 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non- resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

14. *The Equity Shares have never been publicly traded, and the Offer may not result in an active or liquid market for the Equity Shares. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, there will be liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Offer can be volatile as a result of several factors beyond our control, including volatility in the Indian and global securities markets, our results of operations, the performance of our competitors, developments in the Indian and global machine tools industry, changing perceptions in the market about investments in this sector in India, investor perceptions of our future performance, adverse media reports about us or our sector, changes in the estimates of our performance or recommendations by financial analysts, significant developments in India’s economic liberalisation and deregulation policies, and significant developments in India’s fiscal regulations. In addition, the Stock Exchanges may experience significant price and volume fluctuations, which may have a material adverse effect on the market price of the Equity Shares. General or industry-specific market conditions or stock performance or domestic or international macroeconomic and geopolitical factors unrelated to our performance may also affect the price of the Equity Shares. In particular, the stock market as a whole in the past has experienced extreme price and volume fluctuations that have affected the market price of many companies in ways that may have been unrelated to the companies’ operating performances. For these reasons, investors should not rely on recent trends to predict future share prices, results of operations or cash flow and financial condition.

15. *The requirements of being a publicly listed company may strain our resources.*

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and, or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a

publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

Any further issuance of Equity Shares, or convertible securities or other equity-linked instruments by us may dilute your shareholding. We may be required to finance our growth through future equity offerings. Any future equity issuances by us, including a primary offering of Equity Shares, convertible securities or securities linked to Equity Shares including through exercise of employee stock options, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. In addition, any perception by investors that such issuances or sales might occur may also affect the market price of our Equity Shares. We cannot assure you that we will not issue Equity Shares, convertible securities or securities linked to Equity Shares or that our Shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

16. The sale of Equity Shares by our Promoters in future may adversely affect the market price of the Equity Shares.

After the completion of the Offer, our Promoters will still own a significant percentage of our issued Equity Shares. The sale of a large number of the Equity Shares by our Promoters could adversely affect the market price of the Equity Shares. Similarly, the perception that any such primary or secondary sale may occur, could adversely affect the market price of the Equity Shares. No assurance may be given that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

17. There is no guarantee that our Equity Shares will be listed on the relevant stock exchange in a timely manner or at all.

There is no guarantee that our Equity Shares will be listed on the relevant stock exchange in a timely manner or at all. In accordance with Indian law, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the relevant stock exchange within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

- **Stock in Trade:** As our business is High-volume and Low margin business, we are required to have variety of stock in order to attract more consumers in our stores, which is directly linked to our revenue from operations. In order to attract more consumers, we procure stock in bulk basis in order to avail discounts on the same purchase. - Trade Payables:** Trade payables include dues to micro and small enterprises and other creditors. As our business is High-volume and Low margin business, we are required to have variety of stock in order to attract more consumers in our stores, which is directly linked to our revenue from operations. For which we need to procure stock in bulk basis in order to avail better credit terms from our suppliers and discounts on the same purchases. Trade Payable Cycle is estimated to be at 0.54 Months (Approximately 14-16 Days) days which is based on trade payable cycle of FY 2022-23 to expected credit cycle from vendors in FY 2023-24. The same estimate for the FY 2024-25 is 0.49 Months (Approx. 13-15 Days). Our company expects credit period cycle of Approximately 13-16 days for FY 2023-24 and 2024-25 in order to avail the discounts from vendors and negotiate better deals.

Our Company is engaged in multi-brand retail selling of Smart Phones and allied accessories from manufacturers like Vivo, Apple, Samsung, Oppo, Realme, Nokia, Narzo, Redmi, Motorola, LG and Micromax. We are also engaged in multibrand retail selling of consumer durable electronics goods like Smart TVs, Air Conditioners, Fridges, etc. from brands like TCL, Haier, Lloyd, Daikin, Voltas, Mi , Realme, OnePlus.

As on January 05, 2024, we operate through 143 stores consisting of 39 company owned stores (“COCO Model”) and 104 Franchise operated stores (“FOCO Model”) distributed in more than 20 cities in Gujarat. Such large number of stores need to maintain a significant amount of inventory to meet the demands of various locations. Each store requires a certain level of stock to serve customers effectively. This inventory ties up a substantial portion of working capital. In order to effectively manage the stock and to avail better pricing advantage, we require to maintain sufficient inventory level at all times to meet the demand of our consumers. Also, in order to maintain sufficient stock, we provide advance to suppliers in order to avail better discounts and availability of stock. Brief details of the same along with numeric data is presented below:

Particulars	Projected	On Restated Basis
-------------	-----------	-------------------

	31-Mar-25	31-Mar-24	31-Mar-23	31-Mar-22	31-Mar-21
Stock in Trade (In ₹ Lakhs)	4,760.00	3,649.68	2,290.20	1,052.15	15.81
Change in Inventory (In ₹ Lakhs)	1,110.32	1,359.48	1,238.05	1,036.34	-
Stock in Trade (In Months)	1.24	1.14	1.06	0.69	7.50
Change in Months	0.10	0.08	0.37	(6.81)	

As mentioned above, Substantial portion of our working capital requirement is due to high inventory level which we are required to maintain due to nature of our business. It is evident from the above-mentioned table that the company has to maintain an inventory cycle of average of 30 days over the years which aligns with the company's revenue growth.

Our Retail stores offers wide range of products, including different models of smartphones, tablets, accessories, and related gadgets to cater to a diverse customer base with varying preferences and needs, having a substantial inventory is necessary. Having a well-stocked inventory ensures that customers can find the specific brand, model, or accessory they are looking for resulting into satisfaction of customer demands and increasing sales. Further, maintaining inventory in bulk also allows us to avail better pricing which allows us to avail the benefit of Economies of scale, improving our profit margins. Having well-stocked inventory also mitigate our risk against stockouts, technological shifts and supplier's constraints.

Our Historical inventory level as disclosed above is at upward trend from ₹15.81 Lakhs in FY 2020-21 to ₹1,052.15 Lakhs in FY 2021-22, showing an increase of ₹1,036.34 Lakhs as number of stores of business operations expanded in FY 2021-22. Further, Inventory stands out at ₹2,290.20 Lakhs in FY 2022-23 compared to ₹1,052.15 Lakhs in FY 2021-22, showing increase of ₹1,238.05 Lakhs. We have estimated inventory level of ₹3,649.68 Lakhs in FY 2023-24 resulting into holding period of 1.14 months (32-35 Days) showing an increase of ₹1,359.48 Lakhs from inventory level as on FY 2022-23. While for FY 2024-25, we have estimated inventory level of ₹4,760.00 Lakhs with holding period of 1.24 Months (35-37 Days) with increase of ₹1,110.32 Lakhs from previous year's inventory level.

Having multiple stores at multiple locations also tends to high operational costs like Rent Deposits, Electricity expenses, Insurance and other operational expenses. These expenses also impact our working capital requirement and we require adequate working capital on hand in order to cover such expenses.

We have estimated our working capital requirement for FY 2023-24 to be ₹3,503.81 Lakhs out of which ₹500.00 to be funded from Issue proceeds, while for FY 2024-25 our working capital requirement to be ₹4,849.94 Lakh, out of which ₹1350.00 Lakhs to be funded from Issue proceeds, as we plan to further expand our business model to more and more Tier-2 and Tier-3 cities.

GLOBAL ECONOMY

Global growth has slowed to the extent that the global economy is perilously close to falling into recession—defined as a contraction in annual global per capita income—only three years after emerging from the pandemic-induced recession of 2020. Very high inflation has triggered unexpectedly rapid and synchronous monetary policy tightening around the world to contain it, including across major advanced economies (figure 1.1.A). Although this tightening has been necessary for price stability, it has contributed to a significant worsening of global financial conditions, which is exerting a substantial drag on activity. This drag is set to deepen given the lags between changes in monetary policy and its economic impacts, and the fact that real rates are expected to continue to increase.

Asset prices have been in broad, synchronous decline, investment growth has weakened substantially, and housing markets in many countries are worsening rapidly. Shockwaves continue to emanate from the Russian Federation’s invasion of Ukraine, especially in energy and other commodity markets. Against this backdrop, confidence has fallen precipitously. The world’s three major engines of growth—the United States, the euro area, and China—are undergoing a period of pronounced weakness, with adverse spillovers for emerging market and developing economies (EMDEs), many of which are already struggling with weakening domestic conditions.

Global inflation has been pushed higher by demand pressures, including those from the lagged effects of earlier policy support, and supply shocks, including disruptions to both global supply chains and the availability of key commodities. In some countries, inflation has also been spurred by large currency depreciations relative to the U.S. dollar, as well as tight labor market conditions.

Inflation remains high worldwide and well above central bank targets in almost all inflation targeting economies. Although inflation is likely to gradually moderate over the course of the year, there are signs that underlying inflation pressures could be becoming more persistent. In response, central banks around the world have been tightening policy faster than previously expected. Monetary policy tightening in advanced economies, a strong U.S. dollar, geopolitical tensions, and high inflation have dampened risk appetite and led to widespread capital outflows and slowing bond issuance across EMDEs. Financial conditions have particularly worsened for less creditworthy EMDEs, especially if they are also energy importers (figure 1.1.B).

Fiscal space has narrowed considerably, and concerns over debt sustainability in many countries have risen as global financial conditions have made it more difficult to service debt loads that have accumulated rapidly in recent years, particularly during the pandemic. Nonetheless, many governments have announced new support measures to shield households and firms from the effects of sharply rising prices, slowing the pace of fiscal consolidation as pandemic-related stimulus is withdrawn.

Most commodity prices have eased, to varying degrees, largely due to the slowdown in global growth and concerns about the possibility of a global recession. By historical standards, however, they remain elevated, prolonging challenges associated with energy and food insecurity. Crude oil prices have steadily declined from their mid-2022 peak; meanwhile, natural gas prices in Europe soared to an all-time high in August but have since fallen back toward pre-invasion levels. Non-energy prices, particularly metal prices, have declined alongside weak demand. While food prices have eased from earlier peaks, food price inflation remains very high in some EMDEs.

Against this backdrop, global growth is forecast to slow to 1.7 percent in 2023 (figure 1.1.C). This pace of growth would be the third weakest in nearly three decades, overshadowed only by the global recessions caused by the pandemic in 2020 and the global financial crisis in 2009. This forecast is 1.3 percentage points lower than in June, largely reflecting more aggressive monetary policy tightening, deteriorating financial conditions, and declining confidence. Growth projections have been downgraded for almost all advanced economies and about two-thirds of EMDEs in 2023, and for about half of all countries in 2024 (figure 1.1.D). Global trade is also expected to slow sharply alongside global growth, despite support from a continued recovery in services trade. Downgrades to growth projections mean that global activity is now expected to fall even further below its pre-pandemic trend over the forecast horizon, with EMDEs accounting for most of the shortfall from trend (figure 1.1.E). This suggests that the negative shocks of the past three years—namely the

pandemic, the invasion of Ukraine, and the rapid increase in inflation and associated tightening of monetary policy worldwide—are having a lasting impact on economic prospects.

In advanced economies, conditions have deteriorated sharply, owing to declining confidence alongside high inflation and rapid monetary policy tightening. In the United States, one of the most aggressive monetary policy tightening cycles in recent history is expected to slow growth sharply. The euro area is also contending with severe energy supply disruptions and price hikes associated with the Russian Federation’s invasion of Ukraine. In all, growth in advanced economies is forecast to slow from 2.5 percent in 2022 to 0.5 percent in 2023.

In EMDEs, growth prospects have worsened materially, with the forecast for 2023 downgraded 0.8 percentage point to a subdued 3.4 percent. The downward revision results in large part from weaker external demand and tighter financing conditions. EMDE growth is anticipated to remain essentially unchanged in 2023 relative to last year, as a pickup in China offsets a decline in other EMDEs. Excluding China, EMDE growth is forecast to decelerate from 3.8 percent in 2022 to 2.7 percent in 2023 as significantly weaker external demand is compounded by high inflation, tighter financial conditions, and other domestic headwinds. The deviation between EMDE investment and its pre-pandemic trend is expected to remain substantial. EMDE investment growth is envisaged to remain below its 2000-21 average pace, dampened significantly by weakening activity, heightened uncertainty, and rising borrowing costs. Low-income countries (LICs) are expected to grow 5.1 percent in 2023, with forecasts downgraded in about 65 percent of countries. Cost-of-living increases and a deterioration in the external environment are weighing heavily on activity in many LICs and compounding weakness in LICs with fragile and conflict affected situations (FCS).

As a result of the sharp slowdown in global growth, per capita income is not expected to surpass 2019 levels until at least 2024 in about one-third of EMDEs. Per capita income growth is expected to be slowest where poverty is highest (figure 1.1.F). In Sub-Saharan Africa—which accounts for about 60 percent of the world’s poor - growth in per capita income over 2023-24 is forecast to average only 1.2 percent, far less than the pace that would be needed over the remainder of the decade to reach a 3 percent poverty rate by 2030.

FIGURE 1.1 Global prospects

High global inflation has prompted rapid, synchronous monetary tightening. This has contributed to worsening financial conditions, particularly for less creditworthy emerging market and developing economies (EMDEs). Global growth in 2023 is expected to be the third weakest in nearly three decades, overshadowed only by global recessions. Most country forecasts have been downgraded. The recovery from the pandemic recession is far from complete, especially in EMDEs, and the per-capita income outlook is particularly subdued for poverty-stricken countries.

Global Trade

Global trade growth decelerated in the second half of 2022, in tandem with deteriorating activity in major economies. Weakening trade mirrored the slowdown in global industrial production, as demand shifted toward its pre-pandemic composition and away from goods. Despite this moderation, goods trade surpassed pre-pandemic levels last year; meanwhile, services trade continued to recover, supported by the gradual shift in demand toward services. Tourism flows rebounded as many countries eased travel restrictions but remained well below pre-pandemic levels and uneven across regions (WTO 2022).

Global Inflation

Inflation rose throughout 2022 in almost all economies. Median global headline inflation exceeded 9 percent in the second half of the year, its highest level since 1995. Inflation reached almost 10 percent in EMDEs, its highest level since 2008, and in advanced economies just over 9 percent, the highest since 1982. Inflation was above target in virtually all countries that have adopted inflation targeting.

Soaring inflation in 2022 reflected a combination of demand and supply factors (Ha, Kose, and Ohnsorge 2022; Shapiro 2022). On the demand side, the acceleration of growth during the initial rebound from the 2020 global recession, as well as the lagged effects of earlier macroeconomic support, contributed to persistent price pressures. Price increases were particularly large in sectors such as shipping and air travel, where compositional shifts in demand encountered ongoing capacity constraints and supply chain disruptions (Kalemlı-Özcan et al. 2022). On the supply side, shortages of key commodities, exacerbated by Russia's invasion of Ukraine, contributed substantially to higher energy and food prices. In some countries, tight conditions and mismatches in labor markets further added to rising wages and higher input and production costs. Finally, many countries experienced large currency depreciations that passed through into higher import, producer, and consumer prices. The higher share of food in consumer spending has caused inflation to accelerate more in low-income countries compared to other EMDEs.

INDIAN ECONOMY

Introduction

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

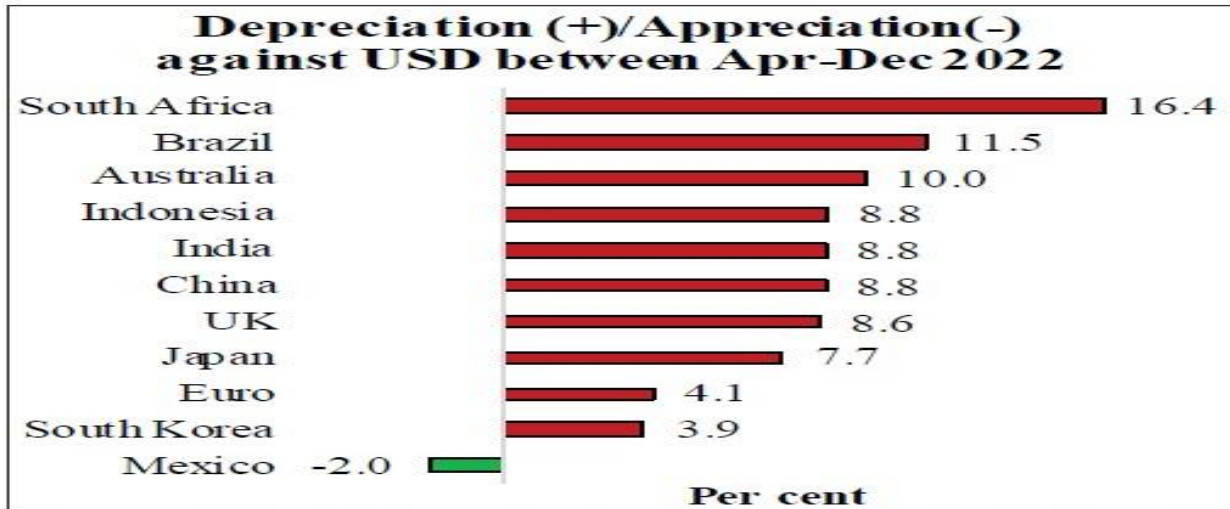

India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECLGS) is easing their debt servicing concerns. The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has been directly providing jobs in rural areas and indirectly creating opportunities for rural households to diversify their sources of income generation. Schemes like PM-Kisan and PM Garib Kalyan Yojana have helped in ensuring food security in the country, and their impact was also endorsed by the United Nations Development Programme (UNDP). The results of the National Family Health Survey (NFHS) also show improvement in rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

Macroeconomic and Growth Challenges in the Indian Economy

The impact of the pandemic on India was seen in a significant GDP contraction in FY21. The following year, FY22, the Indian economy started to recover despite the Omicron wave of January 2022. This third wave did not affect economic activity in India as much as the previous waves of the pandemic did since its outbreak in January 2020. Mobility enabled by localised lockdowns, rapid vaccination coverage, mild symptoms and quick recovery from the virus contributed to minimising the loss of economic output in the January-March quarter of 2022. Consequently, output in FY22 went past its pre-pandemic level in FY20, with the Indian economy staging a full recovery ahead of many nations. The experience with the Omicron variant engendered a cautious optimism that it was possible to stay physically mobile and engage in economic activities despite the pandemic. FY23 thus opened with a firm belief that the pandemic was rapidly on the wane and that India was poised to grow at a fast pace and quickly ascend to the pre-pandemic growth path.

With monetary tightening, the US dollar has appreciated against several currencies, including the rupee. However, the rupee has been one of the better-performing currencies worldwide, but the modest depreciation it underwent may have added to the domestic inflationary pressures besides widening the CAD. Global commodity prices may have eased but are still higher compared to pre-conflict levels. They have further widened the CAD, already enlarged by India's growth momentum. For FY23, India has sufficient forex reserves to finance the CAD and intervene in the forex market to manage volatility in the Indian rupee.

Figure I.12: Indian Rupee performed well compared to other EMEs

For many countries around the world, including India, 2021 was a period of recovery for health and economies from the impact of the pandemic. For the advanced economies, in particular, the enormous fiscal stimulus earlier injected by their governments supported a strong demand revival. Growth in world trade subsequently followed, of which India was also a beneficiary. India’s exports surged in FY22, and the momentum lasted up to the first half of FY23. Export growth was strong enough to increase India’s share in the world market of merchandise exports. However, due to aggressive and synchronised monetary tightening, global economic growth has started to slow, and so has world trade. As per United Nations Conference on Trade and Development (UNCTAD) latest global trade update, global trade growth turned negative during the H2:2022, and geopolitical frictions, persisting inflationary pressures, and subdued demand are expected to suppress global trade further in 2023. This is likely to affect many countries, including India, with the prospects of sluggish exports continuing into FY24, compared to the promise shown at the beginning of the current year.

India’s Economic Resilience and Growth Drivers

Monetary tightening by the RBI, the widening of the CAD, and the plateauing growth of exports have essentially been the outcome of geopolitical strife in Europe. As these developments posed downside risks to the growth of the Indian economy in FY23, many agencies worldwide have been revising their growth forecast of the Indian economy downwards. These forecasts, including the advance estimates released by the NSO, now broadly lie in the range of 6.5-7.0 per cent. Despite the downward revision, the growth estimate for FY23 is higher than for almost all major economies and even slightly above the average growth of the Indian economy in the decade leading up to the pandemic. IMF

estimates India to be one of the top two fast-growing significant economies in 2022. Despite strong global headwinds and tighter domestic monetary policy, if India is still expected to grow between 6.5 and 7.0 per cent, and that too without the advantage of a base effect, it is a reflection of India's underlying economic resilience; of its ability to recoup, renew and re-energise the growth drivers of the economy.

Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are Recognized in the period in which the estimate is revised and future periods affected.

3. Basis of classification of assets and liabilities into Current/non-current

The Company presents assets and liabilities in the balance sheet based on current and non-current classification.

As asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle Held primarily for the purpose of trading

4. Property, Plant and Equipment

Capital work-in-progress comprises cost of property, plant and equipment (including related expenses), that are not yet ready for their intended use at the reporting date.

Subsequent costs are included in the assets carrying amount or Recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

5. Depreciation

Depreciation is provided to the extent of depreciable amount on a straight-line basis (other than freehold land and capital work-in-progress) over the useful life of asset as assessed by the management and the same is similar to the useful lives as prescribed in Part-C of Schedule II to the Companies Act, 2013. Depreciation is charged on pro-rata basis for asset purchased/ sold during the year.

The assets residual values, useful life and method of depreciation of PPE are reviewed and adjusted if appropriate, at the end of each reporting period.

Type of Assets	Period
Buildings	30 Years
Plant and Equipment	15 Years
Furniture and Fixtures	10 Years
Electric Installation	10 Years
Vehicles	8 Years
Office equipment	5 Years
Computers	3 Years

6. Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated Amortization and accumulated impairment losses. Intangible assets are amortized on a straight-line value basis over the economic useful life estimated by the management.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The Amortization period and the Amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the Amortization period or method, as appropriate, and are treated as changes in accounting estimates. The Amortization expense on intangible assets with finite lives is Recognized in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are Recognized in the statement of profit or loss when the asset is derecognized.

7. Amortization of intangible assets

8. Leases

As a Lessee

Assets taken on lease by the Company in its capacity as lessee, where the Company has substantially all the risks and rewards of ownership are classified as finance lease. Such a lease is capitalised at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is Recognized for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year. Finance charges are Recognized in finance costs in the statement of profit and loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on the borrowing costs. Contingent rentals are Recognized as expenses in the periods in which they are incurred. A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are Recognized as operating leases. Lease rentals under operating leases are Recognized in the statement of profit and loss on a straight-line basis.

As a Lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is Recognized on a straight-line basis over the term of the relevant lease.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

9. Impairment

At each balance sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and the risks specific to the asset. Reversal of impairment loss is Recognized as income in the statement of profit and loss.

10. Government Grants

Government Grants if any, received against specific fixed assets are adjusted to the cost of the assets Revenue grants are recognized in the Statement of Profit and Loss.

11. Borrowing Cost:

Interest and other borrowing costs if any, attributable to qualifying assets, are added to the cost of the qualifying asset, until such time as the assets are substantially ready for their intended use. Qualifying assets for capital of general borrowing costs are those that necessarily take more than one year or substantial period of time to get ready for their intended use.

12. Investments

Investments if any, are considered as long term, therefore stated at cost of acquisition and no provision for diminution in value is made having considered as temporary by the board of directors.

13. Employee Benefits

Post-employment benefit plans

Contributions to defined contribution retirement benefit schemes are Recognized as expense when employees have rendered services entitling them to such benefits.

For defined benefit schemes, the cost of providing benefits is determined using the Projected Unit Credit Method, with actuarial valuations being carried out at each balance sheet date. Actuarial gains and losses are Recognized in full in the statement of profit and loss for the period in which they occur. Past service cost is Recognized immediately to the extent that the benefits are already vested, or amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation Recognized in the balance sheet represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, and as reduced by the fair value of scheme assets. Any asset resulting from this calculation is limited to the present value of available refunds and reductions in future contributions to the scheme.

14. Other employee benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is Recognized during the period when the employee renders the service. These benefits include compensated absences such as paid annual leave, overseas social security contributions and performance incentives.

15. Inventories

Inventories are valued at lower of cost and net realizable value. Cost of inventories, comprise costs of purchase and other costs incurred in bringing the inventories to their present condition and location. Cost is determined by the Specific identification of cost method. Costs of purchased inventory are determined after deducting rebates and discounts. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated cost necessary to make the sale.

16. Revenue recognition

Revenue from operations is recognized to the extent that it is probable that economic benefit will flow to the Company and the revenue can be reliably measured regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Sale of goods:

Revenue from sale of goods is recognized on delivery of merchandise to the customer, when the property in the goods is transferred for a price, and significant risks and rewards have been transferred and no effective ownership control is retained. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

17. Rental income:

Rental income arising from operating lease is accounted for on a straight-line basis over lease terms unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases and is included in the Statement of profit or loss due to its operating nature.

18. Interest income:

Interest income is recognized based on time proportion basis considering the amount outstanding and rate applicable (EIR).

19. Foreign currency transactions

Income and expense in foreign currencies are converted at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities other than net investments in non-integral foreign operations are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses are Recognized in the statement of profit and loss. Exchange difference arising on a monetary item that, in substance, forms part of an enterprise's net investments in a non-integral foreign operation are accumulated in a foreign currency translation reserve.

20. Taxation

Current income tax expense comprises taxes on income from operations in India and in foreign jurisdictions.

Income tax payable in India is determined in accordance with the provisions of the Income Tax Act, 1961. Tax expense relating to foreign operations is determined in accordance with tax laws applicable in countries where such operations are domiciled.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws in India, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax after the tax holiday period. Accordingly, MAT is Recognized as an asset in the balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with it will fructify.

Deferred tax expense or benefit is Recognized on timing differences being the difference between taxable income and accounting income that originate in one period and is likely to reverse in one or more subsequent periods. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

The Company offsets deferred tax assets and deferred tax liabilities if it has a legally enforceable right and these relate to taxes on income levied by the same governing taxation laws.

21. Provisions, Contingent liabilities and Contingent assets

A provision is Recognized when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates. Contingent liabilities are not Recognized in the financial statements. A contingent asset is neither Recognized nor disclosed in the financial statements.

22. Earnings per share (EPS)

Basic EPS amounts are calculated by dividing the profit for the year attributable to equity holders by the weighted average number of equity shares outstanding during the year.

Diluted EPS amounts are calculated by dividing the profit attributable to equity holders by the weighted average number of Equity shares outstanding during the year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

23. Cash and cash equivalents

After the date of last Audited accounts i.e., September 30, 2023, the Directors of our Company confirm that, there have not been any significant material developments;

FACTORS AFFECTING OUR FUTURE RESULTS OF OPERATIONS:

Our Company's future results of operations could be affected potentially by the following factors:

- ***Expansion of our distribution network***

As we look to grow our number of stores in the future, we expect our new stores to help provide accessibility to “Fonebox” ,“Fonebook” and “My Mobile” brands to a larger number of customers, which helps us to enhance our brand awareness in the locations where our stores open. Growing our number of restaurants has also historically enabled us to achieve economies of scale through operational leverage across various costs. This also enabled us to enhance our purchasing power with our suppliers and obtain better pricing for the products that we procure for our customers.

- ***Cost of Goods (Purchase of Stock in Trade)***

Cost of goods is the largest component of our expenses, representing 95.65%, 90.98%, 90.03% and 89.82% of our total revenue, in FY 2021, 2022, 2023 and for the period ended September 30, 2023, respectively. Therefore, any change in the market prices of smart phones, electrical accessories or any part(s) used in the manufacturing of the same for e.g. semiconductor chips, will have a significant and direct impact on our profitability. Our cost of goods is also impacted by the quality that we offer in our stores. Our results of operations are therefore affected by our on-going ability to procure quality goods at an optimum price.

- ***Our diversified product portfolio and product mix***

Our Company is engaged in multi-brand retail selling of Smart Phones and allied accessories from manufacturers like Vivo, Apple, Samsung, Oppo, Realme, Nokia, Narzo, Redmi, Motorola, LG and Micromax. We are also engaged in multi-brand retail selling of consumer durable electronics goods like Smart TVs, Air Conditioners, Fridges, Coolers etc. from brands like TCL, Haier, Lloyd, Daikin, Voltas, Mi, Realme, OnePlus. A diverse product portfolio and product mix not only helps increase revenue from operations but also reduces dependence on any single product or product category. The Total Revenue from operations for the period ended on September 30, 2023 was ₹ 13,975.84 Lakhs and for the year ended on FY 2023 was ₹19,582.60 Lakh as compared to ₹9,090.74 Lakh during the FY 2022.

- ***Consumer spending, demographics and general economic and market conditions in India***

The consumer spending patterns, demographics, and overall economic conditions in India can significantly impact our company as higher disposable income levels enable consumers to spend more on discretionary items like mobile phones. During periods of economic growth, when disposable income rises, there is typically an uptick in consumer demand for upgraded or premium mobile devices. While during, there may be a shift towards more budget-friendly options rather than premium flagship models.

- ***Competition***

We compete within the mobile retail industry as well as other consumer durable electrical goods. The mobile retail industry in India is competitive, and we generally compete on the basis of product and service quality and price, location. The industry is often also affected by various factors, including changes in consumer tastes, economic conditions, demographic and technological trends and consumer disposable income. Due to increased competition, we could experience downward pressure on prices, lower demand for our products, reduced margins, an inability to take advantage of new business opportunities, including finding suitable store locations and a loss of market share.

• **Other Factors:**

- COVID-19 Pandemic;
- Natural Calamities e.g., Tsunami
- Political Stability of the Country;
- Our dependence on limited number of suppliers for a significant portion of our revenues;
- Any failure to comply with the financial and restrictive covenants under our financing arrangements;
- Failure to obtain any applicable approvals, licenses, registrations and permits in a timely manner;

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the course of undertaking our business, we are exposed to the following risks arising from financial instruments, which include credit risk, liquidity risk and market risk. Our primary focus is to achieve better predictability of financial markets and seek to minimize potential adverse effects on our financial performance.

Credit Risk

Credit risk is the risk that a customer or counterparty to a financial instrument will fail to perform or fail to pay amounts due causing financial loss. The potential activities where credit risks may arise include from cash and cash equivalents, security deposits or other deposits and principally from credit exposures to customers relating to outstanding receivables. The maximum credit exposure associated with financial assets is equal to the carrying amount.

Our exposure to credit risk is influenced mainly by the individual characteristics of each customer and the geography in which it operates. Credit risk is managed through credit approvals, establishing credit limits, and continuously monitoring the creditworthiness of customers to which our Company grants credit terms in the normal course of business.

Liquidity Risk

Liquidity risk is the risk that we will encounter difficulty in meeting the obligations associated with its financial liabilities that are proposed to be settled by delivering cash or other financial asset. Our financial planning has ensured, as far as possible, that there is sufficient liquidity to meet the liabilities whenever due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to our reputation. We have practiced financial diligence and syndicated adequate liquidity in all business scenarios.

Market Risk

Market risk is the risk that results in changes in market prices, such as interest rates and equity prices, which will affect our income or the value of our holdings of financial instruments. Our operations result in us being exposed to foreign currency risk on account of trade receivables, trade payables and borrowings. The foreign currency risk may affect our income and expenses, or our financial position and cash flows. The objective of our management of foreign currency risk is to maintain this risk within acceptable parameters, while optimising returns.

EFFECT OF INFLATION

We are affected by inflation as it has an impact on the operating cost, staff costs etc. In line with changing inflation rates, we rework our margins so as to absorb the inflationary impact.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/

her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.

Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Issue is being made under Phase III of the UPI (on a mandatory basis).

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI Mechanism.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and SEBI circular no. Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Foreign investment is allowed up to 100% under automatic route in our Company.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as the Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which, with effect from October 15, 2020 consolidated, subsumed and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. In terms of FDI Policy, FDI to an extent of 51% is allowed in multi brand retail trading with government approval. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

Under the current FDI Policy and the FEMA Non-Debt Rules, foreign direct investment is not permitted in companies engaged in (a) multi-brand retail trading, undertaking retail trading by means of e-commerce, and (b) inventory-based model of e-commerce. In accordance with the FEMA Non-debt Rules, participation by non-residents in the Issue is restricted to participation by (i) FPIs under Schedule II of the FEMA Non-debt Rules, subject to limit of the individual holding of an FPI below 10% of the post-Issue paid-up capital of our Company and the aggregate limit for FPI investment currently not exceeding the sectoral cap i.e., 51% of the post issue paid up share capital; and (ii) Eligible NRIs applying only on a non-repatriation basis under Schedule IV of the FEMA Non-debt Rules. Further, other non-residents applying on a repatriation basis, FVCIs and multilateral and bilateral development financial institutions are not permitted to participate in the Issue. As per the existing policy of the Government of India, OCBs cannot participate in this issue. See “*Issue Procedure*” beginning on page 269.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPP), issued consolidated FDI Policy, which with effect from August 28, 2017 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

The foreign investment in our Company is governed by, inter-alia, the FEMA, the FEMA Non-debt Rules, the FDI Policy issued and amended by way of press notes.

Further, in terms of the FEMA Non-debt Rules, the aggregate FPI investment limit is the sectoral cap applicable to Indian company as prescribed in the FEMA Non-Debt Instruments Rules with respect to its paid-up equity capital on a fully diluted basis. See “*Issue Procedure*” beginning on page 269.

Further, in accordance with the FDI Policy, the Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non-debt Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the FDI Policy and the FEMA Non-debt Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Non-Debt Rules. Each Bidder should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar in writing about such approval along with a copy thereof within the Bid/Issue Period.
